WowCatch N386D

WowCatch N386D Plug-in UV Light Flying Insect Trap User Manual

Model: N386D

INTRODUCTION

The WowCatch N386D Plug-in UV Light Flying Insect Trap is designed to effectively attract and trap various flying insects indoors, including fruit flies, gnats, and house flies. This device utilizes upgraded Dual-UV Light technology and sticky cards to provide a chemical-free and silent solution for insect control in your home. It is suitable for use in kitchens, bedrooms, living rooms, and other indoor spaces.

WOWCATCH

Protect Home From Pesky Pests

**24/7**
Continuous Catch

Flies

House Flies

Moths

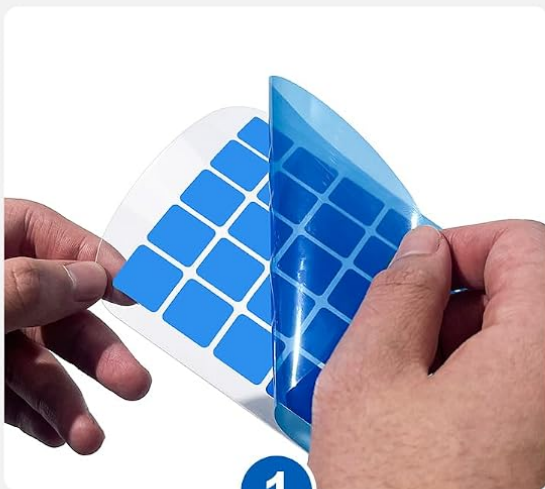

Gnats

The WowCatch Plug-in Flying Insect Trap, model N386D, is designed to attract and trap flying insects using UV light. It plugs directly into a standard wall outlet.

SETUP INSTRUCTIONS

1. **Unpack the Device:** Carefully remove the WowCatch N386D device and the sticky cards from the packaging.
2. **Prepare the Sticky Card:** Peel off the protective film from one side of a sticky card.
3. **Insert the Sticky Card:** Open the front cover of the trap and insert the sticky card into the designated slot with the adhesive side facing the UV light. Ensure it is securely in place.
4. **Plug In:** Close the front cover and plug the device into any standard indoor electrical outlet. The UV light will illuminate, indicating the trap is active.

Plug and Play

1
Peel off the film

2
Insert the card

3
Plug the device

4
Remove and discard the used card
(Every 2-4 weeks)

This visual guide demonstrates the simple setup process: peel the film from the sticky card, insert it into the device, plug the device into an outlet, and replace the card every 2-4 weeks.

OPERATING INSTRUCTIONS

- **Continuous Operation:** For optimal results, allow the trap to run continuously for 24–72 hours, especially when first deployed. The device operates silently 24/7.
- **Placement:** Place the trap in areas where flying insects are most active. Recommended locations include kitchens, bedrooms, living rooms, bathrooms, near windows, fruit bowls, trash areas, and houseplants. Avoid placing it behind furniture or curtains that might obstruct the UV light.

- **Light Attraction:** The dual-UV light attracts insects, which then become trapped on the internal sticky card.

Place Trap Where You See Flying Insects

Optimal placement for the WowCatch insect trap includes areas where flying insects are commonly observed, such as kitchens, bedrooms, bathrooms, and near houseplants.

UV Flying Insect Trap

Perfect for use near: Entryways, Windows, Fruit Bowls, Trash Areas, and Plants Zones.

Safe

Simple

Sleek

The UV light emitted by the trap attracts insects from a wide area, making it suitable for various indoor environments like entryways, near windows, and plant zones.

MAINTENANCE

- **Sticky Card Replacement:** Replace the sticky card every 2-4 weeks, or sooner if it becomes full of insects. Refill cards are sold separately.
- **Cleaning:** Unplug the device before cleaning. Wipe the exterior of the trap with a dry, soft cloth. Do not use liquid cleaners or immerse the device in water.

Ultra-strong Adhesive:

50 years of R&D
for an escape-proof trap.

This image displays the internal sticky card of the WowCatch insect trap, which captures fruit flies, gnats, and house flies. The trap features a sleek design that conceals trapped insects.

TROUBLESHOOTING

• Device Not Lighting Up:

- Ensure the device is securely plugged into a functional electrical outlet.
- Check if the outlet is receiving power by testing it with another appliance.

• Insects Not Being Trapped:

- Verify that the sticky card's protective film has been fully removed and the adhesive side is exposed.
- Ensure the trap is placed in an area with high insect activity and that the UV light is not obstructed.
- Allow 24-72 hours for the trap to become fully effective, as insects may take time to be attracted.

- Consider replacing the sticky card if it appears to have lost its adhesive quality or is already full.
- **Reduced Effectiveness:**
 - The UV light has a lifespan of 50,000+ hours. If the light appears dim or ineffective after extended use, the unit may need replacement.
 - Ensure the sticky card is replaced regularly (every 2-4 weeks) to maintain maximum trapping capability.

SPECIFICATIONS

Brand	WowCatch
Model Number	N386D
Color	White
Material	Acrylonitrile Butadiene Styrene (ABS)
Product Dimensions (L x W x H)	3.85" x 2.23" x 6.22"
