Troubleshooting

Problem	Possible Cause	Solution
Desk is wobbly after assembly.	Loose fasteners; uneven floor.	Ensure all screws and bolts are fully tightened. Adjust desk levelers if present, or place shims under legs on uneven surfaces.
Drawers do not slide smoothly.	Incorrectly installed drawer slides; obstruction.	Review the assembly instructions for drawer slide installation. Check for any debris or obstructions in the slides.
Missing parts or damaged components.	Manufacturing error; shipping damage.	Do not proceed with assembly. Contact Vipbear customer service with your purchase details and a description of the missing/damaged parts.
Difficulty aligning parts during assembly.	Parts oriented incorrectly; pre-drilled holes not perfectly aligned.	Double-check the orientation of parts against the instruction diagrams. Apply gentle pressure or slightly loosen adjacent fasteners to aid alignment before fully tightening.
