5. Troubleshooting

This section addresses common issues you might encounter with your sofa.

5.1 Cushions Not Fully Expanded

- **Issue:** Cushions appear flat or not as firm as expected after unpacking.
- **Solution:** Allow up to 48-72 hours for the memory foam cushions to fully expand and regain their intended shape and firmness. Regularly fluffing the cushions can also aid in this process and maintain their loft.

5.2 Sofa Sections Not Connecting Securely

- **Issue:** Modular sections feel loose or do not stay connected.
- **Solution:** Ensure that the connector brackets on the underside of each module are properly aligned and fully engaged. If necessary, lift and reseat the modules, ensuring a firm click or lock.

5.3 Squeaking Noises

- **Issue:** The sofa makes squeaking sounds during use.
- **Solution:** Check all leg and frame connections to ensure they are tightened. Loose bolts can cause squeaking. If the issue persists, inspect the internal frame for any loose components.
