SETUP AND ASSEMBLY

Assembly typically requires two people. Follow these steps carefully to ensure proper and safe construction of your bed

frame.

Step 1: Unpack and Identify Parts

Carefully remove all components from the packaging. Lay them out on a clean, soft surface (like a rug or blanket) to prevent scratches. Identify each part using the included parts list (not provided in this text, but assumed to be in the physical manual).

Step 2: Assemble the Main Frame

Connect the main frame sections according to the diagrams in your physical manual. Ensure all bolts are finger-tightened initially. The double-layer reinforcement structure provides enhanced stability.

Step 3: Install Slats and Mattress Stoppers

Place the bed slats into the U-shaped grooves on the frame. This design helps minimize noise. Attach the 6 mattress slide stoppers to the designated locations on the frame to prevent your mattress from shifting.
