## AROEVE AP04

# AROEVE AP04 Air Purifier User Manual

Model: AP04

## 1. INTRODUCTION

---

This manual provides essential information for the safe and effective operation, maintenance, and troubleshooting of your AROEVE AP04 Air Purifier. Please read it thoroughly before using the appliance and retain it for future reference.

## 2. SAFETY INSTRUCTIONS

---

- Always place the air purifier on a firm, level surface.
- Ensure the power cord is not damaged or pinched.
- Do not operate the appliance near water or in excessively humid environments.
- Keep the air inlet and outlet clear of obstructions.
- Unplug the air purifier before cleaning or performing any maintenance.
- Do not allow children to operate the appliance without supervision.
- This appliance is for indoor use only.

## 3. PRODUCT OVERVIEW

---

### Components and Features

The AROEVE AP04 Air Purifier is designed to improve indoor air quality by filtering various airborne particles. Key features include an air quality sensor, multiple fan speeds, a timer function, and a quiet sleep mode.

# Protect Your Health Fresh Air in Every Coner

**223**m<sup>3</sup>/h  
CADR

**1095**ft<sup>2</sup>  
Area

Figure 3.1: AROEVE AP04 Air Purifier in a living room. This image shows the overall design of the air purifier, highlighting its compact size and modern aesthetic within a home environment.

## Control Panel

The control panel is located on the top of the unit and features touch-sensitive buttons for various functions and an indicator light for air quality.

# Bad Air is Automatically Purified Feel The Air Change

Figure 3.2: Close-up of the control panel. This image details the touch controls for power, fan speed, timer, and mode selection, along with the illuminated ring indicating operational status.

## 4. SETUP

### 4.1 Unpacking

1. Carefully remove the air purifier from its packaging.
2. Remove all plastic packaging materials from the unit and the filter.

### 4.2 Filter Installation

The air purifier comes with a filter that needs to be installed before first use. Ensure the plastic packaging is removed from the filter.

# Silent Purification At Night More Care About Your Sleep

22dB

Noise Low Than

**SilentAirMax**  
Technology

\*When MK04 runs in Sleep Mode, the noise is the lowest 22dB

Figure 4.1: Filter replacement process. This image illustrates how to access the filter compartment by pulling a tab and removing the old filter, then inserting a new one.

1. Locate the filter cover on the side of the unit.
2. Grab the rope or tab on the filter cover and gently pull to open it.
3. Remove the new filter from its plastic packaging.
4. Insert the filter into the compartment, ensuring it is correctly positioned.
5. Close the filter cover securely.

## 4.3 Placement

Place the air purifier in a location where air can circulate freely around it. Avoid placing it directly against walls or furniture that might block the air intake or outlet.

## 5. OPERATING INSTRUCTIONS

### 5.1 Power On/Off

Plug the power cord into a suitable electrical outlet. Press the power button on the control panel to turn the unit on or off.

### 5.2 Fan Speed Modes

Press the fan speed button to cycle through available fan speeds: 1 (low), 2 (medium), and Auto mode. In Auto mode, the fan speed adjusts automatically based on detected air quality.

### 5.3 Timer Settings

Press the timer button to set the operating duration. Available options are 8 hours, 12 hours, and 24 hours. The unit will automatically turn off after the selected time.

### 5.4 Sleep Mode

Activate sleep mode for quiet operation. In this mode, the fan runs at a low speed with minimal noise, and all indicator lights turn off to avoid disturbance.

Figure 5.1: Air purifier operating in a bedroom. This image demonstrates the unit's quiet operation, suitable for sleep environments, with

minimal light emission.

## 5.5 Air Quality Indicator

The built-in dust sensor automatically detects air quality and displays it via an indicator light on the top of the unit:

- **Blue:** Good air quality
- **Yellow:** Moderate air quality
- **Red:** Poor air quality

Figure 5.2: Air quality indicator. This diagram visually explains the meaning of the blue, yellow, and red indicator lights, corresponding to good, moderate, and poor air quality respectively.

