Homiflex MAHfleMjh8m

Homiflex Cat Litter Box Enclosure with Litter Collector

Model: MAHfleMjh8m

Introduction

Thank you for choosing the Homiflex Cat Litter Box Enclosure. This product is designed to provide a private and clean space for your cat's litter box, while also offering a functional piece of furniture for your home. This manual contains important information regarding the assembly, operation, and maintenance of your new enclosure. Please read it thoroughly before beginning assembly and retain it for future reference.

Safety Information

- Ensure all parts are securely fastened before use.
- Do not exceed the maximum weight capacity of 200 lbs on the top surface.
- Keep small parts away from children and pets during assembly.
- Place the enclosure on a flat, stable surface to prevent tipping.
- Only use the built-in power outlets for appropriate electrical devices, such as automatic litter boxes, water fountains, or cat feeders. Do not overload the outlets.

Package Contents

Please verify that all components are present and undamaged before assembly. If any parts are missing or damaged, contact Homiflex customer support.
(A detailed parts list with corresponding labels is typically included in the physical manual.)

Setup and Assembly

Assembly of the Homiflex Cat Litter Box Enclosure is designed to be straightforward. All components are clearly labeled, and step-by-step directions are provided. Two people are recommended for assembly, which typically takes about 30 minutes.

1. Unpack all components and lay them out on a clean, soft surface to prevent scratches.

2. Identify each part using the provided labels and the assembly diagram.
3. Follow the step-by-step instructions to connect the panels, shelves, and doors. Ensure all screws and fasteners are tightened securely.
4. Install the built-in power outlet unit into the designated slot on the top panel.
5. Insert the removable litter filter board into its designated slot.

Figure 1: Product Dimensions. This diagram illustrates the overall dimensions of the enclosure and the internal space available for various litter box types or cat beds. The enclosure measures 41.3 inches in length, 27.6 inches in width, and 33.5 inches in height. The internal compartment for an automatic litter box can accommodate sizes up to 27.56 inches wide, 23.62 inches deep, and 25.59 inches high.

Operating Instructions

Litter Box Placement

The enclosure is designed to accommodate various litter box types, including large automatic litter boxes. Place your chosen litter box or cat bed within the main compartment. The adjustable shelf can be positioned to suit your cat's needs and to deter dogs from accessing the litter area.

Using the Built-in Power Outlets

The top panel features a built-in power strip with two AC outlets and two USB ports. This allows for convenient powering of automatic litter boxes, water fountains, or cat feeders directly within or near the enclosure, eliminating the need for external extension cords.

Figure 2: Built-in Power Outlets. This image highlights the integrated power strip on the top surface of the enclosure, featuring two AC outlets and two USB ports for powering various pet accessories.

Litter Collector Function

The enclosure includes a removable filter board at the exit point. This board is designed to catch loose litter grains as your cat exits, helping to keep your floors clean. The collected litter falls into a tray below the board.

Figure 3: Removable Filter Board. This image shows the slatted filter board and how it can be easily removed for cleaning. A cat is seen standing on the board, demonstrating its function in trapping litter.

Cable Management

A discreet line hole is provided to organize cables from powered devices, ensuring a tidy and safe environment.

Figure 4: Humanized Line Hole. This close-up image illustrates the circular opening designed for routing power cords, keeping them organized and out of sight.

Maintenance

Cleaning the Enclosure

- Wipe down the exterior and interior surfaces with a soft, damp cloth.
- For stubborn stains, use a mild, non-abrasive cleaner. Avoid harsh chemicals that could damage the engineered wood finish.
- Ensure the enclosure is completely dry before allowing your cat to re-enter.

Cleaning the Litter Collector

- Regularly remove the filter board and empty the collected litter from the tray.
- Wash the filter board and tray with soap and water, then rinse thoroughly.
- Allow both components to dry completely before reinserting them into the enclosure.

Troubleshooting

Problem	Possible Cause	Solution
Litter tracking outside the enclosure	Litter collector board is full or dirty.	Empty and clean the litter collector board and tray regularly.
Power outlets not working	Power strip not plugged in; circuit breaker tripped; device malfunction.	Ensure the enclosure's power cord is securely plugged into a wall outlet. Check your home's circuit breaker. Test the device in another outlet.
Cat not using the enclosure	New environment; litter box type; location.	Allow your cat time to adjust. Ensure the litter box inside is clean and familiar. Try placing the enclosure in a quiet, accessible location.
