CATIGA CF-300

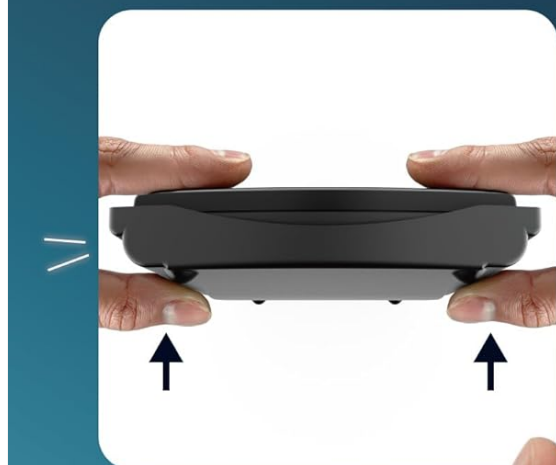

CATIGA CF-300 Financial Calculator User Manual

Model: CF-300

INTRODUCTION

The CATIGA CF-300 is a professional financial calculator designed for business analysts, real estate investors, accountants, and finance students. It features built-in functions for Time Value of Money (TVM), Internal Rate of Return (IRR), Net Present Value (NPV), Cash Flow analysis, Amortization, and Break-Even calculations. This manual provides detailed instructions for setting up, operating, maintaining, and troubleshooting your CF-300 calculator.

Secure Clip-On Protective Cover

**Snaps On Firmly -
No Sliding, No Loosening,
Always Stays in Place**

SETUP

1. Battery Installation

The CF-300 calculator is powered by batteries. To install or replace batteries:

1. Locate the battery compartment cover on the back of the calculator.
2. Use a small screwdriver to open the compartment.
3. Insert new batteries, ensuring correct polarity (+/-).
4. Replace the cover and secure it with the screw.

2. Attaching the Protective Cover

The CF-300 comes with a flip-open hard case designed for secure protection. To attach the cover:

1. Align the cover with the calculator.

2. Gently press the bottom edges of the cover until it clicks securely into place. This ensures a snug fit, preventing sliding or loosening during transport.

3. Initial Power On

Press the **ON/OFF** button to turn on the calculator. The display should show '0' or a previous calculation result. If the display is blank, check battery installation.

OPERATING INSTRUCTIONS

The CATIGA CF-300 features an industry-standard layout for efficient financial calculations.

Image: Overview of the CATIGA CF-300 calculator, highlighting key function areas such as Cash Flow Tools, Smart Memory, Statistics Mode, and TVM Functions.

1. Basic Arithmetic Operations

Perform standard addition, subtraction, multiplication, and division using the numeric keypad and operator keys ($+$, $-$, $\times$, $\div$). Press $=$ for the result.

2. Time Value of Money (TVM) Functions

The TVM row includes keys for **N** (number of periods), **I/Y** (interest rate per year), **PV** (present value), **PMT** (payment), and **FV** (future value). To use these functions:

1. Enter the known values for at least four of the five TVM variables.
2. Press the key for the unknown variable to calculate its value.
3. Use **CLR TVM** to clear previous TVM entries.

3. Cash Flow (CF) Analysis

The CF function allows for the calculation of Net Present Value (NPV) and Internal Rate of Return (IRR).

1. Press **CF** to enter cash flow mode.
2. Enter the initial investment (CF0) and subsequent cash flows (C01, C02, etc.) along with their frequencies (F01, F02, etc.).
3. Press **NPV** or **IRR** and then **CPT** (Compute) to get the result.

4. Amortization

To calculate amortization schedules:

1. Enter the loan details using the TVM keys (N, I/Y, PV, PMT, FV).
2. Press **AMORT** to access the amortization worksheet.
3. Input the starting and ending payment periods to view principal, interest, and remaining balance.

5. Statistical Calculations

The calculator supports various statistical functions, including mean, standard deviation, and linear regression.

1. Press **DATA** to enter data points.
2. Press **STAT** to access statistical calculations.
3. Select the desired statistical function (e.g., mean, standard deviation) and press **CPT**.

6. Memory Functions

The CF-300 includes memory functions for storing and recalling values.

- **STO**: Stores a displayed value into a memory register.
- **RCL**: Recalls a value from a memory register to the display.

MAINTENANCE

1. Cleaning

To clean your calculator, use a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid using harsh chemicals or solvents, as these can damage the casing or display.

2. Storage

When not in use, store the calculator in its protective hard case to prevent scratches and damage. Keep it away from extreme temperatures, direct sunlight, and high humidity.

3. Battery Replacement

If the display becomes dim or calculations are inconsistent, it may be time to replace the batteries. Refer to the 'Battery Installation' section under Setup for instructions.

TROUBLESHOOTING

- **Display is blank:** Check battery installation. Replace batteries if necessary. Ensure the calculator is turned on by pressing **ON/OFF**.
- **Incorrect calculation results:** Verify that all input values are correct. Ensure you are in the correct calculation mode. Clear previous entries using **CLR WORK** or **CLR TVM** as appropriate. Reset the calculator if persistent issues occur (refer to the manual for specific reset procedures, usually a small reset button or key combination).
- **Keys are unresponsive:** Clean around the keys to remove any debris. If the issue persists, the calculator may require service.
