4.3 Hot Water Wash Mode

The Hot Water Wash Mode activates detergent enzymes to effectively remove stubborn yellowing and deep-seated dirt from fabrics. This mode offers various temperature settings for different needs:

- **60°C:** Sterilization for cotton materials (e.g., baby clothes, up to 2kg).
- **40°C:** For sebum stains and odors (e.g., shirts).

4.4 Drying with Heat Pump Technology

The heat pump drying system minimizes shrinkage and gently dries clothes at low temperatures, while also being energy efficient. The "Straight Drum" design helps spread clothes out and reduces wrinkles during drying, resulting in fluffy towels.
