## WARSUN WT9PRO

# WARSUN T9PRO Pocket Flashlight Instruction Manual

Model: WT9PRO

## 1. PRODUCT OVERVIEW

---

The WARSUN T9PRO is a compact, rechargeable Everyday Carry (EDC) flashlight designed for versatility and reliability. It features a powerful main light, a broad floodlight, and a UV inspection light, making it suitable for various tasks from outdoor activities to detailed inspections. Its magnetic base and integrated clip enhance its utility for hands-free operation.

# MINI YET BRIGHT

**6-12** Hours  
Runtime

Image: The WARSUN T9PRO flashlight illuminating a path during a night walk, demonstrating its compact size and effective light output. Dimensions are shown as 4.64 inches long, 1.18 inches wide, and 0.63 inches thick, with a weight of 2.85 ounces.

## Key Features:

- **High Lumen Output:** Up to 1500 lumens in burst mode, 1000 lumens on high.
- **Compact Design:** Measures 4.65 × 1.18 × 0.63 inches and weighs 3.53 oz for easy portability.
- **Multiple Light Sources:** Main light (spotlight), side light (floodlight), and UV inspection light.
- **Magnetic Base:** Allows for hands-free attachment to metal surfaces.
- **Pocket Clip:** Securely attaches to pockets, backpacks, or belts.
- **Rechargeable:** Built-in battery with USB-C charging.
- **Durable Construction:** Aluminum alloy body.

## 2. SETUP

### What's in the Box:

- WARSUN T9PRO EDC Flashlight
- USB-C Charging Cable

- Lanyard

### Initial Charging:

Before first use, fully charge the flashlight. Connect the provided USB-C charging cable to the flashlight's charging port and to a standard USB power source (e.g., wall adapter, computer USB port). The charging indicator will glow blue during charging and turn solid blue when fully charged.

## 3. OPERATING INSTRUCTIONS

The WARSUN T9PRO features three independent switches for easy control of its various light functions.

### Main Light (Front Beam) Operation:

- **Turn On/Cycle Modes:** Press the Front Beam button (power symbol). Each press cycles through Low, Mid, High brightness levels.
- **Turbo Mode:** Double-click the Front Beam button for maximum brightness (1500 lumens). This mode is typically timed for 10 seconds to prevent overheating.
- **Strobe Mode:** Press and hold the Front Beam button to activate the strobe function.

- **Turn Off:** Press the Front Beam button after cycling through all modes, or press and hold for 1 second from any mode.

### Side Light (Flood Light) Operation:

- **Turn On/Cycle Modes:** Press the Sidelight button (sun symbol). Each press cycles through Low, Mid, High brightness levels.
- **Red Flash Mode:** Double-click the Sidelight button to activate the red flashing light, useful for roadside emergencies or signaling.
- **Turn Off:** Press the Sidelight button after cycling through all modes, or press and hold for 1 second from any mode.

### UV Light (Inspection Light) Operation:

- **Turn On/Off:** Press the UV button (UV symbol) to activate or deactivate the 365nm UV light.
- **Applications:** Ideal for detecting fluorescent agents, verifying currency, inspecting pet stains, or observing minerals.

## 4. MAINTENANCE

---

### Cleaning:

Wipe the flashlight body with a soft, damp cloth. Avoid using abrasive cleaners or solvents that could damage the finish or internal components. Keep the lens clean for optimal light output.

### Battery Care:

- To prolong battery life, recharge the flashlight regularly, even if not in frequent use.
- Avoid completely draining the battery before recharging.
- Store the flashlight in a cool, dry place when not in use for extended periods.

### Durability:

The WARSUN T9PRO is constructed from durable aluminum alloy and is designed to withstand heavy pressure and rough outdoor conditions. It is water-resistant, making it suitable for use in various weather conditions.

## 5. TROUBLESHOOTING

---

### Flashlight Not Turning On:

- Ensure the battery is charged. Connect the flashlight to a power source using the USB-C cable and check the charging indicator.
- Verify that the buttons are pressed correctly according to the operating instructions.

### Dim Light Output:

- The battery level may be low. Recharge the flashlight.
- The lens might be dirty. Clean the lens with a soft cloth.

### Charging Issues:

- Ensure the USB-C cable is securely connected to both the flashlight and the power source.
- Try a different USB-C cable or power adapter to rule out faulty accessories.
- Confirm the power source is active and providing sufficient power.

If these steps do not resolve the issue, please refer to the Warranty & Support section for further assistance.
