Polaris F4T2

Polaris Quattro T2 F4T2 Pressure Side Pool Cleaner Instruction Manual

Model: F4T2

INTRODUCTION

The Polaris Quattro T2 is a pressure-side pool cleaner designed for inground pools. It utilizes a dedicated booster pump for operation, providing powerful cleaning performance. Key features include TankTrax Technology for superior navigation and wall climbing, dual-stage filtration for both large and fine debris, and active scrubbing brushes for thorough cleaning from the pool floor to the waterline.

SETUP INSTRUCTIONS

Proper setup ensures optimal performance of your Polaris Quattro T2 pool cleaner. This cleaner requires a dedicated booster pump for operation.

1. **Booster Pump Installation:** Ensure a dedicated booster pump is correctly installed and operational according to its manufacturer's instructions. The Polaris Quattro T2 operates exclusively with a booster pump.
2. **Hose Assembly:** Connect the cleaner's hose sections. The total hose length should allow the cleaner to reach all areas of your pool, including the furthest points, without excess slack. For pools up to 70 feet, adjust hose length accordingly.
3. **Connect to Pressure Line:** Attach the assembled hose to the dedicated pressure line in your pool. Ensure all connections are secure to prevent leaks and maintain optimal pressure.
4. **Initial Placement:** Carefully place the Polaris Quattro T2 into the pool. Allow it to sink to the bottom before activating the booster pump.
5. **Adjust Water Flow:** Once the booster pump is activated, observe the cleaner's movement. Adjust the water flow from the pressure line, if necessary, to achieve consistent and efficient movement across the pool floor and walls.

OPERATING INSTRUCTIONS

The Polaris Quattro T2 is designed for automated cleaning. Follow these steps for effective operation:

1. **Activate Booster Pump:** Turn on the dedicated booster pump. The cleaner will begin to move and scrub the pool surfaces.
2. **Monitor Movement:** Observe the cleaner's path. The TankTrax Technology provides superior navigation, allowing it to maneuver steps, slopes, and walls for comprehensive coverage.

3. **Cleaning Cycle:** Allow the cleaner to complete its cycle. The active scrubbing brushes work to loosen dirt and grime from the pool floor to the waterline.
4. **Debris Collection:** The extra-large 2.75-inch debris intake is designed to handle various debris types, from leaves to fine silt, which are collected in the dual-stage filtration canister.
5. **Deactivate:** Once the cleaning cycle is complete or the pool is clean, turn off the booster pump.
6. **Remove from Pool:** Carefully remove the cleaner from the pool.

Tackles Large Debris

Extra large 2.75 inch intake area handles heavier debris loads from large leaves to pebbles and acorns.

MAINTENANCE

Regular maintenance ensures the longevity and efficiency of your Polaris Quattro T2.

