Aoxun G30067-0808BE

Aoxun 8x8 Gazebo Instruction Manual

Model: G30067-0808BE

INTRODUCTION

This manual provides essential instructions for the assembly, operation, and maintenance of your Aoxun 8x8 Gazebo. Please read this manual thoroughly before installation and use to ensure proper setup and safe operation. Retain this manual for future reference.

The Aoxun 8x8 Gazebo features a double roof for enhanced ventilation, full-perimeter mosquito netting, and a heavy-duty frame designed for outdoor use. It is intended to provide shade and protection from insects in various outdoor settings.

SAFETY INFORMATION

WARNING:

- This gazebo is designed to withstand Level 7 winds but requires proper anchoring for safety. Always install the included expansion bolts, wind ropes, and ground stakes to secure the structure, especially during high-wind conditions. Failure to properly anchor the shelter may result in tipping or structural failure.
- Do not exceed the maximum weight capacity of 250 lbs.
- Ensure the shelter is set up on level ground.
- Keep away from open flames or heat sources due to the fabric material.
- This model of gazebo does not come with curtains. It only has the netting configuration.

SETUP AND ASSEMBLY

The Aoxun 8x8 Gazebo comes with a complete installation kit. Assembly typically requires two people for optimal ease and safety.

Included Components:

- Powder-coated steel frame components (50*50mm legs)
- 160g PU-coated polyester fabric roof
- Full-perimeter mosquito netting with Velcro-sealed edges
- 4 spiral ground stakes
- 8 short stakes

- 8 expansion bolts
- 4 wind ropes
- 1 S-hook
- Reinforced D-rings on all four corners

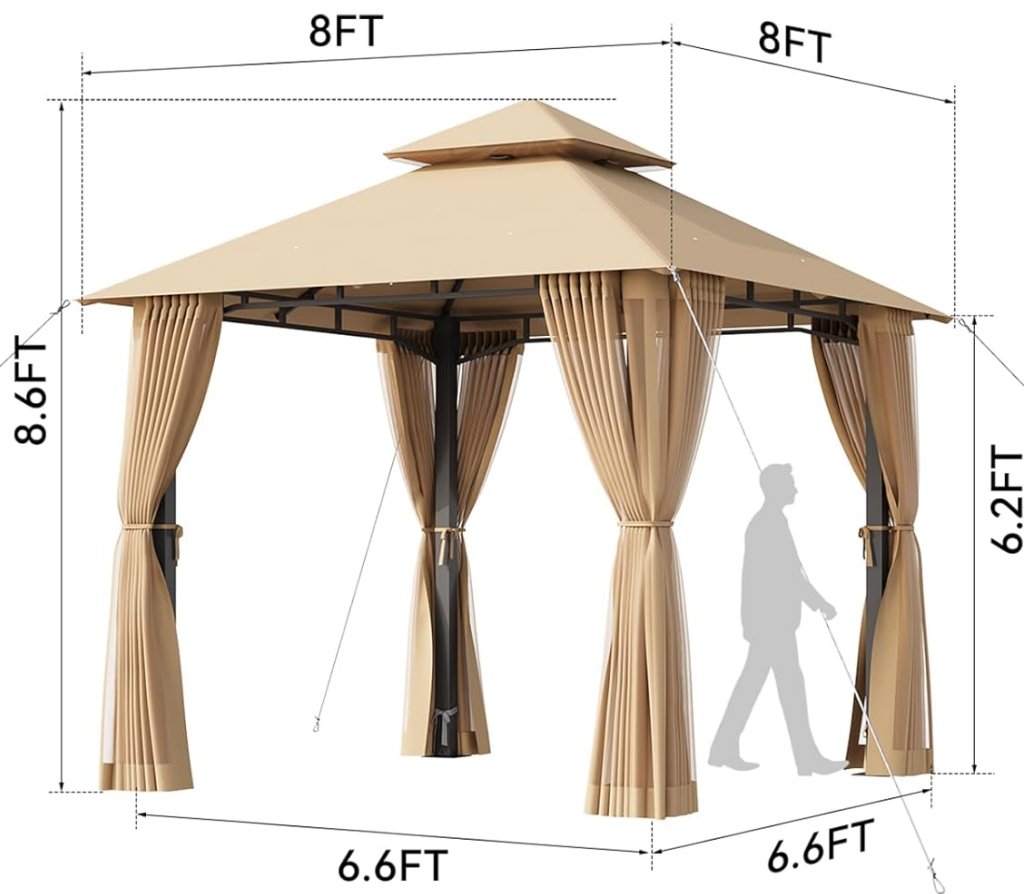

Assembly Steps:

