2. Important Safety Information

To prevent injury or damage to your product, please adhere to the following safety guidelines:

- **Weight Capacity:** Do not exceed the maximum load capacity. The top shelf supports up to **400 lbs**, and the lower shelf supports up to **330 lbs**. Overloading can cause structural failure and serious injury.
- **Anti-Tip Kit:** Always install the included anti-tip kit to secure the stand to a wall. This prevents tipping, especially with heavy aquariums or in households with children or pets.
- **Level Surface:** Ensure the stand is placed on a flat, level, and stable surface. Use the adjustable feet to compensate for uneven floors.
- **Electrical Safety:** The integrated power outlets are rated for 125V/12A (AC) and 5V/2A (USB). Do not exceed these ratings. Ensure all connected devices are suitable for aquarium use and follow their respective safety instructions. Keep the power cord and outlets dry.
- **Assembly:** Assemble the stand according to the instructions. Do not modify the product. Ensure all fasteners are

securely tightened before placing any weight on the stand.

- **Water Exposure:** While the surface is water-resistant, prolonged exposure to standing water should be avoided. Wipe up spills immediately to prevent damage.
