## TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common solutions:

Problem	Possible Cause	Solution
Cabinet is wobbly.	Uneven floor or loose fasteners.	Ensure the cabinet is on a level surface. Check and tighten all assembly screws. Use shims if necessary for uneven floors.
Doors do not close properly or are misaligned.	Hinges are loose or improperly adjusted.	Tighten hinge screws. Most hinges allow for minor adjustments (up/down, left/right, in/out) using a screwdriver. Refer to hinge manufacturer's instructions if available.
Rattan panel appears damaged.	Physical impact or excessive moisture.	Minor fraying can sometimes be trimmed carefully. For significant damage, contact customer support for replacement parts or advice.
