LocoLee 11376

LocoLee Light Kit for LEGO 11376 Ford Model T (RC Version) Instruction Manual

INTRODUCTION

This manual provides instructions for installing and operating the LocoLee LED lighting kit designed for the LEGO 11376 Ford Model T building set. This product is an accessory light kit only; the LEGO model is not included and must be purchased separately or already owned.

The RC (Remote Control) version of this light kit allows for remote adjustment of lighting functions.

Safety Information

To ensure safe use of this product, please observe the following:

- This product contains small parts. Keep out of reach of small children to prevent accidental ingestion.
- The light kit operates on low voltage (less than 5V). Use only with a compatible USB power source.
- Do not pull wires excessively during installation to avoid damage.

Package Contents

Verify that all components listed below are present in your package:

- Instruction Manual (online access)
- Light set components (various LED lights, connecting cables, expansion boards, power supply, remote control)

Model Shown For Display Only – Not For Sale

SETUP AND INSTALLATION

Follow these steps to install your LocoLee light kit:

1. **Online Instructions:** Access the detailed video or PDF installation instructions online. A QR code or URL for these instructions is typically provided with the product packaging.
2. **Pre-Assembly Test:** Before integrating into the model, test each light component to ensure it functions correctly.
3. **Disassembly:** Carefully disassemble only the necessary bricks of your LEGO 11376 Ford Model T to allow for light fixture placement. Refer to the online instructions for specific areas.
4. **Wire Management:** Route the connecting cables carefully. Ensure wires are not pinched or pulled too hard, as they are small and delicate.
5. **Power Connection:** Connect the light kit to a USB power source. The lights are designed to operate with a voltage less than 5V.

OPERATING INSTRUCTIONS

This RC (Remote Control) version allows for convenient operation of your light kit:

- **Power On/Off:** Use the remote control to switch the lights on or off.
- **Brightness Adjustment:** The remote allows you to adjust the brightness levels of the installed lights.
- **Frequency Control:** Adjust the flashing frequency across different lighting zones, if applicable.

MAINTENANCE

To ensure the longevity and optimal performance of your light kit:

- Keep the light kit and model free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the kit to excessive moisture or extreme temperatures.
- Periodically check wire connections to ensure they are secure.

TROUBLESHOOTING

If you encounter issues with your light kit, consider the following:

- **Lights Not Working:**
 - Ensure the USB power source is connected and functioning.
 - Check all cable connections for proper seating.
 - Verify that the remote control has working batteries and is pointed towards the receiver.
- **Dim Lights:**

- Confirm the power source provides sufficient power (less than 5V).
- Adjust brightness settings using the remote control.
- **Damaged Wires:** If wires are damaged, contact customer support for replacement parts. Do not attempt to repair damaged wires yourself.
