5. MAINTENANCE AND CARE

5.1 Fabric Care (Linen)

- **Regular Cleaning:** Vacuum regularly using an upholstery attachment to remove dust and loose debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Do not rub, as this can spread the stain. For stubborn stains, use a mild fabric cleaner designed for linen, testing on an inconspicuous area first.

- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading. Position your sofa away from direct sunlight or use curtains/blinds.
- **Professional Cleaning:** For deep cleaning or significant stains, consider professional upholstery cleaning.

5.2 Cushion Care

- **Fluffing:** Regularly fluff and rotate seat and back cushions to maintain their shape and even out wear.
- **Vacuum-Packed Cushions:** Upon unpacking, cushions may appear compressed. Allow several days for them to fully expand and regain their intended shape. Gentle patting can assist this process.

5.3 Frame Care

- **Inspections:** Periodically check all bolts and screws to ensure they are tight. Retighten as necessary.
- **Avoid Moisture:** Keep the sofa away from excessive moisture to prevent damage to the wood frame.

6. TROUBLESHOOTING

- **Cushions appear wrinkled or misshapen:** Cushions are vacuum-packed for shipping. Allow 24-72 hours for them to fully expand. Gently pat and reshape them.
- **Pull-out bed is stiff or difficult to operate:** Ensure all assembly hardware for the pull-out mechanism is correctly installed and tightened. Check for any obstructions. Regular use may also help to loosen the mechanism over time.
- **Charging ports not working:** Verify that the sofa's power cord (if applicable) is securely plugged into a functional wall outlet. Check the connection of your device's cable to the port. Try a different device or cable to rule out device-specific issues.
- **Sofa feels unstable:** Recheck all assembly connections, especially those for the legs and frame. Ensure the sofa is placed on a flat, even surface.
