HoneyGuaridan Series 25

HoneyGuaridan Series 25 Automatic Feeder Slow Feeder Bowls (2-pack) Instruction Manual

Model: Series 25

Introduction

Thank you for choosing the HoneyGuaridan Series 25 Automatic Feeder Slow Feeder Bowls. This 2-pack of slow feeder bowls is specifically designed to enhance your pet's mealtime experience by promoting healthier eating habits. These bowls are compatible with HoneyGuaridan Series 25 automatic pet feeders (models A25D/S25D/S25).

The integrated raised obstacles and maze pattern effectively slow down your pet's eating speed, helping to prevent gulping, bloating, and vomiting. This design supports better digestion and allows your pet to enjoy meals at a more appropriate pace. Made from food-grade, BPA-free ABS plastic, these bowls are robust, lightweight, and durable, offering a safe and long-lasting feeding solution.

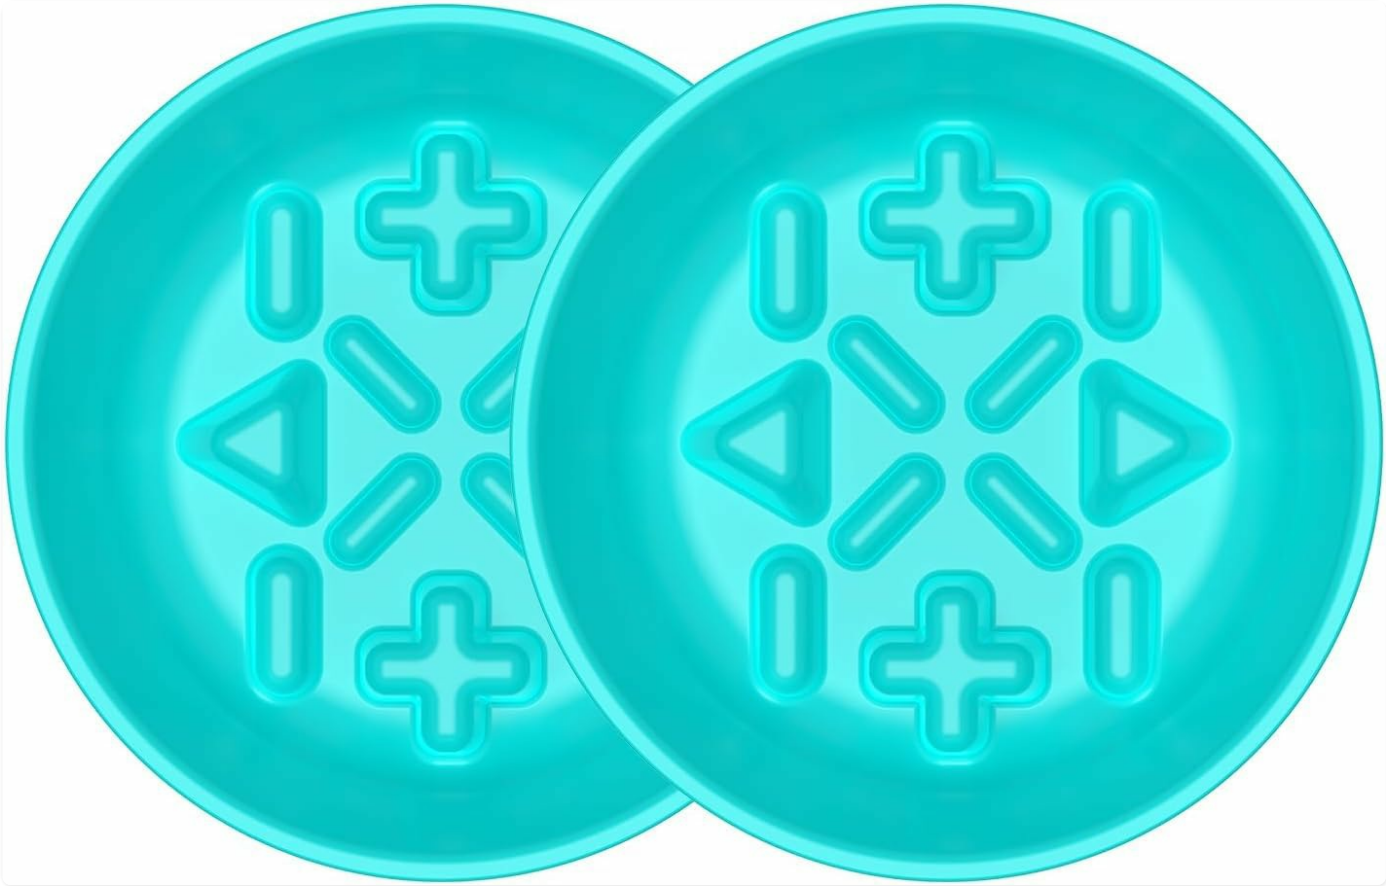

Image: Two green HoneyGuaridan Series 25 slow feeder bowls, designed with internal maze patterns to encourage slower eating. These bowls are replacements for compatible automatic feeders.

Setup

Proper setup ensures optimal performance and compatibility with your automatic feeder.

1. **Check Compatibility:** Ensure your automatic pet feeder is a HoneyGuaridan Series 25 model (A25D, S25D, or S25). These bowls are specifically designed for these models and are not compatible with A303D, A305D, S303D, or S305D models.
2. **Unpack:** Carefully remove the two slow feeder bowls from their packaging.
3. **Initial Cleaning:** Before first use, wash the bowls thoroughly with warm water and mild soap. Rinse completely and dry.
4. **Installation:** Place the clean slow feeder bowls into the designated slots of your compatible HoneyGuaridan Series 25 automatic pet feeder. Ensure they are seated securely and lie flat.

Operating Instructions

These slow feeder bowls are designed to work seamlessly with your HoneyGuaridan Series 25 automatic pet feeder. Once installed, the feeder will dispense food into the bowls as programmed.