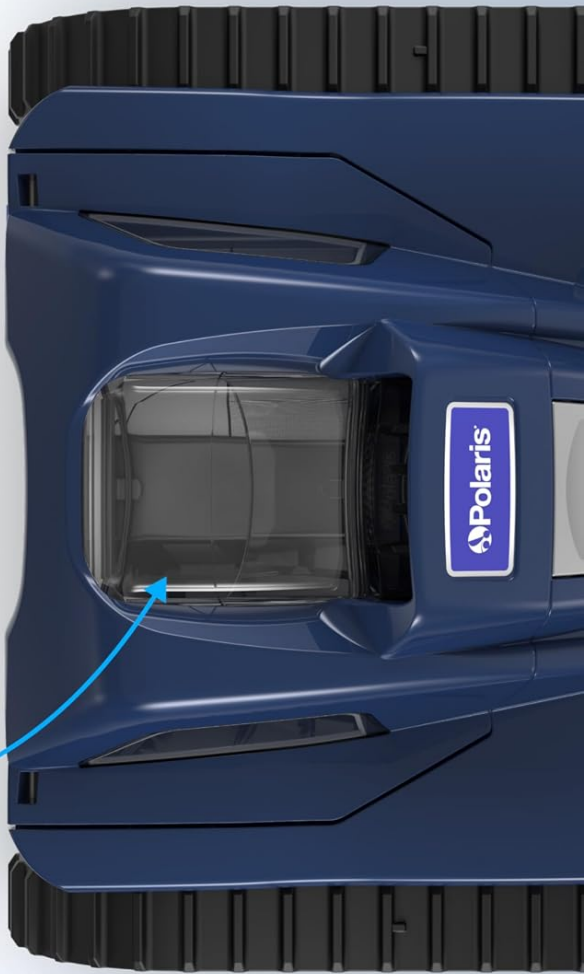

- **Empty and Clean Debris Canister:** After each use, or when visibly full, remove the debris canister. The transparent design allows easy monitoring. Empty collected debris and rinse the canister thoroughly. Reinforced seals help prevent fine debris from escaping.
- **Inspect Scrubbing Brushes:** Periodically check the front and side scrubbing brushes for wear or damage. Replace them if they appear worn to maintain effective scrubbing action.
- **Check TankTrax:** Inspect the TankTrax treads for any signs of wear, damage, or debris accumulation. Ensure they are clean and move freely for optimal traction and navigation.
- **Hose Inspection:** Examine the cleaner's hose for kinks, cracks, or blockages. A damaged hose can affect water flow and cleaner performance.

- **Storage:** When not in use for extended periods, store the cleaner in a cool, dry place away from direct sunlight.

Locks in fine debris.

Reinforced canister seals retain even the finest debris for fewer leaks and higher efficiency.

Transparent canister makes it easy to see when it's time to empty.

WORKS WITH A BOOSTER PUMP to create a powerful flow and circulate clean water.

TROUBLESHOOTING

If your Polaris Quattro T2 is not performing as expected, refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Cleaner is not moving or moving slowly.	Insufficient water pressure; Clogged intake or hose; Debris in pump impeller.	Check booster pump operation; Clear any blockages from the debris intake and hose; Inspect booster pump impeller for obstructions.

Problem	Possible Cause	Solution
Cleaner is not picking up debris effectively.	Full debris canister; Worn scrubbing brushes; Clogged intake.	Empty and clean the debris canister; Inspect and replace worn scrubbing brushes; Clear any blockages from the 2.75-inch debris intake.
Cleaner gets stuck or does not cover the entire pool.	Hose tangles; Incorrect hose length; Obstacles in the pool; Insufficient water flow.	Ensure hose is free of tangles; Adjust hose length to prevent excess slack; Remove large obstacles from the pool; Verify adequate water flow from the pressure line.
Cleaner struggles with large leaves or heavy debris.	Debris intake partially blocked; Water flow too low.	Ensure the 2.75-inch debris intake is clear; Increase water flow from the booster pump if possible, ensuring it does not cause excessive cleaner speed.

TankTrax Technology

Superior navigation, fewer missed spots.

Enhanced wall climbing and obstacle management for uninterrupted pool cleaning.

PRODUCT SPECIFICATIONS

- **Brand:** Polaris
- **Model Name:** F4T2
- **Material:** Plastic
- **Color:** Blue
- **Product Dimensions (L x W x H):** 15.5" x 15.5" x 10.75"
- **Power Source:** Pump Powered (requires dedicated booster pump)
- **Special Features:** Self Propelled, Wall-Climbing TankTrax, Dual-Stage Filtration, Active Scrubbing Brushes
- **Control Method:** Push Button, Touch (referring to pump control)
- **Debris Intake Capacity:** 2.75 inches (extra-large)
- **Installation Type:** Pressure Side
- **Item Weight:** 28 pounds
- **Manufacturer:** Fluidra
- **UPC:** 052337327572

WARRANTY AND SUPPORT

For specific warranty information, please refer to the documentation included with your purchase or visit the official Polaris website. For technical support, replacement parts, or further assistance, please contact Polaris customer service.
