2. SAFETY INSTRUCTIONS

To prevent injury to the user or others and property damage, the following instructions must be followed. Incorrect operation due to ignoring instructions may cause harm or damage.

- Always place the dehumidifier on a stable, level surface to prevent tipping.
- Ensure adequate ventilation around the unit. Do not block the air inlet or outlet. Maintain at least 8 inches (20 cm) of space from walls or other objects.
- Do not operate the unit near water sources such as bathtubs, showers, or swimming pools to avoid electrical shock.
- Unplug the dehumidifier from the power outlet before cleaning, performing maintenance, or when not in use for extended periods.
- Do not operate the unit if the power cord or plug is damaged. Contact customer support for assistance.
- Keep the appliance out of reach of children and pets.

- Do not insert fingers or foreign objects into the air inlet or outlet.
- Use only the power adapter provided with the unit.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your dehumidifier.

Emptying the Water Tank

- Empty the water tank regularly, especially when the auto shut-off indicator is active.
- Clean the water tank with mild soap and water every few weeks to prevent mold and mildew growth. Rinse thoroughly before reinserting.

Cleaning the Exterior

- Wipe the exterior of the unit with a soft, damp cloth. Do not use abrasive cleaners or solvents.

Cleaning Air Inlets and Outlets

- Periodically check the air inlets and outlets for dust or debris. Use a soft brush or vacuum cleaner attachment to gently remove any blockages.

7. TROUBLESHOOTING

If you encounter issues with your dehumidifier, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not turn on	No power supply; Water tank not properly inserted.	Check power cord connection; Ensure water tank is securely in place.
No water collected	Ambient humidity is too low; Air inlets/outlets are blocked.	The unit may not collect water if humidity is below 40%; Clear any obstructions from air vents.
Unit is noisy	Unit not on a stable surface; Fan obstruction.	Place on a flat, stable surface; Check for and remove any foreign objects near the fan.
Water tank full indicator is on, but tank is not full	Water tank not properly seated.	Remove and reinsert the water tank, ensuring it is securely in place.

If the problem persists after trying these solutions, please contact customer support.
