Nityers TT03

Nityers Automatic Dog Feeder with Camera (Model TT03)

Instruction Manual

INTRODUCTION

Thank you for choosing the Nityers Automatic Dog Feeder with Camera, Model TT03. This advanced pet feeder is designed to provide convenient and reliable feeding for your large breed dog, ensuring they receive their meals on schedule with precise portion control. Equipped with a 1080P HD camera, night vision, and 5G WiFi connectivity, you can monitor and interact with your pet remotely. Please read this manual thoroughly before use to ensure proper setup and operation.

IMPORTANT SAFETY INFORMATION

- Always place the feeder on a stable, level surface.
- Keep the feeder away from direct sunlight and damp environments.
- Do not immerse the main unit in water. Only detachable parts are washable.
- Ensure the power adapter is securely connected and away from pet access.
- Use only dry kibble between 2-23mm in size to prevent clogging.
- Keep out of reach of children.

PACKAGE CONTENTS

Please check that all items are included in your package:

- Nityers Automatic Pet Feeder Main Body with Camera
- 15L Food Storage Container
- Spring-lock Lid with Desiccant Pack
- Stainless Steel Food Bowl
- Bowl Tray
- Elevated Stand (legs)
- Power Adapter with Cord

SETUP GUIDE

1. Assembly

The Nityers Automatic Dog Feeder is designed for easy assembly without the need for tools. All components fit together intuitively.

1. Unpack all components from the box.
2. Attach the elevated stand legs to the main feeder unit. Ensure they click securely into place. The feeder includes both low and high stand options to accommodate pets of different sizes.
3. Place the stainless steel food bowl into the bowl tray, then slide the tray into the designated slot at the base of the feeder.

2. Power Connection

Connect the power adapter to the feeder and plug it into a wall outlet. For backup power, insert 8 AA batteries (not included) into the battery compartment at the bottom of the unit. This ensures uninterrupted feeding during power

outages.

3. Filling the Food Hopper

1. Press the tabs on each side of the spring-lock lid to remove it.
2. Fill the 15L food storage container with dry kibble. The transparent viewing window allows you to monitor food levels.
3. Place the desiccant pack into its dedicated compartment within the lid to maintain food freshness.
4. Securely close the lid, ensuring the spring-locks engage.

Image: Exploded view of the feeder's freshness features, including the secure lock lid, desiccant bag, silicone sealing, and patented rotor, designed to keep kibble fresh.

4. App Download and Wi-Fi Connection

Download the Nityers app from the iOS App Store or Google Play Store. Follow the in-app instructions to connect your feeder to your home's 2.4GHz or 5GHz Wi-Fi network. This enables remote control and monitoring.

OPERATING INSTRUCTIONS

1. Control Panel Overview

The feeder features an intuitive control panel for manual adjustments and settings. Buttons include: Up, Down, Lock, Microphone, Settings, and Manual Feed.

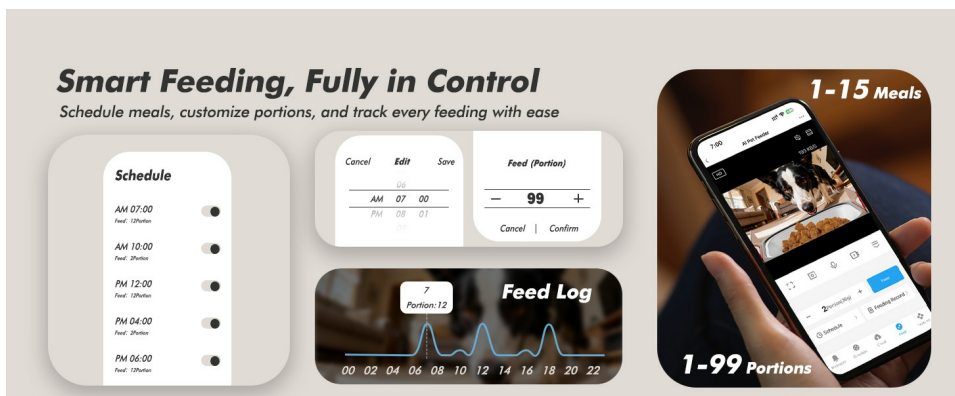

Image: The feeder's control panel displaying time and portion settings, alongside a smartphone screen showing the app's scheduling and feed log features.

