ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your OLIXIS Armless Vanity Chair. A wrench (11) is included for tightening bolts.

1. Step 1: Assemble the Base Legs

Turn the Five-Star Base (6) upside down. Insert each of the five Base Legs (7) one by one into the slots of the Five-Star Base. Secure them by screwing ten Bolts (8) into the pre-drilled holes using the provided Wrench (11). Ensure all bolts are tightened securely.

2. Step 2: Install Casters and Gas Lift

Press the five Casters (5) firmly into the holes at the end of each Base Leg until they click into place. Then, insert the Gas Lift (4) into the central hole of the assembled base.

3. Step 3: Attach the Mechanism to the Seat Cushion

Place the Seat Cushion (2) upside down. Align the Mechanism (3) over the pre-drilled holes on the underside of the seat cushion, ensuring the front of the mechanism (the side with the lever) faces the front of the seat cushion. Attach the Mechanism to the Seat Cushion using four Bolts (9) and tighten them with the Wrench (11).

4. Step 4: Attach the Back Cushion to the Seat Cushion

Turn the Back Cushion (1) upright. Align the mounting plate of the Back Cushion with the corresponding holes on the rear underside of the Seat Cushion (where the mechanism is already attached). Secure the Back Cushion to the Seat Cushion using four Bolts (10) and tighten them with the Wrench (11).

5. Step 5: Final Assembly

Carefully align the central hole at the bottom of the assembled seat and back cushions with the top of the Gas Lift (4). Gently lower the chair body onto the Gas Lift until it is securely seated.

MAINTENANCE

Proper maintenance will extend the life and appearance of your chair.

Cleaning

- For general cleaning, wipe the chair with a soft, damp cloth.
- For fabric upholstery, use a mild fabric cleaner or a solution of mild soap and water. Test on an inconspicuous area first.
- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the finish and fabric.
- Wipe up spills immediately to prevent staining.

Inspection

- Periodically check all bolts and screws to ensure they are tight. Retighten if necessary.
- Inspect casters for any debris (hair, lint) that might hinder smooth rolling. Clean as needed.
- Check the gas lift for proper function. If the chair does not adjust height smoothly, contact customer support.

TROUBLESHOOTING

If you encounter any issues with your chair, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Chair is wobbly	Loose bolts or uneven assembly.	Check and tighten all assembly bolts. Ensure the chair is on a flat surface.
Casters not rolling smoothly	Debris in casters or casters not fully inserted.	Remove any debris from the casters. Ensure casters are fully pressed into the base legs.
Seat height not adjusting	Gas lift not properly installed or damaged.	Ensure the gas lift is correctly inserted into both the base and the mechanism. If the issue persists, the gas lift may be faulty and require replacement.
Squeaking noises	Loose connections or friction between parts.	Tighten all bolts. Apply a small amount of silicone lubricant to moving parts if necessary, avoiding contact with upholstery.
