

FUNSICLE 16839

FUNSICLE Round Tubular Pool Instruction Manual

MODEL: 16839

Brand: FUNSICLE

Introduction

This manual provides essential instructions for the safe setup, operation, and maintenance of your FUNSICLE Round Tubular Pool, Model 16839. Please read this document thoroughly before beginning assembly or using the pool. Proper installation and care will ensure a long lifespan for your pool and a safe swimming experience.

Safety Information

WARNING: Failure to follow these safety instructions can result in serious injury or death.

- Adult supervision is required at all times when children are in or near the pool.
- Do not dive or jump into the pool. The water depth is not sufficient for diving.
- Ensure all safety devices, such as the safety ladder and pool cover, are properly installed and functioning. After swimming, replace your safety devices and ensure they are functioning correctly.
- Keep children away from the pool when it is not in use.
- Do not allow running or rough play around the pool area.
- Keep electrical devices away from the pool.
- Regularly check the pool structure for any signs of damage or wear.
- Maintain proper water chemistry to prevent health issues.

Package Contents

Verify that all components listed below are present in your package before beginning assembly. If any parts are missing or damaged, contact customer support.

- FUNSICLE Round Tubular Pool Liner (Brown Woven Design)
- Durable Steel Frame Components
- RX1000 Cartridge Filter Pump
- Type C Filter Cartridge
- Safety Ladder

- Maintenance Kit (includes surface skimmer, bottom skimmer, telescopic pole)
- Protective Pool Cover
- Ground Mat

Setup Instructions

The FUNSICLE Round Tubular Pool is designed for quick and easy assembly without the need for special tools. Follow these general steps for installation:

1. **Site Selection:** Choose a firm, level surface free from sharp objects, debris, or overhead obstructions. The area should be large enough to accommodate the pool and provide adequate space around it for safe access.
2. **Ground Preparation:** Lay down the included ground mat on the selected site. Ensure the surface is completely flat and stable.
3. **Frame Assembly:** Unpack all frame components. Follow the diagrams in the separate assembly guide (if provided) to connect the steel tubes and connectors. Ensure all connections are secure.
4. **Liner Installation:** Carefully spread the pool liner inside the assembled frame. Ensure the drain plug is accessible and closed. Smooth out any wrinkles in the bottom of the liner.
5. **Filling the Pool:** Begin filling the pool with water. As the water level rises, continue to smooth out wrinkles from the center outwards. Stop filling when the water reaches the recommended fill line.
6. **Filter Pump Connection:** Connect the RX1000 cartridge filter pump according to its specific instructions. Ensure all hoses are securely attached and clamps are tightened.
7. **Ladder Assembly:** Assemble the safety ladder as per its instructions and place it securely against the pool wall.

Operating Instructions

- **Filter Pump Operation:** Operate the RX1000 cartridge filter pump daily for several hours to ensure proper water circulation and filtration. Refer to the filter pump manual for specific operating times based on pool usage and water conditions.
- **Water Chemistry:** Regularly test the pool water for pH, chlorine, and alkalinity levels using a pool test kit. Adjust chemicals as needed to maintain balanced water, which is crucial for swimmer safety and pool longevity.
- **Skimming:** Use the included surface skimmer to remove leaves, insects, and other debris from the water surface daily.
- **Pool Cover:** Use the protective pool cover when the pool is not in use to prevent debris from entering the water and to reduce water evaporation.

Maintenance

- **Filter Cartridge Cleaning/Replacement:** The Type C filter cartridge should be rinsed with a garden hose every few days and replaced every 2-4 weeks, depending on pool usage and water quality. A dirty filter reduces pump efficiency.

- **Liner Cleaning:** Use the bottom skimmer and telescopic pole to vacuum or brush the pool floor and walls as needed to remove settled debris and algae.
- **Water Level:** Ensure the water level is maintained between the minimum and maximum fill lines. Evaporation and splash-out can reduce the water level.
- **Winterization:** Before freezing temperatures arrive, drain the pool completely. Clean and dry all components thoroughly. Store the liner, frame, pump, and accessories in a dry, protected area to prevent damage.

Troubleshooting

This section addresses common issues you might encounter. For more complex problems, consult the filter pump manual or contact customer support.

- **Cloudy Water:**
 - Check and clean/replace the filter cartridge.
 - Test water chemistry and adjust chlorine/pH levels.
 - Ensure the filter pump is running for sufficient hours daily.
- **Pump Not Circulating Water:**
 - Ensure the pump is plugged in and receiving power.
 - Check for blockages in the skimmer, pump basket, or hoses.
 - Verify the filter cartridge is not excessively dirty.
 - Bleed air from the pump system if necessary (refer to pump manual).
- **Water Leakage:**
 - Inspect the liner for punctures or tears. Use a vinyl repair kit for small holes.
 - Check all hose connections and tighten clamps.
 - Ensure the drain plug is securely closed.

Specifications

Brand	FUNSICLE
Model Number	16839
Shape	Round
Color	Brown (Woven Design)
Dimensions (Diameter x Height)	Ø4.57m x 1.22m
Capacity	17420 Litres
Material	Polyvinyl Chloride (PVC)
Item Weight	80.86 Kilograms
Included Components	Cartridge Filter Pump, Safety Ladder, Maintenance Kit, Protective Cover, Ground Mat
Assembly Required	Yes (Tool-free installation)

Usage	Outdoor
