

BRITA UltraMax OB24/OB06

Brita UltraMax 27-Cup Water Filter Dispenser Instruction Manual

Model: UltraMax OB24/OB06

INTRODUCTION

The Brita UltraMax 27-Cup Water Filter Dispenser is designed to provide healthier, great-tasting tap water. This BPA-free system reduces the taste and odor of chlorine, along with other impurities such as mercury and copper. It is compatible with both Standard and Elite Brita water filters, offering a convenient and sustainable alternative to bottled water.

1. SETUP

1.1 Unpacking and Initial Cleaning

Carefully remove all components from the packaging. Wash the dispenser, lid, and reservoir with mild soap and warm water. Rinse thoroughly. Do not wash the filter with soap.

1.2 Filter Preparation

Before first use, soak the Brita Standard filter in cold water for 15 minutes. This helps remove any air bubbles and prepares the filter for optimal performance. After soaking, rinse the filter under running water for 15 seconds.

1.3 Installing the Filter

1. Insert the prepared filter into the opening in the bottom of the reservoir.
2. Press down firmly to ensure a snug fit. The filter should sit securely without a noticeable gap.
3. Place the reservoir into the dispenser base.

1.4 First Fills

Fill the reservoir with tap water. The first two full reservoirs of filtered water should be discarded or used for watering plants, as they may contain carbon dust. After the first two fills, your dispenser is ready for use.

*vs. tap water

of refilling the unit.

2. OPERATING INSTRUCTIONS

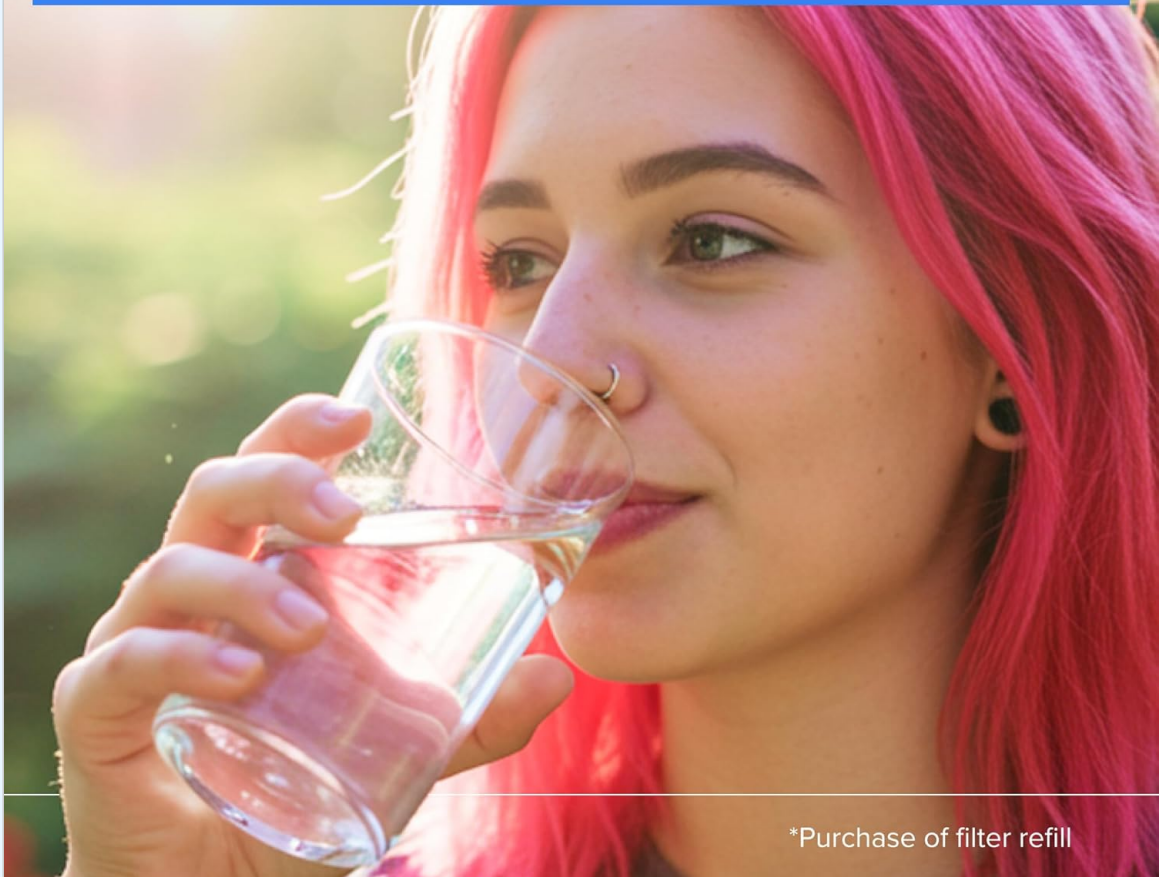

2.1 Filling the Dispenser

Open the lid of the dispenser. Pour tap water into the reservoir. The water will pass through the filter and collect in the main dispenser. Close the lid once the reservoir is full or when you have added the desired amount of water.

2.2 Dispensing Water

To dispense water, press the spigot lever located at the front base of the dispenser. Release the lever to stop the flow of water.

2.3 Fridge Placement

The Brita UltraMax dispenser is designed to be fridge-friendly, fitting conveniently on most refrigerator

shelves. Its slim profile allows for efficient use of space.

THE GOLD STANDARD OF FILTER PERFORMANCE

All Brita filters are put through rigorous testing to meet NSF/ANSI standards.

Based on health contaminant reduction, per WQA certifications.

3. MAINTENANCE

3.1 Filter Replacement

The dispenser features a sticker filter indicator to remind you when it's time to change the filter. For Standard filters, replace after 40 gallons or approximately every two months. For Elite filters, replace after 120 gallons or approximately every six months.

SMARTER FEATURES, SIMPLER LIVING

- ◆ SmartLight indicator
- ◆ Easy to pour and carry
- ◆ Made without BPA

3.2 Cleaning the Dispenser

Regularly clean the dispenser, lid, and reservoir with mild soap and warm water. Avoid abrasive cleaners. Ensure all parts are thoroughly rinsed and dried before reassembly. The filter should not be washed with soap.

4. TROUBLESHOOTING

- **Slow Filtration:** If water filters slowly, the filter may be clogged or not properly seated. Remove the filter, re-soak it if necessary, and reinsert it firmly. Ensure the filter is not past its recommended lifespan.
- **Unfiltered Water Leaking:** If unfiltered water appears in the filtered water section, the filter might not be seated correctly. Remove and firmly reinsert the filter into the reservoir opening.
- **Spigot Leaks:** Check if the spigot is properly tightened. If it continues to leak, ensure no debris is obstructing the seal.
- **Lid Difficult to Open:** The lid is designed for a secure fit. Apply gentle, even pressure when lifting.

Avoid forcing it to prevent damage.

- **Water Taste Not Improved:** Ensure the filter is correctly installed and has been primed (first two fills discarded). If the issue persists, the filter may need replacement, or the water source may have unusual contaminants not addressed by the filter type.

5. SPECIFICATIONS

Feature	Detail
Brand	BRITA
Model Name	UltraMax
Model Number	OB24/OB06
Capacity	27 Cups (13.5 Pounds)
Product Dimensions	18"L x 5.67"W x 10.47"H
Material	Plastic (BPA-Free)
Purification Method	Carbon Block
Filter Life Cycle (Standard)	2 Months (approx. 40 gallons)
Special Feature	Filter Change Indicator
Installation Type	Freestanding
