2. Safety Information

For safe use and to prevent injury or damage, please adhere to the following safety guidelines:

- Always secure the gazebo to a stable foundation using the provided ground anchors.
- Exercise caution when handling metal parts during assembly and disassembly to avoid cuts or pinches.
- Keep children and pets away from the gazebo during assembly, use, and when it is not in use to prevent accidents.
- Ensure all connections are tightened securely before use. Periodically check and re-tighten fasteners as needed.
- Do not hang excessively heavy items from the roof hooks or side shelves.

3. Setup and Assembly

The ALAULM Hardtop Grill Gazebo is designed for straightforward assembly. It is shipped in two boxes. For optimal

safety and ease, assembly is recommended with at least two to three people.

3.1. Unpacking and Part Identification

- Carefully unpack all components from both boxes.
- Verify all parts against the included parts list in your physical instruction manual. Contact customer support immediately if any parts are damaged or missing.
- Lay out all components on a clean, flat, and soft surface to prevent scratches.

3.2. Assembly Steps

Follow the detailed, step-by-step instructions provided in the physical user manual included with your product. Pay close attention to diagrams and screw types. Incorrect screw usage can affect stability.

4. Operating Instructions

The ALAULM Hardtop Grill Gazebo is designed for functional outdoor use, providing a dedicated space for grilling and outdoor activities.

4.1. Using Side Shelves and Hooks

- The two spacious side shelves are ideal for holding barbecue tools, seasonings, plates, and beverages.
- Five tool hooks are integrated for convenient storage of grilling utensils.
- The hooks on the top frame can be used to hang lightweight lighting fixtures, small fans, or decorative baskets. Ensure items hung from the top hooks do not exceed the gazebo's structural capacity.

4.2. Weather Protection

- The hard-top sloped roof design facilitates smoke exhaust from your grill.
- The roof also accelerates the flow and drainage of rainwater and snow, allowing for grilling in various weather conditions.
- The gazebo is designed with a wind resistance of up to 40 MPH and a snow load capacity of 40 PSF.

5. Maintenance

Regular maintenance will extend the life and appearance of your gazebo.

- **Cleaning:** Clean the metal frame and roof panels periodically with mild soap and water. Rinse thoroughly and dry to prevent water spots. Avoid abrasive cleaners or harsh chemicals.
- **Fastener Check:** Regularly inspect all bolts and screws to ensure they are tight. Re-tighten any loose fasteners to maintain structural integrity.
- **Rust Prevention:** Although the frame is rust-resistant, inspect for any signs of rust, especially in areas where paint might be chipped. Touch up with appropriate outdoor metal paint if necessary to prevent further corrosion.
- **Pole Openings:** Consider covering the open tops of the poles with caps (not included) to prevent debris or small animals from entering.
- **Winter Storage (Optional):** While designed for all-weather use, disassembling and storing the gazebo in a dry place during harsh winter conditions can further prolong its lifespan.

6. Troubleshooting

This section addresses common issues that may arise during assembly or use.

- **Difficulty during Assembly:**
  - Ensure you have at least two to three people for assembly, as some parts can be heavy and awkward.
  - Carefully review the diagrams in the physical instruction manual. Some parts may appear similar but have subtle differences that affect orientation.
  - Verify that you are using the correct screws for each step as indicated in the manual.
- **Missing or Damaged Parts:**
  - If you discover any damaged or missing parts upon unpacking or during assembly, contact customer support immediately for assistance.
- **Stability Concerns:**
  - Ensure the gazebo is anchored securely to the ground using all provided ground anchors.
  - Check that all bolts and connections are fully tightened.

- The gazebo features a reinforced structure with triangular support reinforcements for enhanced stability. Verify these are correctly assembled.