1. **Unpack and Identify Parts:** Carefully unpack all components and verify against the parts list in the separate assembly guide. Ensure all pieces are present and undamaged.
2. **Assemble Frame:** Follow the detailed diagrams in the assembly guide to connect the steel frame components. Pay close attention to the orientation of each piece.
3. **Install Roof Fabric:** Drape the polyester fabric roof over the assembled frame. Ensure the double roof sections are correctly aligned for proper ventilation and water drainage.
4. **Attach Mosquito Netting:** Secure the full-perimeter mosquito netting to the frame using the integrated Velcro fasteners. Ensure the top ventilation duct also has its mosquito-proof net attached.
5. **Anchor the Gazebo:** This is a critical step for stability. Use the provided 8 expansion bolts for concrete surfaces, or the 4 spiral ground stakes and 8 short stakes for soft ground. Attach the 4 wind ropes to the reinforced D-rings on the corners and secure them to the ground using stakes.
6. **Final Checks:** Inspect all connections to ensure they are tight and secure. Verify the gazebo is level and stable.

OPERATING INSTRUCTIONS

Weather Protection:

- **Wind Resistance:** The robust structure with 50*50mm powder-coated steel legs and proper anchoring (expansion bolts, wind ropes, D-rings) allows the gazebo to withstand Level 7 winds (up to 38 mph). Always ensure all anchoring mechanisms are correctly installed and maintained.
- **Water Drainage:** The dual-layer roof design includes 8 dedicated leakage holes to prevent water accumulation, reduce fabric stress, and extend the canopy's lifespan. This quick-drain feature ensures the gazebo remains functional during rain.
- **Sun Protection:** The 160g PU-coated polyester fabric offers UPF 50+ sun protection, blocking harmful UV rays and providing reliable water resistance.

Insect Protection and Ventilation:

- **Mosquito Netting:** The full-perimeter fine mesh netting with Velcro-sealed edges effectively keeps insects out while allowing air circulation. The top ventilation duct is also equipped with a mosquito-proof net for comprehensive protection.
- **Ventilated Double Roof:** The dual-layer roof design promotes airflow, reducing heat buildup and enhancing comfort within the gazebo.

Customization:

- **Accessory Hooks:** The top hooks allow for hanging lights or a fan, enhancing the usability and comfort of your outdoor living space.
- **Decoration Hanging:** Four corner rings are provided for hanging decorations.

MAINTENANCE

- **Cleaning Fabric:** The PU-coated polyester fabric is quick-drying and tear-resistant. Clean the canopy and netting periodically with mild soap and water. Rinse thoroughly and allow to air dry completely before storage or prolonged non-use. Do not use harsh chemicals or abrasive cleaners.
- **Frame Care:** Inspect the powder-coated steel frame regularly for any signs of rust or damage. Clean the frame with a damp cloth. If scratches occur, touch up with rust-inhibiting paint to prevent corrosion.
- **Anchoring Inspection:** Periodically check the tightness of all expansion bolts, ground stakes, and wind ropes. Re-secure as necessary to maintain stability.
- **Seasonal Storage:** In regions with severe weather conditions (heavy snow, extreme winds), it is recommended to disassemble and store the gazebo indoors to prolong its lifespan.

TROUBLESHOOTING

- **Gazebo feels unstable:** Ensure all frame connections are tight and that the gazebo is properly anchored using all provided expansion bolts, ground stakes, and wind ropes. Verify installation on level ground.
- **Water pooling on roof:** Check that the roof fabric is correctly installed and taut, allowing water to flow towards the drainage holes. Ensure the drainage holes are clear of debris.
- **Insects entering:** Verify that the mosquito netting is fully zipped and all Velcro seals are properly closed. Check the top ventilation duct netting for any gaps.
- **Difficulty with assembly:** Refer back to the detailed assembly guide. Ensure all parts are correctly identified and oriented. Assembly is easier with two people.

SPECIFICATIONS

Feature	Detail
Brand	Aoxun
Model Number	G30067-0808BE
Material	Metal (Frame), 160g PU-coated Polyester (Canopy)
Color	Light Beige
Item Weight	70.55 Pounds
Dimensions (L x W x H)	96"L x 96"W x 102"H (8ft x 8ft x 8.5ft)
Floor Area	64 Square Feet
UV Protection	UPF 50+
Water Resistance Level	Waterproof
Wind Resistance	Rated to withstand Level 7 winds (up to 38 mph)
Assembly Required	Yes

WARRANTY AND SUPPORT

Aoxun offers a 30-day easy return policy for this product. For specific warranty details, claims, or technical support, please contact Aoxun customer service directly. Contact information can typically be found on the product packaging or the official Aoxun website.

Please have your model number (G30067-0808BE) and purchase date available when contacting support.