## 6. MAINTENANCE

### 6.1 Filter Replacement

To maintain optimal purification performance, replace the air filter every 3-5 months. The replacement process is the same as the

initial installation (refer to Section 4.2).

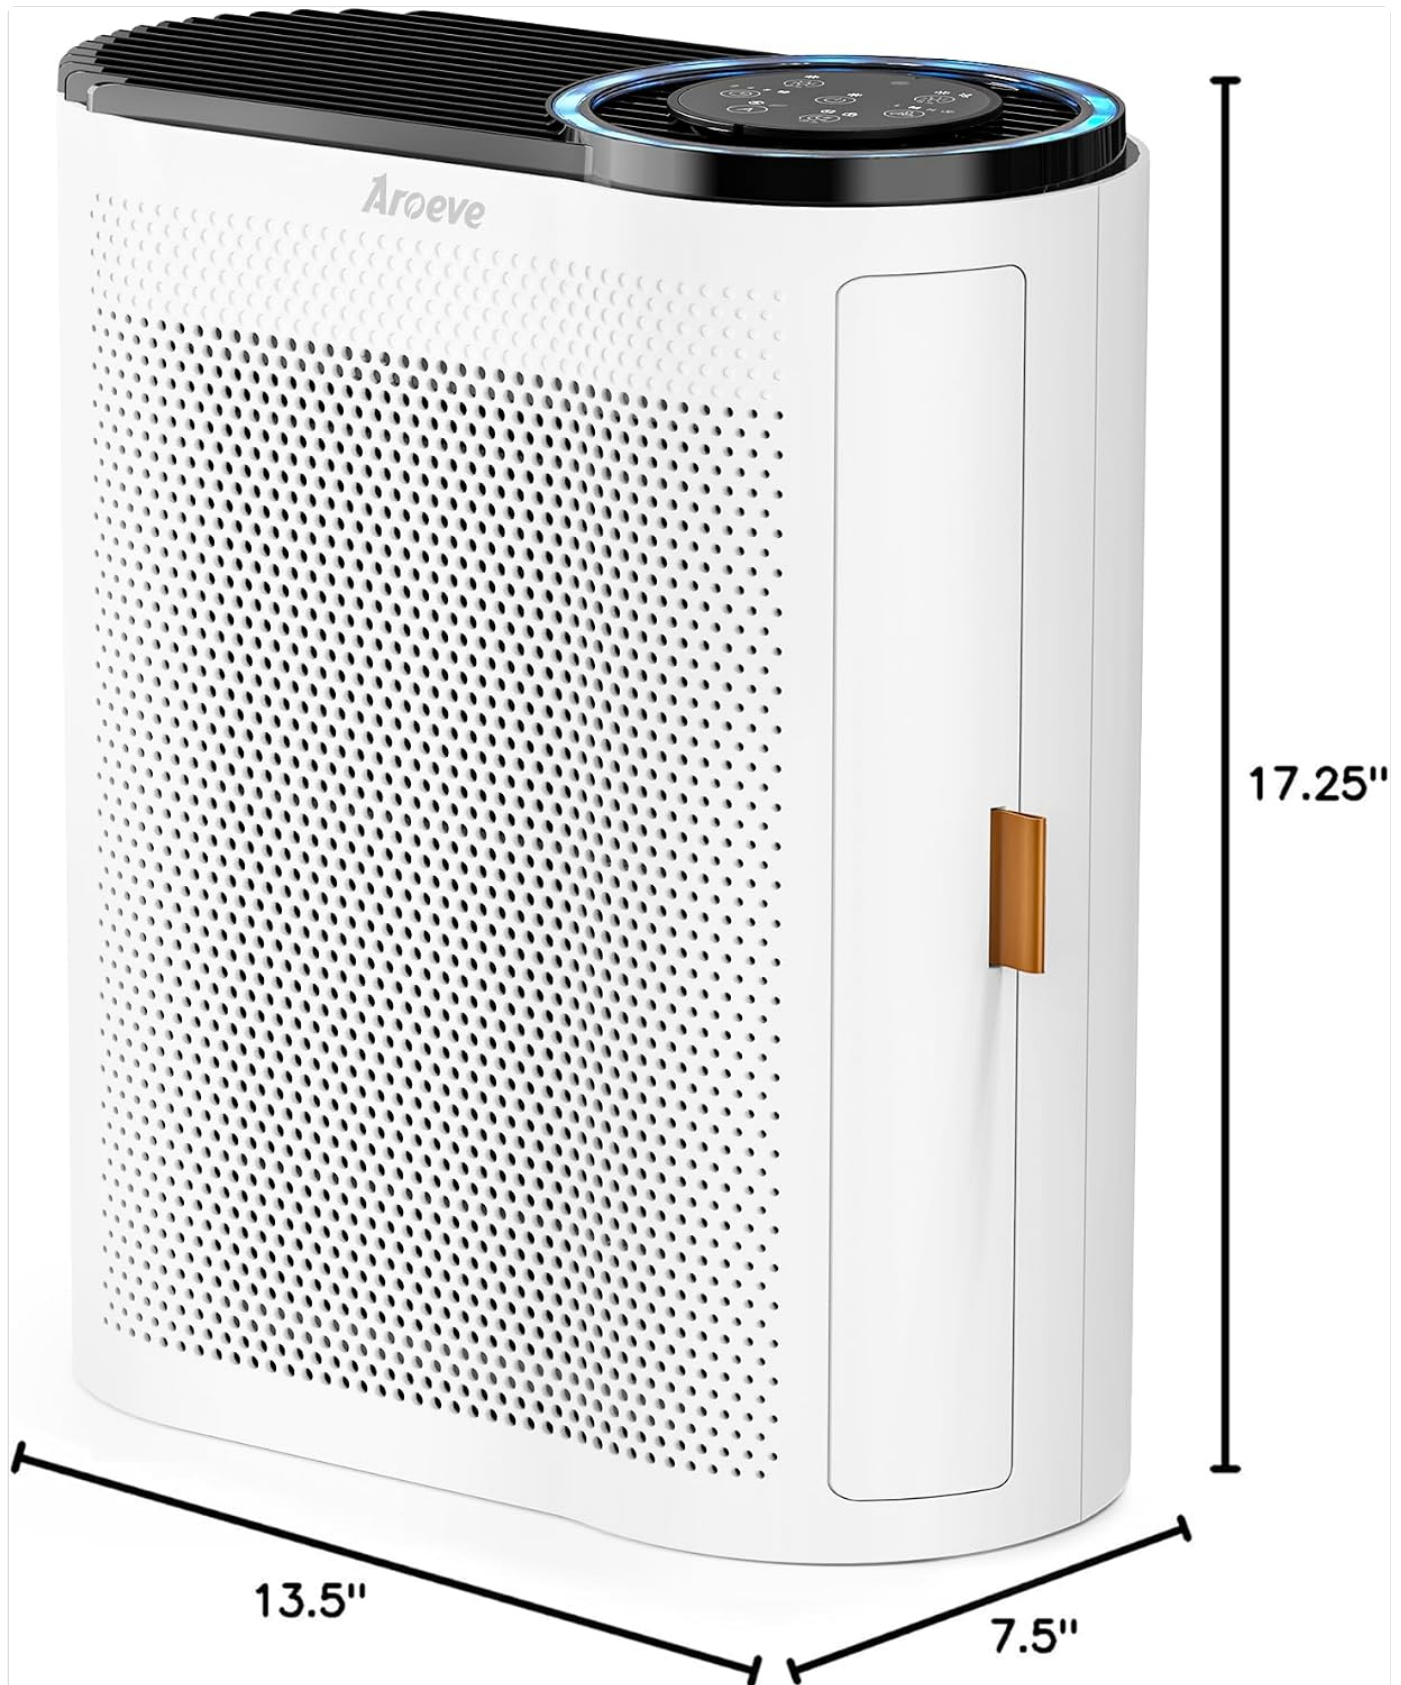

Figure 6.1: Various filter types. This image displays three different filter options: Pet Dander Version (green), Standard Version (blue), and Smoke Remove Version (black), allowing users to choose based on specific needs.

