kuayvan 10.26-inch Wireless Carplay Screen

Kuayvan 10.26" Wireless Carplay Screen with 4K Dash Cam Instruction Manual

1. OVERVIEW

The Kuayvan 10.26" Wireless Carplay Screen is a versatile in-car entertainment and safety system designed to enhance your driving experience. It features a high-definition touchscreen display, an integrated 4K front dash camera, and a 1080P rear backup camera. This device supports wireless Apple CarPlay and Android Auto, mirror link functionality, voice control, and multiple audio output options for seamless integration with your vehicle.

Four Audio Outputs

Image 1.1: The Kuayvan 10.26 inch Wireless Carplay Screen with its main features highlighted.

Key Features:

- **Wireless CarPlay/Android Auto:** Seamless integration with your smartphone via Bluetooth, AUX, or FM transmitter for navigation, music, and communication.
- **Voice Control & Navigation:** Utilize Siri or Google Assistant for hands-free control of maps, calls, messages, and music, keeping your focus on the road.
- **10.26-inch IPS HD Touch Screen:** A large, high-definition display provides a comfortable viewing experience and

responsive touch interface.

- **Front 4K + Rear 1080P Camera:** Equipped with a 4K front dash recorder and a 1080P rear view backup camera, offering dual-screen recording, a 178° viewing angle, and enhanced safety for reversing and parking.
- **Mirror Link & Audio Output:** Supports screen mirroring for media playback and offers four audio output options: built-in speaker, CarPlay/Auto, FM transmission, and AUX connection to your car stereo.
- **Easy Installation & Wide Compatibility:** Designed for simple setup and compatible with most 12V-32V vehicles, including cars and trucks.

2. SETUP AND INSTALLATION

This section guides you through the installation process of your Kuayvan 10.26" Wireless Carplay Screen.

2.1 Package Contents

Before beginning installation, ensure all components are present:

- 10.26-inch Display Screen (Host)
- 4K Dash Camera (integrated into the host)
- 1080P Backup Camera
- Power Cord (Type-C 12-32V)
- AUX Cable
- Monitor Base (with 3M adhesive or suction cup options)
- User Manual
- TF Card (64GB, if included)

Easy Installation & Widely Compatible (For 12V-24V Vehicle)

Outstanding value and tech to add to any older vehicle to have modern conveniences: wireless CarPlay or android auto, BT, screen mirroring.

Image 2.1: Contents of the package and product dimensions.

2.2 Mounting the Display Screen

1. Choose a suitable location on your dashboard that does not obstruct your view or interfere with vehicle controls.
2. Attach the monitor base to the display screen.
3. Secure the monitor base to your dashboard using either the provided 3M adhesive pad or the suction cup mount. Ensure the surface is clean and dry before applying adhesive.

2.3 Connecting Power and Cameras

1. Connect the power cord to the Type-C port on the display screen.

2. Plug the other end of the power cord into your vehicle's 12V-32V power outlet (cigarette lighter socket).
3. Connect the 1080P backup camera to the designated input port on the display screen.
4. Route all cables neatly and securely to avoid interference with driving. Use cable clips or tuck them under trim panels if necessary.

