6. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your storage cabinet:

- **Cleaning:** Wipe down the exterior and interior surfaces with a damp cloth. For stubborn dirt, use a mild soap solution and rinse thoroughly. Avoid harsh chemicals or abrasive cleaners.
- **Wood Care:** As the cabinet is made of fir wood, periodic treatment with a wood sealant or stain is recommended to enhance its weather resistance and prolong its lifespan, especially in harsh climates.
- **Roof Inspection:** Periodically check the waterproof roof for any damage or debris that might impede water runoff. Clear any accumulated leaves or dirt.
- **Hardware Check:** Annually inspect all screws, bolts, hinges, and the latch to ensure they are tight and functioning correctly. Tighten any loose fasteners.
- **Stability Check:** Confirm the anti-tip device remains securely fastened and the cabinet is stable.
