

IRISFilter-04

Generic HEPA Filter Instruction Manual

For Nicebay EV-H061 and EV-H061-W111 Cordless Handy Vacuum Cleaners

1. INTRODUCTION

This manual provides essential instructions for the Generic HEPA filter (Model IRISFilter-04), designed to maintain the performance of your Nicebay EV-H061 and EV-H061-W111 cordless handy vacuum cleaners. Proper installation and regular maintenance ensure optimal filtration and prolong the life of your vacuum.

2. COMPATIBILITY

The Generic HEPA filter is compatible with the following Nicebay cordless handy vacuum cleaner models:

- Nicebay EV-H061
- Nicebay EV-H061-W111

Before ordering or installing, please verify your vacuum cleaner's model number to ensure correct fitment. Refer to the images below for visual confirmation of compatible vacuum models and filter dimensions.

3. SETUP AND INSTALLATION

To install the new HEPA filter, follow these general steps. For detailed instructions specific to your vacuum cleaner, please consult your Nicebay EV-H061 or EV-H061-W111 user manual.

1. **Power Off:** Ensure your vacuum cleaner is turned off and unplugged from any power source before beginning the installation process.
2. **Locate Filter Compartment:** Identify the filter compartment on your vacuum cleaner. This is typically located near the dustbin.
3. **Remove Old Filter:** Carefully open the compartment and remove the used HEPA filter. Dispose of the old filter responsibly.
4. **Insert New Filter:** Place the new Generic HEPA filter into the compartment. Ensure it is seated firmly and correctly to create a proper seal.
5. **Close Compartment:** Securely close the filter compartment.

Product Dimension

4. OPERATING PRINCIPLE

The high-efficiency HEPA filter is designed to capture up to 99% of fine particles, including dust, dirt, pet hair, and other small allergens, preventing them from being released back into the air. This ensures a cleaner exhaust and contributes to a healthier environment.

Easy to intercept all kinds of dirt

Pet hair

Dust

Wood chip

Flocculent

5. MAINTENANCE

Regular cleaning and timely replacement of the HEPA filter are crucial for maintaining your vacuum cleaner's suction power and overall efficiency.

Cleaning Instructions:

1. **Remove Filter:** Follow the installation steps to remove the HEPA filter from your vacuum cleaner.
2. **Rinse:** Rinse the filter under clean, running water. Gently tap the filter to dislodge trapped dirt. Do not use soap or detergents.
3. **Air Dry:** Allow the filter to air dry completely for at least 24 hours before reinstallation. Ensure it is thoroughly dry to prevent mold growth and damage to the vacuum. Do not use heat sources (e.g., hair dryer, radiator) to dry the filter.

Washable & Reusable

Image: The HEPA filter shown with water splashing, illustrating its washable and reusable nature.

Replacement Schedule:

For optimal performance and filtration efficiency, it is recommended to replace the HEPA filter every 1 to 3 months, depending on usage frequency and the amount of debris collected.

6. TROUBLESHOOTING

If you experience issues with your vacuum cleaner's performance after installing or cleaning the filter, consider the following:

- **Reduced Suction:** A common cause of reduced suction is a clogged filter. Clean or replace the HEPA filter as per the maintenance guidelines.
- **Improper Installation:** Ensure the filter is correctly seated and the compartment is securely closed. An improperly installed filter can lead to air leaks and reduced performance.
- **Wet Filter:** Never operate the vacuum with a wet filter. This can damage the motor and other internal components. Always ensure the filter is completely dry before reinstallation.

7. SPECIFICATIONS

Product Name	Generic HEPA Filter
Model Number (Filter)	IRISFilter-04
Material	HEPA
Reusability	Reusable (Washable)
Product Dimensions	2.13"L x 1.97"W x 1.41"H
Compatible Devices	Nicebay EV-H061, Nicebay EV-H061-W111 cordless handy vacuum cleaner
Included Components	4-pack HEPA filters