2. Setting Time and Scheduling Meals

You can program up to 15 meals per day with up to 99 portions (1 portion = 1/10 cup) per meal.

- Set Current Time:** Press the Settings button until the hour display flashes. Use the Up/Down buttons to adjust the hour, then press Settings again to adjust minutes. Press Settings once more to confirm.
- Schedule Feeding Times:** Press the Settings button to cycle through feeding schedules (P-01, P-02, etc.). For each schedule, set the desired feeding time and portion size using the Up/Down buttons. Confirm each setting with the Settings button.
- Lock Settings:** Once all schedules are set, press the Lock button to prevent accidental changes.

3. Manual Feeding

To dispense food manually, press the Manual Feed button on the control panel or use the instant feed option in the app.

4. Camera Features (1080P HD with Night Vision)

The integrated 1080P HD camera allows you to monitor your pet and their feeding routine. It features a 10° up and 70° down tilt, adjustable via the app.

- **Live View:** Access real-time video of your pet through the Nityers app.
- **Night Vision:** The camera automatically switches to night vision in low-light conditions, ensuring clear monitoring 24/7.
- **AI Motion Detection:** Receive alerts when your pet is near the feeder. The AI minimizes false alarms by distinguishing pets from other movements.
- **Video Recording:** Footage can be stored on a micro SD card (not included, up to 128GB) or via optional cloud storage subscription.

Image: Demonstration of the feeder's night vision feature, providing clear visibility of your pet even in low-light conditions.

5. Two-Way Audio and Voice Recording

The built-in microphone and speaker allow for real-time interaction with your pet.

- **Two-Way Talk:** Speak to your pet through the app and hear their responses.
- **Voice Message:** Record a custom voice message that will play during scheduled feeding times to call your pet to their meal.

MAINTENANCE

1. Cleaning

Regular cleaning ensures hygiene and proper functioning of the feeder. The feeder features fully removable parts for thorough cleaning.

1. **Detachable Parts:** Remove the lid, food hopper with bottom, dispenser rotor, stainless steel bowl, and bowl tray. These parts can be washed with soap and water.
2. **Main Unit:** Wipe the main unit with a dry or slightly damp cloth. *Do not immerse the main unit in water.*
3. Ensure all parts are completely dry before reassembling.

Image: All detachable components of the feeder laid out, illustrating the ease of disassembly for comprehensive cleaning.

2. Desiccant Replacement

Replace the desiccant pack in the lid every 1-2 months, or as needed, to maintain optimal food freshness and prevent moisture buildup.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Feeder not dispensing food.	Kibble size too large or too small; food channel clogged; hopper empty.	Ensure kibble is 2-23mm. Check for blockages and clear the food channel. Refill hopper if empty.

Problem	Possible Cause	Solution
Wi-Fi connection issues.	Incorrect Wi-Fi password; feeder too far from router; router settings.	Verify password. Move feeder closer to router. Ensure router supports 2.4GHz/5GHz and disable MAC filtering if enabled. Restart feeder and router.
Camera not working or poor quality.	Poor Wi-Fi signal; camera lens obstructed; app settings.	Check Wi-Fi signal strength. Clean camera lens. Adjust video quality settings in the app.
Food not staying fresh.	Lid not sealed properly; desiccant pack needs replacement.	Ensure lid is securely closed. Replace desiccant pack.

SPECIFICATIONS

- **Model Number:** TT03
- **Capacity:** 15 Liters (approx. 64 cups)
- **Kibble Size Compatibility:** 2-23mm
- **Product Dimensions:** 7.6"L x 13.8"W x 15.4"H
- **Weight:** 11.49 Pounds
- **Material:** Acrylonitrile Butadiene Styrene, Plastic, Stainless Steel
- **Connectivity:** 2.4GHz & 5GHz WiFi
- **Camera:** 1080P HD with Night Vision, AI Motion Detection
- **Audio:** Two-way voice, voice recording
- **Power Source:** Type-C Power Adapter (included), 8 AA Batteries (not included) for backup
- **Max Meals/Day:** 15
- **Max Portions/Meal:** 99 (1 portion = 1/10 cup)
- **Target Species:** Cats, dogs, small animals