## 6.2 Cleaning the Unit

- Wipe the exterior of the air purifier with a soft, dry cloth.
- Do not use abrasive cleaners or solvents.
- Periodically clean the air intake and outlet grilles with a soft brush or vacuum cleaner attachment to remove dust buildup.

## 7. TROUBLESHOOTING

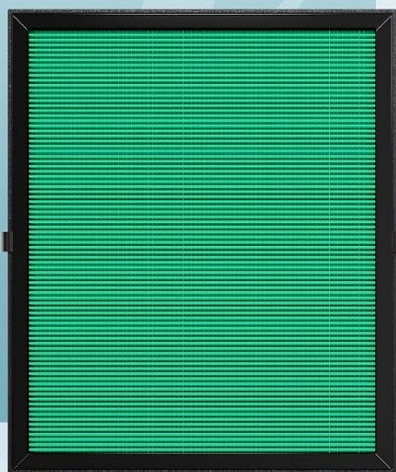

| Problem                  | Possible Cause                                          | Solution                                                                               |
|--------------------------|---------------------------------------------------------|----------------------------------------------------------------------------------------|
| Unit does not turn on    | No power supply; Power cord not connected; Unit damaged | Check power outlet; Ensure power cord is securely plugged in; Contact customer support |
| Weak airflow             | Filter clogged; Air inlets/outlets blocked              | Replace filter; Clear any obstructions                                                 |
| Unusual noise            | Foreign object inside; Unit not on a level surface      | Unplug and check for foreign objects; Place on a stable, flat surface                  |
| Poor purification effect | Filter needs replacement; Room size too large           | Replace filter; Ensure unit is suitable for room size                                  |

## 8. SPECIFICATIONS

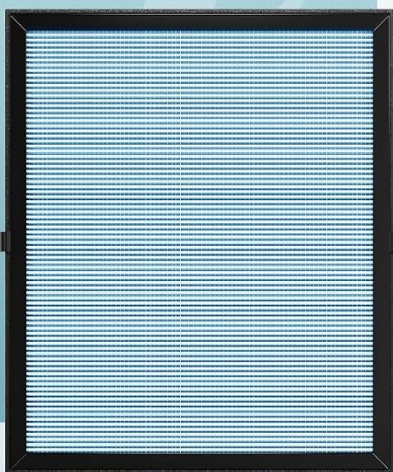

| Feature                           | Detail                                                              |
|-----------------------------------|---------------------------------------------------------------------|
| Model Number                      | AP04                                                                |
| Product Dimensions (L x W x H)    | 13.5 x 7.5 x 17.25 inches                                           |
| Item Weight                       | 8.18 Pounds                                                         |
| Power Source                      | AC                                                                  |
| Control Method                    | Touch Button Control                                                |
| Filter Type                       | Pre-Filter (Multi-layer filtration system)                          |
| Recommended Floor Area            | Up to 1095 Square Feet (for 1 air change per hour)                  |
| Noise Level                       | 22 Decibels (in Sleep Mode)                                         |
| Particle Retention Size           | 0.3 Micron                                                          |
| Wattage                           | 34 watts                                                            |
| Contaminant Filtration Capability | Cigarette smoke, dust, odors, pet dander, pollen                    |
| Special Features                  | Portable, Air Quality Sensor, Auto Function, Ultra-Quiet Sleep Mode |
