## MAINTENANCE

- **Cleaning:** Wipe the metal surfaces with a damp cloth for general cleaning. For a thorough clean, follow with a dry cloth to prevent moisture buildup.

- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or harsh chemicals, as these can damage the finish of the metal.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose fasteners. Uneven floor surface.	Ensure all screws and bolts are securely tightened. Move the bed frame to a level surface or use shims under legs if necessary.
Squeaking noises.	Loose connections. Metal-on-metal friction.	Re-tighten all assembly hardware. Apply a small amount of lubricant (e.g., silicone spray) to connection points if squeaking persists. Ensure mattress is properly seated.
Mattress slides on the frame.	Lack of mattress retainer.	Consider purchasing mattress retainer clips or a non-slip mat to place between the mattress and the slats.
