# 3. Setup and Installation

Proper installation is crucial for the efficient operation of your portable air conditioner. Follow these steps carefully.

## Window Kit Installation

The adjustable window kit is designed to fit both horizontal and vertical sliding windows between 20 and 49 inches wide.

1. **Assemble Window Panel:** Connect the window panel pieces to match your window's width. The kit includes multiple panels for flexible adjustment.
2. **Install Window Panel:** Open your window and place the assembled window panel into the window opening. Extend the panel to fit snugly and secure it. Close the window against the panel to hold it in place.
3. **Attach Hose Connector to Unit:** Twist one end of the exhaust hose connector onto the exhaust outlet of the portable AC unit.

4. **Attach Hose to Window Kit:** Twist the other end of the exhaust hose connector onto the opening in the window panel. Ensure both connections are secure to prevent air leakage.
5. **Position Unit:** Place the portable AC unit on a flat surface near the window, ensuring the exhaust hose is not kinked or bent sharply. Maintain adequate clearance around the unit for proper airflow.

- **Power Button:** Turns the unit on or off.
- **Mode Button:** Cycles through Cool, Fan, and Dehumidifier modes.
- **Temperature Adjustment:** Use the Up/Down arrows to set the desired temperature (60-86°F).
- **Fan Speed:** Adjusts fan speed (Low/High) in Fan mode.
- **Timer:** Sets a 24-hour on/off timer.

- **Sleep Mode:** Activates quiet, energy-saving operation, often dimming the display.

## Operating Modes

## 5. Maintenance

Regular maintenance ensures optimal performance and extends the lifespan of your air conditioner.

### Cleaning the Air Filter

The unit is equipped with a washable filter. Clean the filter every two weeks or more frequently if the unit is used in a dusty environment.

Image: Details on maintenance, including how to remove and wash the air filter, and an illustration of the dual drainage options for the unit.

1. Turn off and unplug the air conditioner.
2. Locate the air filter cover (usually on the back or side of the unit).
3. Remove the filter.
4. Wash the filter under running water (warm, soapy water if heavily soiled).
5. Allow the filter to air dry completely before reinserting it.

6. Reinstall the filter and close the cover.

### Drainage

The unit features a self-evaporating system, meaning drainage is often not required in Cool mode under normal humidity conditions. However, in Dehumidifier mode or high humidity environments, manual drainage may be necessary.

- **Continuous Drainage:** For continuous drainage, connect a drain hose (not always included, check accessories) to the continuous drain port and direct it to a floor drain or bucket.
- **Manual Drainage:** When the internal water tank is full, the unit will typically display a 'Full Water' indicator (e.g., 'FL' or 'E5' error). Turn off the unit, place a shallow pan under the drain port, remove the drain plug, and allow the water to drain completely. Replace the drain plug securely.

## 6. Troubleshooting

Before contacting customer support, please refer to the following troubleshooting guide for common issues.

| Problem | Possible Cause | Solution |
|---|---|---|
| Unit does not turn on | No power; Power cord unplugged; Circuit breaker tripped. | Check power outlet; Ensure plug is fully inserted; Reset circuit breaker. |
| Insufficient cooling | Air filter dirty; Room too large; Doors/windows open; Exhaust hose blocked/leaking; Temperature setting too high. | Clean air filter; Ensure room size is within specifications (450 sq. ft.); Close all doors and windows; Check exhaust hose for kinks or leaks; Lower temperature setting. |
| Unit is noisy | Unit not on a flat surface; Air filter dirty; Normal operating sounds. | Place unit on a flat, stable surface; Clean air filter; Some operational noise (e.g., refrigerant flow, fan) is normal. |
| Water leakage | Drain plug loose; Unit tilted; Continuous drain hose not properly connected. | Ensure drain plug is secure; Place unit on a level surface; Check continuous drain hose connection. |
| "E5" Error Code | Water tank full. | Drain the internal water tank as described in the Maintenance section. |
