ASSEMBLY INSTRUCTIONS

The assembly process is designed to be a meditative and creative experience. Follow the step-by-step instructions provided in the accompanying manual to construct your peach blossom bonsai.

1. **Unpack Components:** Carefully open the packaging and lay out all building blocks. It is recommended to sort pieces by color and type to facilitate assembly.

3. **Construct the Branches:** Assemble the brown branch segments, ensuring secure connections. These form the structural base for the blossoms.
4. **Attach Leaves and Buds:** Integrate the green leaves and smaller pink buds onto the branches as indicated in the manual.
5. **Assemble Peach Blossoms:** Create the individual peach blossoms, paying attention to the petal layer texture and flower core details.

MAINTENANCE

This artificial peach blossom bonsai requires minimal maintenance. Unlike real plants, it needs no watering, pruning, or sunlight.

- **Cleaning:** To remove dust, gently wipe the surfaces with a soft, dry cloth. For more stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.
- **Avoid Direct Sunlight:** While durable, prolonged exposure to direct sunlight may cause slight fading over many years. It is recommended to place it in areas with indirect light.
- **Handle with Care:** Although made from durable plastic, avoid dropping or applying excessive force to prevent damage to the delicate blossom and branch structures.

TROUBLESHOOTING

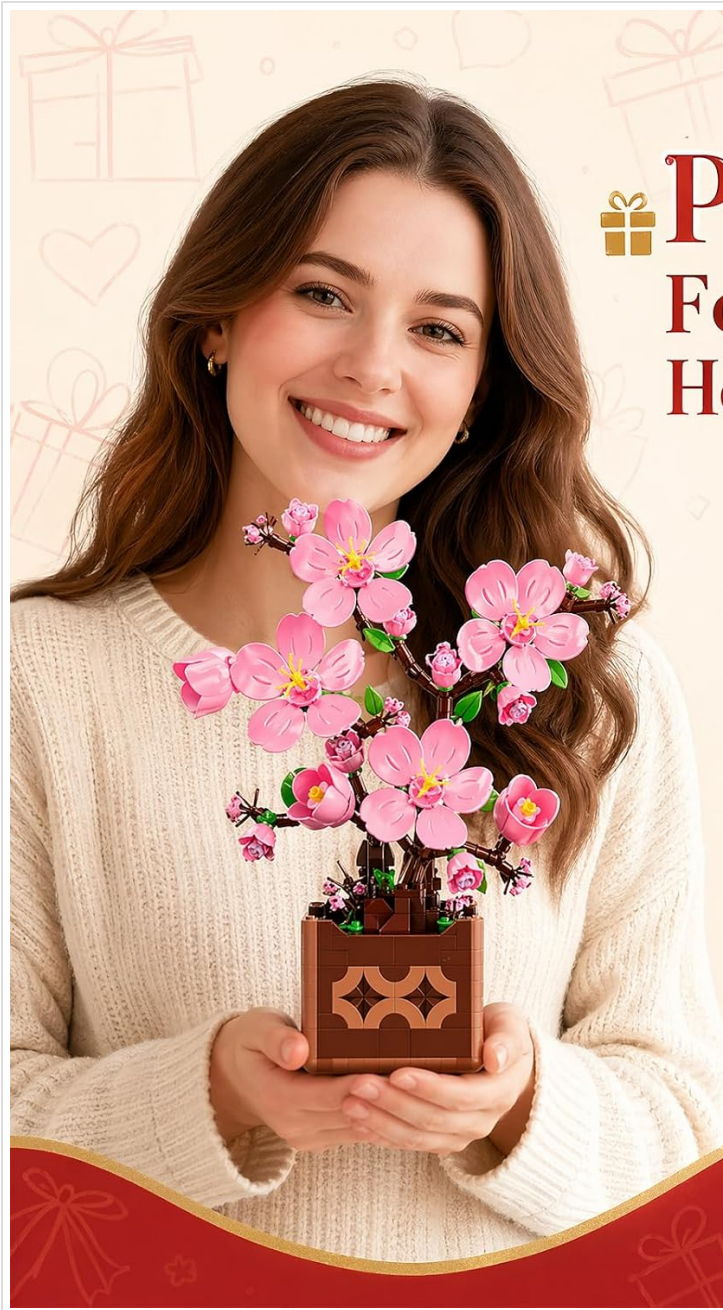

If you encounter any issues during assembly or with the product, please refer to the following common solutions:

- **Missing Pieces:** Double-check all packaging and sorting trays. If a piece is genuinely missing, please contact customer support with details of the missing component.
- **Difficulty Connecting Pieces:** Ensure pieces are correctly oriented and aligned. Apply gentle, even pressure. Avoid forcing pieces together, which can cause damage.
- **Unstable Structure:** Review previous steps to ensure all connections are secure. Sometimes a loose

connection early in the build can affect overall stability.
