7. Troubleshooting

Problem	Possible Cause	Solution
Screws do not go in easily during assembly.	Misalignment of parts or pilot holes.	Ensure parts are correctly aligned before attempting to insert screws. Apply gentle, even pressure. If resistance is met, slightly adjust the angle or position of the component. Do not force screws.

Problem	Possible Cause	Solution
Sofa sections feel loose or unstable.	U-shaped connectors not fully engaged or screws loose.	Check that all U-shaped connectors between sections are fully inserted and locked. Retighten any loose screws on the sofa legs or frame connections.
Cushions appear flat or lose shape.	Normal compression over time.	Regularly fluff and rotate seat and back cushions to restore their loft and distribute wear evenly.
