Quicent 005-129

Quicent Essential Series 12x9ft Metal Chicken Coop Run Instruction Manual

Model: 005-129

INTRODUCTION

This manual provides comprehensive instructions for the assembly, operation, and maintenance of your Quicent Essential Series 12x9ft Metal Chicken Coop Run. Designed for various poultry, including hens, ducks, and rabbits, this outdoor enclosure features a stable metal frame, PVC-coated chicken wire, a climbing ladder, and a waterproof, anti-UV cover. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

SAFETY INFORMATION

- Always ensure all components are securely fastened during assembly and regular use.
- Keep children and pets away from the assembly area to prevent injury.
- Regularly inspect the coop for any signs of wear, damage, or loose connections. Address any issues promptly.
- **Wind Precaution:** Due to the potential "sail effect" of the roof cover in high winds, it is recommended to remove the cover or secure it tightly with additional weights or ground anchors during severe weather conditions. This helps protect the coop and ensures the safety of your animals.
- Ensure the ground skirt is properly weighted or buried to prevent predators from digging underneath.

PACKAGE CONTENTS

All parts for this model are contained within a single box. Before beginning assembly, carefully unpack all components and verify the quantity against the included parts list (not provided in this manual, refer to your product's specific packing list). Ensure all pieces are present and undamaged.

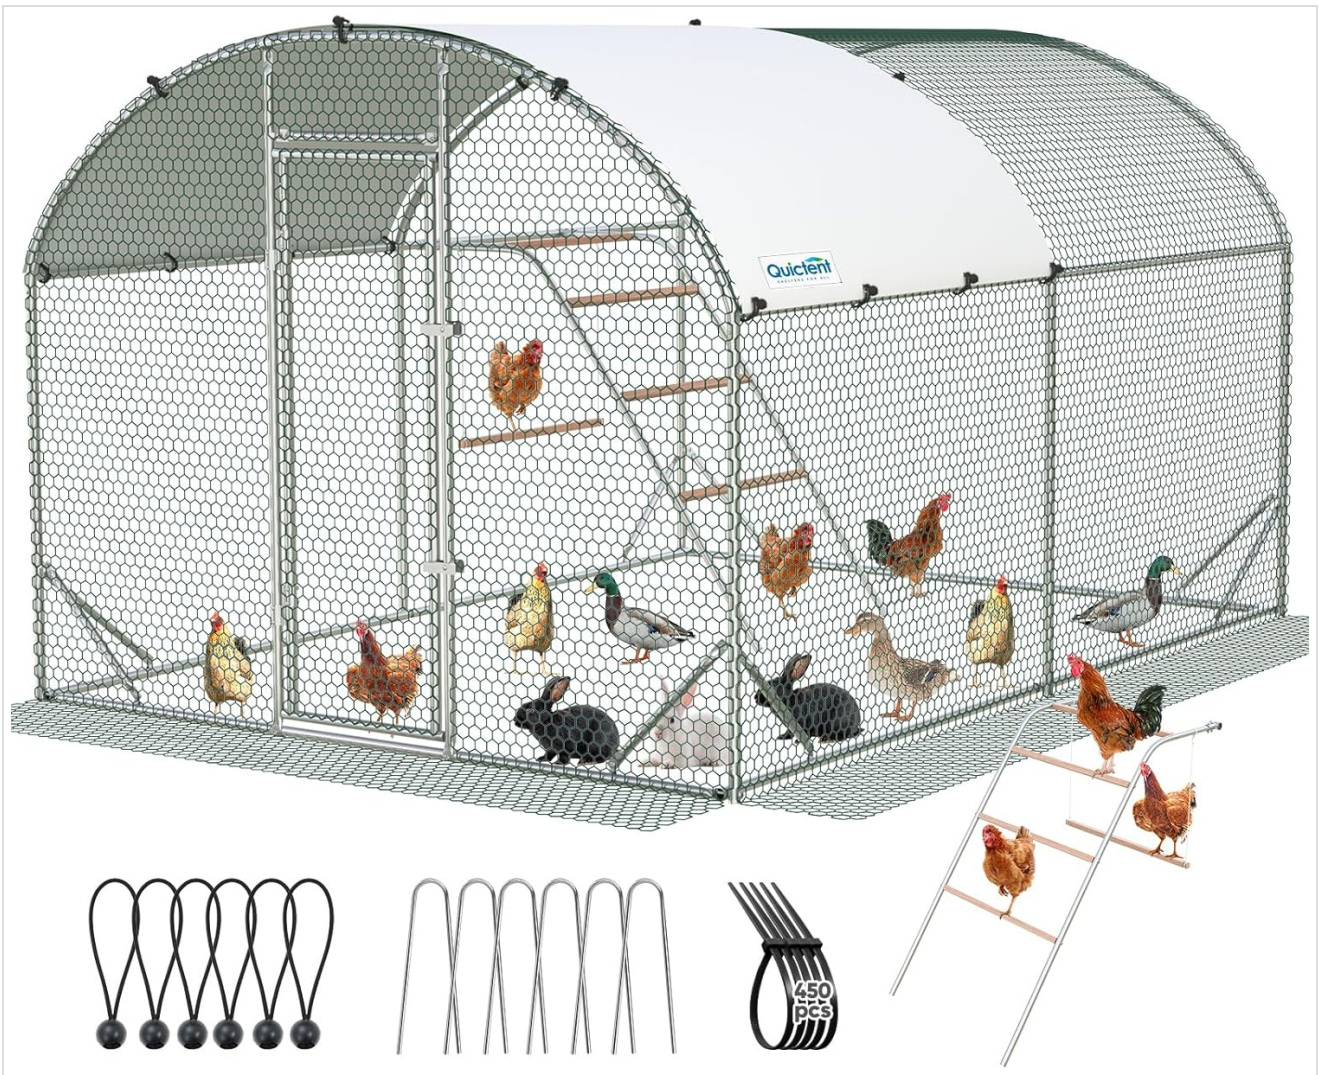

Image: Product dimensions and confirmation that all parts are in one box. Dimensions are approximately 11.97ft L x 9.02ft W x 6.56ft H, with a shoulder height of 4.5ft.