- **Filling:** The automatic feeder will fill the bowls according to its schedule. The internal maze design of the bowls will naturally spread the food, making it more challenging for your pet to eat quickly.
- **Slow Feeding Benefit:** Your pet will need to navigate the food through the raised obstacles, which slows down their eating pace. This promotes better digestion and reduces the risk of common issues associated with fast eating, such as gulping, bloating, and vomiting.
- **Monitoring:** Observe your pet during initial uses to ensure they adapt to the slow feeder design. Most pets adjust

quickly.

Maintenance

Regular cleaning of your slow feeder bowls is essential for your pet's hygiene and health.

1. **Daily Cleaning:** After each meal, or at least once daily, remove the bowls from the feeder.
2. **Washing:** Wash the bowls with warm water and a mild, pet-safe dish soap. The smooth ABS surface prevents food from sticking, making cleaning easy.
3. **Rinsing:** Rinse thoroughly to remove all soap residue.
4. **Drying:** Allow the bowls to air dry completely or wipe them dry with a clean cloth before placing them back into the feeder.
5. **Avoid Harsh Chemicals:** Do not use abrasive cleaners or harsh chemicals, as these can damage the material and be harmful to your pet.

Troubleshooting

If you encounter any issues with your HoneyGuaridan Slow Feeder Bowls, consider the following:

- **Bowls Not Fitting:** Double-check that your automatic feeder is a compatible HoneyGuaridan Series 25 model (A25D/S25D/S25). These bowls are specifically designed for these models.
- **Pet Not Eating from Slow Feeder:** Some pets may take time to adjust. Ensure the food is easily accessible within the maze. If your pet is struggling, you might initially place a small amount of food outside the maze to encourage them.
- **Cleaning Difficulties:** Ensure you are cleaning the bowls immediately after use to prevent food from drying and sticking. Warm water and mild soap should be sufficient for easy cleaning.
- **Damage:** While durable, inspect bowls regularly for any signs of damage. Discontinue use if cracks or sharp edges appear.
