Dr Trust 314

Dr Trust USA 314 Aquacare Oral Irrigator User Manual

Model: 314

Introduction

The Dr Trust USA 314 Aquacare Oral Irrigator is designed to enhance your daily oral hygiene routine. This portable cordless water flosser utilizes high-pressure pulsed water technology to effectively remove plaque, bacteria, and food particles from areas brushing alone cannot reach. It is suitable for individuals seeking improved gum health, cleaner teeth, and fresher breath, including those with braces, implants, or sensitive gums.
Regular use of this device contributes to preventing gum inflammation, cavities, and plaque buildup, supporting overall oral health.

Product Overview and Features

The Dr Trust USA 314 Aquacare Oral Irrigator incorporates several features for effective and convenient oral care:

- **Powerful Pulsed Water Technology:** Generates 1400–1600 high-pressure water pulses per minute for deep cleaning.
- **4 Cleaning Modes:** Offers Soft, Normal, Pulse, and Power modes for personalized oral care.
- **Smart Memory Function:** Automatically starts in the last used cleaning mode.
- **360° Rotatable Nozzle:** Allows easy access to all areas of the mouth, including molars, braces, and gum lines.
- **Large 300 ml Water Tank:** Provides sufficient capacity for uninterrupted flossing.
- **Rechargeable Cordless Design:** Features a 1500 mAh lithium battery for portability and long-lasting performance.
- **IPX7 Waterproof Protection:** Ensures safe use in bathroom environments.
- **Low-Noise Operation:** Designed for quiet use.
- **Ergonomic Handle:** Non-slip design for comfortable grip.

Image: Illustration of the internal piston pump and copper motor, emphasizing the device's powerful performance and consistent high-pressure pulses (1400-1600 pulses/min).

Setup

1. **Initial Charge:** Before first use, fully charge the device. Connect the Type-C charging cable to the irrigator and a suitable USB power source (e.g., power bank, laptop, USB adapter, car charger). The charging indicator will show progress.
2. **Attach Nozzle:** Insert the desired jet tip into the opening at the top of the irrigator until it clicks into place. Ensure it is securely fastened.
3. **Fill Water Tank:** Open the water tank cover located at the back of the device. Fill the 300 ml tank with lukewarm water. Close the cover tightly to prevent leakage. Filtered water is recommended to maintain the tool in good condition.

Operating Instructions

1. **Select Mode:** Press the "Mode" button to cycle through the four cleaning modes:
    - **Soft Mode:** Gentle cleaning for sensitive teeth and first-time users.
    - **Normal Mode:** Standard daily plaque removal and oral freshness.
    - **Pulse Mode:** Deep cleaning with gentle gum massage.
    - **Power Mode:** Intensive cleaning for braces, implants, and tight gaps.

    The smart memory function will recall the last used mode for convenience.
2. **Positioning:** Lean over a sink and place the jet tip into your mouth. Close your lips slightly around the tip to prevent splashing, but allow water to flow from your mouth into the sink.
3. **Start Flossing:** Press the "On/Off" button to start the water flow. Direct the water stream at a 90-degree angle to

your gumline. Move the tip along the gumline, pausing briefly between teeth.

4. **Floss All Areas:** Systematically clean all areas of your mouth, including the front and back of both upper and lower teeth. Utilize the 360° rotatable nozzle to reach difficult areas.
5. **Finish:** When finished, press the "On/Off" button to stop the device. Open your mouth and remove the tip. Empty any remaining water from the tank.

Important Note: Always place the tip in your mouth and close your lips before turning the device on to avoid splashing. Turn the device off before removing it from your mouth.

Maintenance

Cleaning the Water Tank

1. After each use, empty any remaining water from the 300 ml detachable water tank.
2. To clean, detach the tank from the main unit. Rinse the tank thoroughly with clean water.
3. Allow the tank to air dry completely before reattaching or storing.

Cleaning the Nozzle

- Remove the jet tip from the irrigator.
- Rinse the tip under running water.
- Replace the tip when it shows signs of wear or every 3-6 months for optimal hygiene.

Charging

- When the battery indicator shows low power, connect the device to the Type-C charging cable.
- Ensure the charging port cover is closed tightly after charging to maintain IPX7 waterproof protection.

Image: Demonstrates the easy-to-clean 300ml water tank, showing how to open and fill it. Also highlights the IPX7 waterproof rating, indicating safe use in wet environments like a bathroom shower.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not turn on.	Low battery or device not charged.	Charge the device fully using the provided Type-C cable.
Weak water pressure.	Water tank is empty or low. Nozzle is clogged.	Refill the water tank. Remove and clean the nozzle. Ensure the correct mode is selected.
Water leakage.	Water tank cover not closed properly. Nozzle not securely attached.	Ensure the water tank cover is tightly sealed. Re-insert the nozzle until it clicks.

Problem	Possible Cause	Solution
Device stops unexpectedly.	Battery is depleted.	Recharge the device.
