OPERATING INSTRUCTIONS

Your ModernMate L-Shaped Standing Desk features electric height adjustment and integrated power outlets.

Height Adjustment

The desk's height can be adjusted electrically from 27.9 inches (minimum) to 45.7 inches (maximum), excluding the desktop thickness. The lifting mechanism operates quietly, with noise levels below 50 dB.

- **Adjusting Height:** Use the up and down buttons on the hand control unit to raise or lower the desk to your desired height.
- **Memory Presets:** The hand control unit includes two memory buttons. To set a preset, adjust the desk to your preferred height, then press and hold a memory button (e.g., '1' or '2') until the display confirms the setting. You can then recall this height with a single press.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your ModernMate standing desk.

- **Cleaning:** Clean desk surfaces with a soft, damp cloth. Avoid using abrasive cleaners or harsh chemicals, which can damage the finish.
- **Fasteners:** Periodically check all screws and bolts to ensure they are tight. Loose fasteners can affect stability.
- **Motor Care:** Keep the motor and lifting mechanisms free from dust and obstructions. Do not attempt to lubricate the motor or internal components unless specifically instructed by ModernMate support.
- **Cable Management:** Ensure all cables are properly managed and do not interfere with the desk's movement.

TROUBLESHOOTING

If you encounter issues with your ModernMate standing desk, refer to the following common solutions:

Problem	Possible Cause	Solution
Desk does not move or respond to controls.	Power cable disconnected, power outage, control unit malfunction.	Check if the power adapter is securely plugged into both the wall outlet and the desk. Verify the wall outlet has power. If the issue persists, contact customer support.
Desk stops mid-raise/lower.	Temporary obstruction, motor safety feature engaged.	Remove any obstructions. Press the adjustment button again to resume movement. If it repeatedly stops, check for excessive weight or damage.
Unusual noise during operation.	Loose components, motor issue.	Ensure all assembly screws are tightened. If the noise is from the motor and is persistent or loud, discontinue use and contact customer support.
Drawers are stiff or do not glide smoothly.	Dust or debris in glides, misaligned drawer.	Clean the drawer glides. Ensure drawers are properly aligned on their tracks.
