Assembly Steps (General Guide)

- Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface.
- Attach Side Rails:** Connect the side rails to the headboard and footboard using the provided hardware. Ensure all connections are secure but do not fully tighten yet.
- Install Center Support:** Assemble and attach the center support beam(s) and legs to the frame.
- Place Wooden Slats:** Lay the wooden slats across the frame, ensuring they are evenly spaced and secured according to the instructions. The slats provide direct mattress support, eliminating the need for a box spring.

OPERATION AND USAGE

Mattress Compatibility

This platform bed is designed to be used without a box spring. It is compatible with mattresses between 8 to 10 inches thick. The wooden slats provide adequate support and ventilation for your mattress.

Weight Capacity

The bed frame is constructed to support a total weight of up to 250 lbs, including the mattress and occupants. Exceeding this limit may compromise the structural integrity of the bed.

CARE AND MAINTENANCE

Cleaning the Boucle Fabric

- For general cleaning, gently vacuum the boucle fabric upholstery using an upholstery attachment to remove dust and loose debris.
- For spills, blot immediately with a clean, dry cloth. Do not rub, as this can spread the stain.
- For tougher stains, use a mild fabric cleaner specifically designed for upholstery. Test on an inconspicuous area first.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the fabric.

Frame Care

- Periodically check all bolts and screws to ensure they remain tight. Retighten if necessary to maintain stability.

- Wipe down the wooden and MDF frame components with a soft, damp cloth. Dry immediately.
- Avoid exposing the bed frame to excessive moisture or direct sunlight for prolonged periods.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels unstable or wobbly	Loose hardware (bolts/screws)	Check and tighten all bolts and screws. Ensure all connections are secure.
Squeaking noises	Loose connections or friction between parts	Retighten all hardware. If squeaking persists, apply a small amount of lubricant (e.g., silicone spray) to contact points between metal or wood components.
Slats appear uneven or sag	Improper slat placement or damaged slats	Ensure slats are correctly positioned and evenly spaced. Check for any damaged slats and replace if necessary. Ensure the center support legs are firmly on the floor.
