HAPAW P003

HAPAW P003 Wireless Cat Water Fountain User Manual

Model: P003

1. INTRODUCTION

Thank you for choosing the HAPAW P003 Wireless Cat Water Fountain. This innovative pet water dispenser is designed to provide fresh, clean water for your cat, promoting better hydration and health. It features a unique dual-tank system for wastewater separation, a filter-free design for reduced maintenance, and flexible power options including a built-in rechargeable battery. Please read this manual thoroughly before use to ensure proper operation and care.

2. PACKAGE CONTENTS

Before setting up your HAPAW P003 Cat Water Fountain, please ensure all components are present and in good condition. The package should include:

- Main Unit (with control panel and pump)
- Stainless Steel Drinking Tray
- Clean Water Tank (3L / 101oz capacity)
- Wastewater Tank (1.35L / 46oz capacity)
- Reusable Black Sponge (pre-installed, with 4 extra included)
- USB Charging Cable
- Power Adapter
- User Manual

3. SETUP INSTRUCTIONS

Follow these steps to assemble and prepare your water fountain for use:

1. **Clean Components:** Before first use, thoroughly rinse the clean water tank, wastewater tank, and stainless steel drinking tray with mild soap and water. Wipe the main unit with a damp cloth (do not submerge the main unit in water).
2. **Assemble Tanks:** Place the wastewater tank into its designated slot on the main unit. Ensure the red sensor is facing upwards for accurate level detection. Then, place the clean water tank next to it.
3. **Install Sponge:** Insert the black reusable sponge into the slot within the drinking tray. This sponge helps catch hair and food particles.
4. **Place Drinking Tray:** Position the stainless steel drinking tray onto the top of the main unit, ensuring it sits securely.
5. **Fill Water Tank:** Fill the clean water tank with fresh water up to the maximum fill line.
6. **Power On:** Connect the USB charging cable to the main unit and plug the power adapter into a wall outlet to charge the internal battery or operate in continuous flow mode.

4. OPERATING MODES

The HAPAW P003 offers two operating modes and flexible power options:

- **Mode 1: Continuous Flow Mode**

When plugged into a power source, the fountain will continuously circulate water. This mode is ideal for encouraging pets to drink more frequently. Note: The machine cannot be turned off when continuously plugged in.

- **Mode 2: Sensor-Activated Flow Mode**

When operating on battery power, the fountain will activate when a pet approaches within 1-1.5 meters, dispensing water for 1 minute. This conserves battery life, allowing it to last over 15 days on a single charge. Continuous flow is disabled in battery mode.

Power Options:

- **Plugged-in:** For continuous operation and charging.
- **Battery Powered:** For wireless placement and sensor-activated mode. The built-in 5000mAh rechargeable battery provides extended use.

Automatic Drainage:

- In Mode 1, long-press the mode button to set automatic drainage for 24 hours (slow flashing) or 48 hours (fast flashing).
- In Mode 2, press and hold the mode button for 2 seconds to activate the drain valve for manual draining.

5. MAINTENANCE AND CLEANING

Regular cleaning is essential to ensure your pet always has access to fresh water and to prolong the life of the fountain.

1. **Daily Check:** Monitor the water levels in both tanks daily. Refill the clean water tank as needed.
2. **Weekly Cleaning (Tanks & Tray):** Rinse the clean water tank, wastewater tank, and stainless steel drinking tray with mild soap and water. It is recommended to clean the circulatory system fittings and water tank once a week.
3. **Main Unit:** The main unit is **not water washable**. Wipe it down with a damp cloth to clean.
4. **Sponge Maintenance:** The black sponge is reusable. Rinse it regularly to remove trapped hair and food particles. Replace the sponge every 3 months or as needed.
5. **Water Level Probes:** Pet saliva or oil may cover the water level probes and cause malfunctions (e.g., noise or no water flow). If this happens, wipe the metal probes with a dry paper towel.

3000ML Large Clean Water Tank Worry-free Travel

3.0L ≈
500ml x 6

Each refill meets your
pet's drinking
needs for 3-9 days

6. TROUBLESHOOTING

If you encounter any issues with your HAPAW P003 Cat Water Fountain, please refer to the following common solutions:

- **Water Not Flowing / Unusual Noise:**

- Check if the clean water tank is empty. Refill if necessary.
- Ensure the water level probes are clean. Wipe them with a dry paper towel to remove any pet saliva or oil.
- Verify the pump is correctly installed and not obstructed.

- **Wastewater Tank Full:**

- The power button will turn red when the wastewater tank is full. Drain the wastewater tank manually or use the automatic drainage function as described in Section 4.

- **Short Battery Life:**

- Ensure the battery is fully charged. Charge the fountain using the provided USB cable and power adapter.

- For optimal battery life, use Mode 2 (Sensor-Activated Flow Mode).

- **Motion Sensor Not Responding:**

- Ensure the sensor is clean and unobstructed.

- Verify the fountain is in Mode 2 (Sensor-Activated Flow Mode).

7. SPECIFICATIONS

Feature	Detail
Brand	HAPAW
Model Number	P003
Clean Water Capacity	3 Liters (101 oz)
Wastewater Capacity	1.35 Liters (46 oz)
Power Source	Battery Powered (5000mAh Lithium-Ion) / Plug-in
Material	Acrylonitrile Butadiene Styrene (ABS), Stainless Steel
Noise Level	< 20dB
Dimensions	10.85 x 8.5 x 8.5 inches
Weight	3.65 Pounds
Indoor/Outdoor Usage	Indoor
