JUMMICO Self-Cleaning Cat Litter Box XXL

Model: JM-vc-0985GY-DE

1. INTRODUCTION

Thank you for choosing the JUMMICO Self-Cleaning Cat Litter Box XXL. This advanced litter box is designed to simplify cat care with its large capacity, intelligent controls, and comprehensive safety features. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to ensure optimal performance and a comfortable experience for both you and your cat.

2. SAFETY INFORMATION

The JUMMICO Self-Cleaning Cat Litter Box is equipped with multiple safety systems to protect your cat during operation:

- **Entrance Radar:** An integrated radar sensor at the entrance immediately stops the cleaning cycle if a cat approaches or enters the unit, preventing potential injuries or fright.
- **Internal Weight Sensor:** This sensor accurately detects the presence of your cat inside the litter box, blocking any accidental activations of the cleaning mechanism while the cat is present.
- **Round, Open Entrance:** The design of the entrance ensures safe and easy entry and exit for cats of various sizes, prioritizing their comfort and security.

3. PACKAGE CONTENTS

Please verify that all components are present in the package. The standard package includes:

- JUMMICO Self-Cleaning Cat Litter Box Unit
- Waste Collection Bin (15L capacity)
- Power Adapter
- Cat Litter Filter
- Cleaning Brushes
- Hygienic Bags
- Litter Pads
- User Manual

4. SETUP

4.1 Initial Placement

Place the litter box on a flat, stable surface in a location accessible to your cat and near a power outlet. Ensure there is enough space around the unit for proper ventilation and access for maintenance.

4.2 Litter Filling

The JUMMICO litter box features a spacious 90L internal capacity. Fill the main compartment with clumping cat litter, ensuring it does not exceed the maximum fill line indicated inside the unit. The 15L waste collection bin should be inserted into its designated slot at the bottom of the unit.

4.3 Power Connection

Connect the power adapter to the litter box and then plug it into a wall outlet. The unit will power on, and the intelligent control panel will illuminate.

4.4 App Connection (Optional)

For enhanced control and monitoring, download the JUMMICO app on your smartphone. Follow the in-app instructions to connect your device to the litter box via Wi-Fi. This will enable remote control and access to health monitoring features.

4.5 Cat Adaptation

For timid cats, it is recommended to allow approximately one week for gradual adaptation to the new litter box. You may place some used litter from their old box into the JUMMICO unit to provide a familiar scent. Initially, you might consider disabling the automatic cleaning mode until your cat is comfortable using the new litter box.

5. OPERATING INSTRUCTIONS

5.1 Control Panel Overview

The intelligent control panel provides a clear overview of the litter box's operational status. All functions can be managed with a simple button, making it easy to use even for those new to smart devices.

5.2 Automatic Cleaning

Once set up, the litter box will automatically detect when your cat has used it and initiate a cleaning cycle after a preset delay. The internal mechanism sifts the litter, depositing waste into the sealed collection bin.

5.3 Manual Cleaning

You can initiate a cleaning cycle manually at any time using the control panel or the smartphone app. Refer to the control panel icons for specific functions like immediate cleaning or emptying the waste bin.

5.4 App Control Features

The JUMMICO smartphone app offers advanced functionalities:

- **Health Monitoring:** Monitor your cat's health data, including weight, frequency of litter box visits, and duration of stay. This helps in promptly identifying any anomalies.
- **Remote Control:** Adjust cleaning settings, initiate cycles, and check the device status from anywhere.
- **Ambient Lighting:** Remotely adjust the color and brightness of the internal lighting to adapt to your home environment and your cat's habits.

6. MAINTENANCE

Regular maintenance ensures the longevity and hygienic operation of your JUMMICO litter box.

6.1 Waste Bin Emptying

The 15L waste collection bin can hold waste for up to 20 days for a single cat. When the bin is full, an indicator on the control panel or app will notify you. Simply slide out the bin, dispose of the contents, and replace it with a new hygienic bag before reinserting.

6.2 Cleaning the Unit

Periodically clean the interior and exterior of the litter box. Use a damp cloth and mild detergent. Avoid using abrasive cleaners or submerging the electronic components in water. The included cleaning brushes can assist in reaching difficult areas.

6.3 Litter Mat Cleaning

The integrated anti-sand plate and included litter pads help prevent litter tracking. Regularly clean the litter pads by shaking or vacuuming them to remove trapped litter. This significantly reduces household cleaning.

7. TROUBLESHOOTING

If you encounter any issues with your JUMMICO Self-Cleaning Cat Litter Box, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Power cable not connected; Power outlet malfunction	Ensure power cable is securely connected. Test the outlet with another device.

Problem	Possible Cause	Solution
Cleaning cycle does not start automatically	Cat still inside; Sensors obstructed; Manual mode active	Ensure cat has exited. Clean sensors. Check if the unit is in automatic mode via control panel or app.
App cannot connect to the device	Wi-Fi issues; Incorrect pairing process	Ensure your Wi-Fi is stable. Restart the litter box and your phone. Follow app pairing instructions carefully.
Inaccurate cat weight readings (for multi-cat households)	Multiple cats using the box in quick succession; Sensor calibration	Weight sensors may have difficulty distinguishing individual cats or accurately measuring weight if multiple cats use the box closely. Use weight data as a general trend rather than precise individual measurements in multi-cat homes. Ensure the unit is on a flat, stable surface.
Odor issues	Waste bin full; Inadequate litter; Bin not sealed properly	Empty the waste bin regularly. Ensure sufficient and appropriate clumping litter is used. Check that the waste bin is correctly sealed.

8. SPECIFICATIONS
