3. Setup and Installation

Professional Installation Recommended

Due to the complexity of automotive electrical systems and the specific fitment for Chrysler Town & Country (2011-2016), professional installation by a qualified technician is highly recommended. Incorrect installation can lead to damage to the unit, vehicle, or personal injury.

Wiring Connections

Ensure all wiring connections are made securely and correctly according to the provided wiring diagram. Pay close attention to power, ground, speaker, and accessory connections. The included Canbus box facilitates integration with your vehicle's existing systems.

Initial Power-On

1. After installation, turn on your vehicle's ignition.
2. The car stereo should power on automatically. If not, press the power button on the unit.
3. Follow any on-screen prompts for initial setup, such as language selection and time zone.

4. Operating Instructions

User Interface

The unit features a responsive 7-inch touchscreen display. Navigate through menus and applications by tapping, swiping, and pinching gestures similar to a smartphone.

CarPlay & Android Auto

Connect your smartphone to access CarPlay (for iOS) or Android Auto (for Android) functionalities. This allows you to use your phone's navigation, make calls, send messages, and play music directly from the car stereo's screen.

- **Connection:** Connect wirelessly via Bluetooth and Wi-Fi, or via a USB cable.
- **Voice Control:** Use Siri or Google Assistant for hands-free operation.

Image: The car stereo displaying various applications accessible through CarPlay, Android Auto, and Mirror Link.

Mirror Link

The Mirror Link feature allows you to mirror your smartphone's screen directly onto the car stereo display. This is useful for viewing content or using apps not natively supported by CarPlay or Android Auto.

GPS Navigation

The unit features a built-in GPS module supporting both offline and online navigation. Download offline maps for areas with limited mobile signal. Connect to Wi-Fi for real-time traffic updates and online map services.

WiFi Hotspot

Connect the car stereo to a Wi-Fi hotspot (e.g., from your smartphone) to access the internet. This enables downloading apps from the Play Store, streaming online videos, and using online navigation services.

Bluetooth

Pair your smartphone via Bluetooth for hands-free calling and audio streaming (A2DP). The unit includes a built-in microphone and supports an external microphone for clear communication.

- **Pairing:** Go to Bluetooth settings on the stereo and your phone to pair.

- **Hands-Free Calls:** Make and receive calls directly from the stereo screen.
- **Music Streaming:** Play audio from your phone through the car's speakers.

FM/RDS Radio

Tune into your favorite FM radio stations. The RDS (Radio Data System) feature provides additional information such as station name, song title, and real-time traffic updates where available. You can save up to 18 common stations.

Steering Wheel Control

If your vehicle is equipped with steering wheel controls, this unit supports integration, allowing you to manage audio, calls, and other functions without taking your hands off the wheel. Refer to the system settings for steering wheel control learning/mapping.

Backup Camera

The included reversing camera automatically displays the rear view on the stereo screen when the vehicle is shifted into reverse gear. This camera features a 170° wide-angle lens, IP68 waterproof rating, and night vision capabilities for enhanced visibility in various conditions.

Audio Equalizer (EQ)

Customize your audio experience using the built-in equalizer. Adjust various sound parameters to achieve your preferred audio quality for different music genres.

5. Maintenance

Screen Cleaning

To clean the touchscreen, power off the unit and gently wipe the screen with a soft, lint-free cloth. For stubborn smudges, use a

screen cleaner specifically designed for electronic displays. Avoid abrasive materials or harsh chemicals.

Software Updates

Periodically check the manufacturer's website or the unit's system settings for available software updates. Keeping your system updated ensures optimal performance, new features, and bug fixes.

6. Troubleshooting

If you encounter issues with your PHEZEN car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	Incorrect wiring, blown fuse, vehicle power issue.	Check power and ground connections. Inspect vehicle fuses. Consult a professional installer.
No sound from speakers.	Incorrect speaker wiring, volume too low, mute activated.	Verify speaker connections. Increase volume. Check if mute is active.
GPS signal lost or inaccurate.	GPS antenna obstruction, antenna not connected.	Ensure GPS antenna has a clear view of the sky. Check antenna connection.
Bluetooth connection issues.	Device not in pairing mode, interference, incorrect pairing process.	Ensure both devices are in pairing mode. Delete previous pairings and try again. Move closer to the unit.
Backup camera not displaying.	Camera not connected, reverse trigger wire issue, camera malfunction.	Check camera input connection. Verify reverse trigger wire connection. Test camera functionality.
