PawHut Catio Outdoor Cat Enclosure Instruction Manual

Brand: PawHut

Model: D32-051V00LG

INTRODUCTION

This manual provides instructions for the assembly, operation, and maintenance of your PawHut Catio Outdoor Cat Enclosure (Model D32-051V00LG). This enclosure is designed to provide a safe and stimulating outdoor environment for your cats, featuring multiple levels, a scratching post, and weather protection. Please read all instructions carefully before assembly and use to ensure proper installation and safety.

SAFETY INFORMATION

- Ensure all parts are present and undamaged before assembly.
- This catio is designed to be wall-mounted. It does not have a back panel and requires secure anchoring to a stable wall to prevent tipping and ensure structural integrity.
- Do not exceed the platform weight capacity of 22 lbs (10 kg) per platform.
- Regularly inspect the enclosure for any loose parts, damage, or wear, especially the mesh and latches.
- Keep small children away from the assembly area.

SETUP AND ASSEMBLY

The PawHut Catio is designed for straightforward assembly. It is recommended to have at least two people for assembly, though one person can complete it in approximately one hour. Follow the included graphical instructions for detailed steps.

1. **Unpack Components:** Carefully unpack all parts and hardware. Verify that all components listed in the parts list are present and undamaged.
2. **Assemble Frame:** Begin by assembling the main wooden frame sections according to the diagram. Ensure all screws are tightened securely.
3. **Install Mesh Panels:** Attach the galvanized mesh panels to the frame. Ensure the mesh is taut and securely fastened to prevent gaps.
4. **Attach Roof:** Secure the clear waterproof roof to the top frame.

5. **Install Platforms and Scratching Post:** Position and secure the three jumping platforms and the sisal scratching post within the enclosure as shown in the diagrams. Ensure platforms are level and stable.
6. **Mount to Wall:** This catio must be securely anchored to a stable exterior wall. Use appropriate hardware (not always included) for your wall type to attach the back of the catio to the wall. This step is crucial for stability and safety.
7. **Add Artificial Turf:** Place the soft artificial turf on the designated floor and platform areas for comfort.

OPERATING INSTRUCTIONS

Once assembled and securely mounted, the PawHut Catio provides a safe outdoor space for your cats.

- **Access:** Use the large main door for easy access to the entire enclosure. A smaller access door is also provided for convenience in specific areas. Ensure all doors are securely latched when cats are inside.
- **Indoor-Outdoor Connection:** If positioned against a window, allow your cats to transition freely between your home and the catio for sunbathing and exploration.
- **Dual-Level Use:** The catio features a dual-level layout. The upper area is suitable for play and relaxation on platforms, while the lower area can accommodate litter boxes and feeding stations, promoting a cleaner environment.
- **Scratching Post:** Encourage your cats to use the integrated scratching post to satisfy their natural instincts and help maintain claw health.

EASY ACCESS & CLEANING

Makes feeding and daily maintenance convenient

MAINTENANCE

Regular maintenance will extend the life of your catio and ensure a clean environment for your pets.

- **Cleaning:** The large and small access doors facilitate easy cleaning. Wipe down wooden surfaces with a damp cloth. The galvanized mesh can be cleaned with mild soap and water.
- **Roof Care:** The clear waterproof roof should be kept free of debris to maintain its effectiveness.
- **Inspection:** Periodically check all screws, bolts, and latches to ensure they are tight and secure. Inspect the mesh for any signs of damage or rust. Replace any worn or damaged parts promptly.

- **Wood Protection:** Although the fir wood is treated with water-based paint, consider applying a pet-safe wood sealant annually to further protect against weather elements, especially if exposed to harsh conditions.

ALL-WEATHER PROTECTION

Offers a comfortable shelter in any season

Waterproof Roof

Robust Fir Wood

Galvanized Mesh

Figure 6: The waterproof roof provides protection from rain and other elements.

TROUBLESHOOTING

- **Catio feels unstable or wobbly:** Ensure the catio is securely anchored to a stable wall using appropriate mounting hardware. This unit is designed to be wall-mounted and relies on this for full stability. Re-check all assembly screws for tightness.
- **Doors do not latch securely:** Inspect the latch mechanisms for any obstructions or misalignment. Adjust or tighten screws if necessary. If latches are flimsy, consider replacing them with more durable alternatives for enhanced security.
- **Water pooling inside:** Verify that the waterproof roof is correctly installed and free of cracks or gaps. Ensure the catio is level to allow for proper water runoff.
- **Cats not using the catio:** Introduce cats gradually. Place familiar items like toys, blankets, or treats inside. Ensure there is easy access from your home if connected to a window.

SPECIFICATIONS

Model Number	D32-051V00LG
Product Dimensions (D x W x H)	23.2" x 74.4" x 77.4" (59 cm x 189 cm x 196.5 cm)
Item Weight	58 lbs (26.3 kg)
Material	Fir Wood, Metal (Galvanized Mesh)
Color	Light Gray
Platform Capacity	Up to 22 lbs (10 kg) per platform
Assembly Required	Yes
