## BaBylissPRO BNTSSSW-4PK-SL

# BaBylissPRO The Style/Switch 5-in-1 Air Styling and Drying System User Manual

Model: BNTSSSW-4PK-SL

## INTRODUCTION

---

This manual provides instructions for the safe and effective use of your BaBylissPRO The Style/Switch 5-in-1 Air Styling and Drying System. Please read all instructions carefully before use and retain this manual for future reference.

The BaBylissPRO Style/Switch is an ionic lightweight multi-styler designed to dry, curl, and straighten hair. It features Nano Titanium technology to reduce frizz and enhance shine, offering versatile styling options for straight and wavy hair types.

## PRODUCT OVERVIEW

---

The BaBylissPRO Style/Switch system includes a main styling unit and multiple interchangeable attachments, along with accessories, to achieve various hairstyles.

# ELEVATED & EFFORTLESSLY PREMIUM

Since 1961, we've created tools that allow styling to become second nature — inspiring you to make the runway feel like any day.

## Key Features:

- **5-in-1 Versatility:** Dries, curls, and straightens hair with interchangeable attachments.
- **Nano Titanium Technology:** Helps reduce frizz and promotes shine.
- **Adjustable Settings:** Features 3 airflow settings and a cool shot function for customized styling.
- **Lightweight Design:** Ergonomic handle and 2 lb weight for comfortable use.
- **Dual Voltage:** Supports worldwide use for travel.
- **360° Swivel Cord:** 9 ft cord for flexible styling.

## SETUP

### Unboxing and Initial Inspection

1. Carefully remove all components from the packaging.
2. Inspect the styling system and all attachments for any signs of damage. Do not use if damaged.

3. Ensure all included components are present: main multi-styler unit, 1.5-inch bidirectional air-curling barrels (2), 1.75-inch round brush, paddle brush, concentrator, sectioning comb, 4 creaseless clips, and soft storage case.

## Attaching Accessories

To attach an accessory, align the attachment with the main unit and push firmly until it clicks into place. To remove, hold the release button on the main unit and twist the attachment to unlock and pull off.

## Power Connection

Plug the power cord into a standard electrical outlet (125 Volts). The unit is dual voltage for international use, but an adapter may be required for different plug types.

## OPERATING INSTRUCTIONS

---

Always ensure your hair is clean and towel-dried before styling. For best results, hair should be about 80% dry when using curling attachments.

### Powering On and Adjusting Settings

1. Press the power button to turn on the device.
2. Use the airflow and heat setting buttons to select your desired intensity. The device offers 3 airflow settings.
3. The digital display provides an at-a-glance reading of your selected settings.
4. Utilize the cool shot function to set your style with a burst of cool air.

Video: Demonstrates the various heat and airflow settings on the BaBylissPRO Style/Switch unit for controlled drying and styling.

### Using the Attachments

The system includes several attachments for different styling needs:

- **Concentrator:** Use for targeted drying, especially when rough-drying roots to about 80% dry before styling with other attachments.
- **1.5-inch Bidirectional Air-Curling Barrels:**  
These barrels automatically wrap hair to create soft blowout curls. Prep hair with mousse and heat protectant.

Take 1-inch sections of hair and hold them near the barrel, allowing the airflow to wrap the hair. Pin curls to cool and set for longer-lasting results.

Video: Demonstrates how to use the air-curling barrels to create relaxed blowout curls.

- **1.75-inch Round Brush:**

Ideal for adding root lift and volume, and for smoothing hair. Place the brush beneath each hair section and glide through, brushing up and out from the roots to create lift. Twist through the ends for soft shape and definition.

Video: Demonstrates the use of the round brush attachment for root lift and volume.

- **Paddle Brush:**

Use for smoothing and detangling hair while drying, creating sleek, straight styles. Glide the brush through sections of hair from roots to ends.

## Styling Tips

- For longer-lasting curls, prep hair with mousse and heat protectant. Pin curls while they cool before finishing with hairspray.
- Section hair using the included sectioning comb and creaseless clips for easier and more precise styling.
- Always start with slightly damp hair when using the air-curling barrels for optimal results.

### HOW TO HOLD YOUR CURL

- 1** Start with damp hair and use Concentrator attachment to rough dry roots until hair is about 80% dry.
- 2** Switch to Air Curler attachment and use included creaseless clips to divide hair into manageable sections.
- 3** Prep hair with mousse and heat protectant and begin shaping curls, working through each section slowly to ensure even styling.
- 4** Pin curls to cool and set, then finish with hairspray for a look that lasts.

Image: A visual guide demonstrating four steps to hold curls: 1. Start with damp hair and concentrator, 2. Switch to air curler and section hair, 3. Prep hair and shape curls, 4. Pin curls to cool and finish with hairspray.

## MAINTENANCE

### Cleaning

1. Always unplug the appliance and allow it to cool completely before cleaning.
2. The air intake has a removable filter. Regularly clean the filter to prevent hair and dust buildup, which can affect performance.
3. Wipe the main unit and attachments with a damp cloth. Do not immerse the unit in water or any other liquid.
4. Remove any hair buildup from the brushes and barrels using a comb or brush cleaner.

## Storage

Store the styling system and its attachments in the provided soft storage case when not in use. This protects the components and keeps them organized, especially for travel.

## TROUBLESHOOTING

---

- **Device not turning on:** Ensure the power cord is securely plugged into a functional electrical outlet. Check for any tripped circuit breakers.
- **Attachments not staying on:** Ensure the attachment is properly aligned and pushed firmly until it clicks into place. The release button should not be pressed during attachment.
- **Reduced airflow or heating:** Check the air intake filter for blockages and clean if necessary. Ensure the air vents are clear of debris.
- **Hair frizzes after styling:** Ensure hair is adequately prepped with heat protectant. Adjust heat and airflow settings to suit your hair type. Nano Titanium technology is designed to reduce frizz, but excessive heat or improper technique can still cause it.
- **Curls not holding:** Ensure hair is not too wet when curling. Use styling products like mousse for hold. Pin curls to cool completely before releasing.

## SPECIFICATIONS

---

Feature	Detail
Model Number	BNTSSSW-4PK-SL
Product Dimensions	1.75 x 2 x 8 inches
Item Weight	2 Pounds
Wattage	1250 watts
Voltage	125 Volts
Power Source	Corded Electric
Hair Type Compatibility	All (optimized for Straight and Wavy Hair Types)