SETUP AND ASSEMBLY INSTRUCTIONS

Assembly of the Quicent Essential Series Chicken Coop Run is designed to be tool-free with a push-button design. Follow these general steps, referring to your specific assembly diagram for detailed part identification.

1. **Unpack and Organize:** Lay out all components and identify them according to your product's parts list.
2. **Assemble the Frame:** Connect the galvanized steel poles using the push-button mechanism. Ensure all connections click into place securely.
3. **Install Reinforced Corner Poles:** Attach the reinforced corner poles and fix U-shaped stakes to enhance stability before applying the chicken wire.

Safe & Secure++

Keep small predators out of the coop

Narrowed Gap

0.78inch

Latches x2

Image: Illustration of reinforced corner poles and U-shaped stakes being assembled for enhanced stability of the coop frame.

4. **Attach Chicken Wire:** Wrap the thickened PVC-coated hexagonal chicken wire around the frame. Use the provided weatherproof zip ties (approximately 450 pieces) to secure the wire tightly to the frame, ensuring no gaps.

Keep Wire Cloth Tight

Thoughtful accessories for a better experience

Image: Close-up view demonstrating the use of zip ties to secure the PVC-coated chicken wire tightly to the metal frame.

5. **Install Door:** Assemble and attach the door frame, ensuring the dual-latch mechanism functions correctly. The door is designed with narrowed gaps for security.
6. **Position Ground Skirt:** Ensure the extended mesh ground skirt is laid out properly around the base of the coop. This skirt should be weighted or buried to deter digging predators.
7. **Install Climbing Ladder:** Secure the multi-level climbing ladder inside the coop. The natural wooden crossbars provide a non-slip grip for poultry.

Image: Chickens utilizing the multi-level wooden roosting bar, designed for better movement and comfort, preventing hot metal burns or winter foot freeze.

8. **Attach Waterproof Cover:** Place the waterproof and UV-resistant cover over the top of the coop. Secure it using the upgraded elastic ball straps to provide shade and protection from rain.

OPERATING INSTRUCTIONS

- **Access Door:** The coop features a dual-latch door for secure entry and exit. Always ensure both latches are engaged when the door is closed to prevent animals from escaping and predators from entering.
- **Climbing Ladder:** The included multi-level climbing ladder allows your poultry to satisfy their natural climbing and roosting instincts. Ensure it is stable and free from obstructions.
- **Weather Cover:** The waterproof and UV-resistant cover provides essential protection from sun and rain. Adjust its position or remove it as needed based on weather conditions and your animals' comfort.
- **Spacious Interior:** The coop offers enhanced space with a 4.5ft shoulder height and 6.6ft peak height, allowing comfortable walk-in access and ample room for 12-20 poultry to roam.

MAINTENANCE

- **Regular Inspection:** Periodically check the entire structure for any loose bolts, damaged wire, or signs of rust on the galvanized steel frame. Tighten or replace components as necessary.
- **Cleaning:** Clean the coop regularly to maintain a hygienic environment for your animals. The PVC-coated wire can be hosed down.
- **Cover Care:** Inspect the waterproof cover for tears or damage. Clean it with mild soap and water if needed. As mentioned in safety, remove or secure the cover during high winds.
- **Ground Skirt:** Ensure the ground skirt remains weighted or buried to maintain its predator-deterrent function.

TROUBLESHOOTING

Predator Protection

- **Digging Predators:** The extended mesh ground skirt is designed to deter digging predators. For concrete or hard surfaces, place heavy weights on the skirt. For loose or soft ground, use spiral stakes in addition to weights.

Image: Solutions for securing the ground skirt on different terrains: using weights for hard surfaces and spiral stakes with weights for soft ground.

- **Entry Points:** The coop features thickened PVC-coated hexagonal chicken wire, narrowed gaps, and a dual-

latch door to prevent small predators from entering. Regularly check for any breaches in the wire or frame.

Extended Length

No bottom gap design

Image: The extended mesh ground skirt provides a barrier against digging predators like ferrets, ensuring no bottom gap.

Upgraded Stability

Reinforced corner poles for extra sturdiness

BEFORE CHICKEN WIRE

Assemble corner poles

Fix U-shaped stakes

Image: Detailed view of the coop's security features, including a narrowed 0.78-inch gap and two latches on the door to keep small predators out.

Stability Issues

- Ensure all frame connections are fully engaged.
- Verify that the reinforced corner poles and U-shaped stakes are correctly installed and secured.
- In windy conditions, consider adding additional ground anchors or weights to the frame for extra stability.

SPECIFICATIONS

Product Dimensions (L x W x H)	143.7" x 108.3" x 78.8" (11.97ft x 9.02ft x 6.56ft)
Item Model Number	005-129
Material	Galvanized Metal, Polyethylene (PE)
Special Features	PVC Coated Chicken Wire, Essential Series, Extra Perch (Climbing Ladder), Waterproof Anti-UV Cover
Unit Count	108.0 Square Feet

Breed Recommendation	All Breed Sizes
