Installation Steps

Installation is recommended for two people due to the motor's weight. Two 8mm drill holes are required in concrete ceilings for secure fastening. Metal expansion anchors are included.

1. **Mounting Bracket:** Secure the mounting bracket to the ceiling using the provided screws and anchors. Ensure it is firmly attached and can support the fan's weight.
2. **Wiring:** Connect the electrical wires using the connection terminals. Match blue to blue (neutral), brown to brown (live), and yellow/green to yellow/green (ground). Ensure all cables are securely fastened. Grounding is mandatory for the metal housing.
3. **Attach Fan Body:** Carefully lift the fan body and place it into the prepared mount. Secure it with the 4 small screws.
4. **Install Blades:** Attach the fan blades to the motor housing according to the instructions in the included manual.
5. **Install Light Cover:** Secure the LED light cover to the bottom of the fan.
6. **Power On:** Restore power to the fan.

Important: The fan must be continuously powered and should not be switched off via a standard wall switch if you intend to use the app or remote control for full functionality.

App Pairing (Tuya Smart App)

For smart control, pair your fan with the Tuya Smart app (available for iOS/Android).

1. Download and install the Tuya Smart app on your smartphone.
2. Register or log in to your Tuya account.
3. Ensure your fan is powered on and your smartphone is connected to a 2.4GHz Wi-Fi network.
4. In the app, follow the on-screen instructions to add a new device. The fan will typically enter pairing mode automatically when first powered on.
5. Once paired, you can control the fan from multiple devices and remotely via an internet connection.
