CAB55 SW-03

CAB55 XXL 23-Inch Rolling Sewing Machine Case (Model SW-03) Instruction Manual

Model: SW-03

Introduction

This manual provides instructions for the assembly, operation, and maintenance of your CAB55 XXL 23-Inch Rolling Sewing Machine Case. This case is designed to transport and protect large sewing and embroidery machines, offering organized storage for accessories.

Product Features

- **Extra-Large Capacity:** Designed to accommodate oversized sewing and embroidery machines up to 23 inches in length.
- **Reinforced Bottom Support:** Features a high-density internal support board to prevent sagging and protect equipment.
- **Hybrid 4-Wheel System:** Equipped with two 360-degree spinner wheels at the front for flexible steering and two fixed rear wheels for stability and directional control.
- **Protective Construction:** Constructed with heavy-duty, tear-resistant outer fabric and thick padding for shock absorption.
- **Organized Storage:** Includes multiple expansive pockets for foot pedals, embroidery hoops, thread collections, and other accessories.
- **Foldable Design:** Can be folded for compact storage when not in use.

Compatibility

This case is designed to fit a range of popular sewing and embroidery machines. Before purchase, measure your machine to ensure it fits within the case dimensions.

Image: A visual guide indicating compatibility with various sewing machine brands such as SINGER, BROTHER, JANOME, and BERNINA, along with specific model numbers. The image also highlights the internal dimensions of 22 inches length and 14 inches height for the main compartment.

Product Dimensions

The external dimensions of the case are approximately 23 x 12.5 x 15 inches (Length x Width x Height). The utility cart handle extends up to 38.4 inches. The cart base is 23 inches long and 13 inches wide.

Setup

Follow these steps to assemble the rolling utility cart and attach the sewing machine case.

Your browser does not support the video tag.

Video: This video demonstrates the assembly of the rolling utility cart and the attachment of the sewing machine case, including how to open the case and utilize its storage features.

1. **Install Wheels on Utility Cart:**
    - Slide the fixed rear wheels into the designated rear slots on the utility cart base. Ensure they click securely into place.
    - Install the swivel casters at the front of the utility cart base. These wheels allow for flexible steering. Ensure they are firmly attached.

- **Important:** Verify all wheels are securely fastened. If any screws are missing or loose, contact customer support for assistance before use.

2. **Extendable Base Dolly:**
   - Press both side buttons on the utility cart handle.
   - Pull the base out until it clicks into its fully extended position.
3. **Attach Case to Cart:**
   - Place the sewing machine case onto the assembled utility cart.
   - Secure the case to the cart using the three Velcro straps located on the bottom of the case. Ensure the straps are tightly fastened around the cart's frame to prevent movement during transport.
4. **Adjust Lever Height:**
   - Press the button on the handle of the utility cart.
   - Adjust the lever to your desired height for comfortable rolling. Release the button to lock the handle in place.

Operation

Loading Your Machine

Carefully place your sewing or embroidery machine into the main compartment of the case. Ensure it sits flat on the reinforced bottom support board. Use any internal straps or padding if available to secure the machine and prevent shifting during transport.

Utilizing Storage Pockets

The case features multiple pockets for organizing your accessories:

- **Side Pockets:** Ideal for larger items like foot pedals or fabric pieces.
- **Front Pocket:** Suitable for manuals, patterns, or smaller tools.
- **Inner Mesh Pockets:** Designed for small notions such as bobbins, needles, scissors, and thread spools, keeping them visible and secure.

Transporting the Case

Once your machine and accessories are loaded and all zippers are closed, use the adjustable handle to roll the case. The hybrid wheel system provides both maneuverability and stability. For optimal control, push the case rather than pulling it from behind, especially when navigating turns or uneven surfaces.

Image: A user demonstrating the ease of transporting the CAB55 XXL Rolling Sewing Machine Case, highlighting its mobility and extended handle.

Maintenance

- **Cleaning:** Wipe the exterior fabric with a damp cloth and mild soap if necessary. Do not machine wash. Allow to air dry completely.
- **Storage:** When not in use, the case can be folded down for space-saving storage. Ensure the case is clean and dry before folding.
- **Wheel Inspection:** Periodically check the wheels and their attachments for any signs of wear or looseness. Tighten any loose screws if applicable.
- **Zipper Care:** Keep zippers clean and free of debris to ensure smooth operation. Lubricate with a zipper lubricant if they become stiff.

Troubleshooting

Wheels do not roll smoothly or detach:
Ensure all wheels are correctly installed and securely fastened. Check for any debris or thread caught in the wheel mechanisms. Verify that the utility cart base is fully extended and locked into place. If wheels continue to detach, inspect for missing screws or damaged components and contact customer support.

Case feels unstable or tips:
Ensure the sewing machine is centered and balanced within the case. Verify that the case is securely attached to the utility cart using all three Velcro straps. When rolling, maintain a steady pace and avoid sudden turns, especially with heavy loads. The hybrid wheel system is designed for stability, but proper loading and handling are crucial.

Zippers are stiff or stuck:
Check for any fabric or thread caught in the zipper teeth. Gently remove any obstructions. Apply a small amount of zipper lubricant or wax to the teeth to improve smoothness.

Specifications

Model Number	SW-03
Product Dimensions (Case)	23 x 12.5 x 15 inches (Length x Width x Height)
Item Weight	9.28 pounds
Manufacturer	CAB55
Wheel System	Hybrid 4-wheel (2 fixed rear, 2 swivel front)
