## ASSEMBLY INSTRUCTIONS

---

Assembly typically takes approximately 30 minutes. It is recommended to have a clear, spacious area for assembly and to follow the steps sequentially.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface to prevent scratches. Verify all parts against the package contents list.
2. **Assemble Desk Frame:** Attach the desk legs to the crossbar components using the provided hardware. Ensure all screws are tightened securely.
3. **Attach Desktop Panels:** Place the two desktop panels onto the assembled frame. Align them carefully and secure them with the designated screws. Pay attention to aligning the panels to minimize any seam.
4. **Install Control Panel:** Mount the control panel to the underside of the desktop in the designated location.
5. **Install Power Outlet Strip:** Secure the built-in power outlet strip to the desktop as indicated in the instructions.
6. **Connect Wiring:** Connect the motor, control panel, and power outlet strip to the main power unit according to the wiring diagram. Ensure all connections are firm.
7. **Attach Accessories:** Install the headphone hooks and adjustable feet. Adjust the feet to ensure the desk is level and stable.
8. **Initial Power-Up:** Plug the desk into a wall outlet. The digital display should light up.

## MAINTENANCE AND CARE

Proper maintenance ensures the longevity and optimal performance of your Huuger Electric Standing Desk.

- **Cleaning:** Wipe the desk surface and frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Cable Management:** Periodically check and organize cables to prevent tangling or damage, especially during height adjustments.
- **Motor Care:** The motor is designed for durability. Avoid continuous operation for extended periods without rest. If

the motor feels hot, allow it to cool down.

- **Stability Check:** Regularly check that all screws and connections are tight. Adjust the leveling feet if the desk feels wobbly.
- **Avoid Spills:** While the desk is durable, avoid spilling liquids directly onto the control panel or power outlets.

## TROUBLESHOOTING

If you encounter issues with your desk, refer to the following common problems and solutions:

| Problem                                                   | Possible Cause                                                                            | Solution                                                                                                                                                                                                                             |
|-----------------------------------------------------------|-------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Desk does not move or respond to buttons.                 | Power cable disconnected; Motor/control panel cable loose; Overload protection activated. | Check all power connections. Unplug and re-plug the desk. Reduce weight on the desk. Wait 20 minutes for overload protection to reset.                                                                                               |
| Desk moves unevenly or makes unusual noise.               | Uneven load; Loose connections; Obstruction.                                              | Ensure weight is evenly distributed. Check all assembly screws. Remove any obstructions.                                                                                                                                             |
| Digital display shows an error code (e.g., 'E01', 'RST'). | System error; Reset required.                                                             | Perform a reset: Press and hold the 'Down' button until the desk reaches its lowest point, then release. Press and hold 'Down' again until 'RST' appears and the desk moves slightly, then stops. This indicates a successful reset. |
| Anti-collision system frequently activates.               | Obstruction in path; Sensitivity setting.                                                 | Clear any objects from the desk's path. Refer to the full manual (if provided separately) for instructions on adjusting anti-collision sensitivity, if available.                                                                    |
