2. SAFETY INFORMATION

Please observe the following safety precautions to prevent injury or damage to the devices:

- Do not operate the devices with a damaged power cord or plug.
- Keep both devices away from water or other liquids.
- Ensure proper ventilation when operating the air purifier.
- Supervise children and pets when the devices are in use.
- Unplug the devices before cleaning or performing any maintenance.
- Use only manufacturer-recommended replacement parts and accessories.

3. PRODUCT OVERVIEW

3.1. oneisall PP04 Pet Air Purifier

The PP04 air purifier is designed to improve air quality in pet-owning households. Key features include:

- **Air Intake System:** Features 3 large I-shaped inlets and 3 bottom inlets for 360° airflow, designed to

capture pet hair and dander efficiently.

- **Filtration System:** A 3-stage filtration system comprising a washable pre-filter, an H13 HEPA filter, and a pet-specific activated carbon filter.
- **Air Quality Monitor:** Built-in PM2.5 sensor with a color-coded display for real-time air quality monitoring.
- **Pet Entertainment Features:** Includes a built-in scratch board, rotating ball, teaser wand, and a top platform for pets.

Purifier That Entertains

4-in-1 Teaser · Scratcher · Balls · Perch

3.2. oneisall LM5 Dog Vacuum

The LM5 dog vacuum is designed for pet grooming and hair removal. It includes various attachments for different tasks.

- **Grooming Kit:** Comes with multiple attachments for grooming, shedding, and general cleaning.
- **Powerful Suction:** Designed to effectively remove loose pet hairs.
- **Low Noise Design:** Engineered to operate at a reduced noise level to minimize pet anxiety.

4. SETUP

4.1. oneisall PP04 Pet Air Purifier Setup

1. **Unpack:** Carefully remove the air purifier from its packaging.
2. **Filter Installation:** Open the filter compartment. Remove the plastic packaging from all filters (pre-filter, H13 HEPA, activated carbon filter). Insert the filters in the correct order as indicated by markings inside

the compartment. Close the compartment securely.

3. **Placement:** Place the air purifier on a flat, stable surface, ensuring adequate space around the air inlets and outlets for optimal airflow.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet.

4.2. oneisall LM5 Dog Vacuum Setup

1. **Unpack:** Remove the vacuum unit and all accessories from the packaging.
2. **Attach Hose:** Connect the flexible hose to the main vacuum unit. Ensure it clicks into place.
3. **Select Attachment:** Choose the appropriate grooming or cleaning attachment for your task and securely attach it to the end of the hose.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet.

5. OPERATING INSTRUCTIONS

5.1. oneisall PP04 Pet Air Purifier Operation

1. **Power On/Off:** Press the power button to turn the unit on or off.
2. **Fan Speed Adjustment:** Use the fan speed button to cycle through different fan speeds (e.g., Low, Medium, High).
3. **Auto Mode:** Press the Auto Mode button. The air purifier will automatically adjust its fan speed based on the real-time air quality detected by the PM2.5 sensor.
4. **Air Quality Display:** The color-coded display indicates current air quality:
 - Green: Good air quality
 - Yellow: Moderate air quality
 - Red: Poor air quality
5. **Timer Function:** If available, use the timer button to set the operating duration (e.g., 2H, 4H, 8H).

5.2. oneisall LM5 Dog Vacuum Operation

1. **Power On/Off:** Press the power button to start or stop the vacuum.
2. **Suction Level:** Adjust the suction power as needed for different grooming tasks or pet comfort.
3. **Grooming:** Use the appropriate brush attachment to gently brush your pet's coat, allowing the vacuum to collect loose hair directly.
4. **Shedding:** For shedding, use the deshedding tool. Move it along the pet's coat in the direction of hair growth.
5. **Cleaning:** Use the crevice tool or other cleaning attachments to vacuum pet hair from furniture, carpets, or other surfaces.

**Effortlessly Remove
99.99% Loose Hairs**

6. MAINTENANCE

6.1. oneisall PP04 Pet Air Purifier Maintenance

1. **Pre-filter Cleaning:** The washable pre-filter should be cleaned every 2-4 weeks, or as needed, depending on pet hair accumulation. Remove the pre-filter and rinse it under running water. Allow it to air dry completely before reinserting.
2. **H13 HEPA and Activated Carbon Filter Replacement:** These filters are not washable and should be replaced every 3-6 months, or when the filter replacement indicator illuminates. Refer to the visible filter window to check hair buildup.
3. **Exterior Cleaning:** Wipe the exterior of the air purifier with a soft, dry cloth. Do not use abrasive

cleaners or solvents.

Save 50% on Filters

Save more. Last longer. Live greener.

Image 6.2: A person washing the reusable pre-filter of the oneisall PP04 under running water, demonstrating the cleaning process.

6.2. oneisall LM5 Dog Vacuum Maintenance

1. **Empty Dustbin:** After each use, or when full, detach the dustbin and empty its contents.
2. **Filter Cleaning:** Check and clean the internal filters regularly. Tap out dust or rinse if washable (refer to specific filter instructions). Ensure filters are completely dry before reassembly.
3. **Attachment Cleaning:** Remove any hair or debris from the grooming attachments. They can be rinsed with water and air-dried.
4. **Hose Cleaning:** Check the hose for any blockages and clear them if necessary.

7. TROUBLESHOOTING

If you encounter issues, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Device does not turn on	No power connection; Power button not pressed	Ensure power cord is securely plugged in; Press power button firmly
Reduced airflow/suction	Clogged filters; Blocked inlets/hose; Full dustbin	Clean or replace filters; Clear any blockages; Empty dustbin
Unusual noise	Foreign object inside; Motor issue	Turn off and unplug, check for and remove foreign objects; Contact customer support if noise persists
Air Purifier display shows poor air quality despite operation	High pollutant levels; Sensor dirty	Allow more time for purification; Gently clean the PM2.5 sensor area with a dry cotton swab

8. SPECIFICATIONS