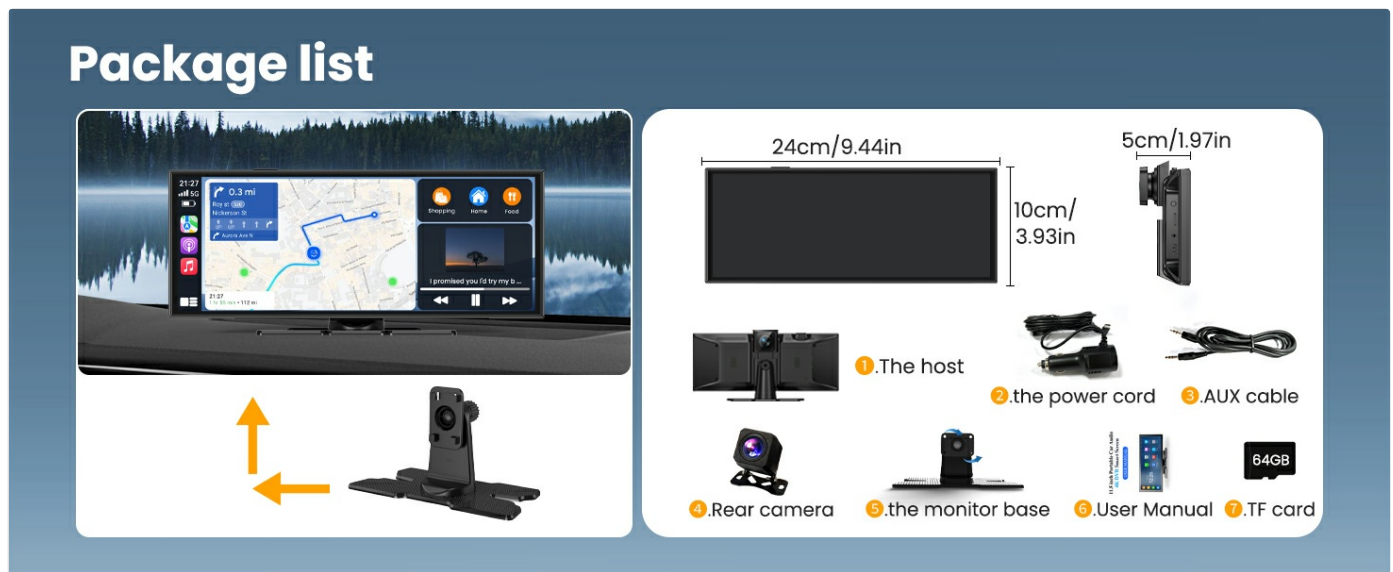

Image 2.2: Visual guide for the installation method, including cable routing.

2.4 Initial Power On

Once connected, start your vehicle. The display screen should power on automatically. Follow any on-screen prompts for initial setup.

2.5 Installation Videos

3. OPERATING INSTRUCTIONS

Learn how to operate your Kuayvan 10.26" Wireless Carplay Screen, including connecting your smartphone, using voice control, and managing camera functions.

3.1 Wireless Apple CarPlay Connection

1. On the display screen, tap the **Apple CarPlay** icon.
2. On your iPhone, turn on Bluetooth.
3. Pair your iPhone with the device via Bluetooth. Confirm the pairing request on both devices.
4. Once connected, the device will automatically switch to the CarPlay interface.

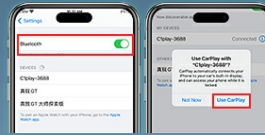

Wireless Apple carplay

1.Click Apple CarPlay

2.Turn on Bluetooth of your phone

3.Bluetooth Pairclick and Start Use CarPlay

4.Connection successful, device will automatically switch to carplay page.

Image 3.1: Step-by-step guide for connecting your iPhone to Wireless Apple CarPlay.

3.2 Wireless Android Auto Connection

1. On the display screen, tap the **Android Auto** icon.
2. On your Android phone, turn on Bluetooth.
3. Pair your Android phone with the device via Bluetooth. Confirm the pairing request on both devices.
4. Once connected, the device will automatically switch to the Android Auto interface.

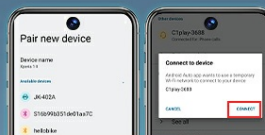

Wireless Android Auto

1.Click Android auto

2.Turn on Bluetooth of your phone

3.Bluetooth Pairclick and Start Use CarPlay

4.Connection successful, device will automatically switch to android auto page.

Image 3.2: Step-by-step guide for connecting your Android phone to Wireless Android Auto.

3.3 Voice Control and Navigation

The device supports voice commands through Siri (for Apple CarPlay) and Google Assistant (for Android Auto). This allows for hands-free operation of navigation, phone calls, messaging, and music playback.

- To activate, use the designated voice command (e.g., "Hey Siri" or "Hey Google") or tap the voice assistant icon on the screen.
- You can ask for directions, make calls, send texts, or play music without taking your hands off the wheel.

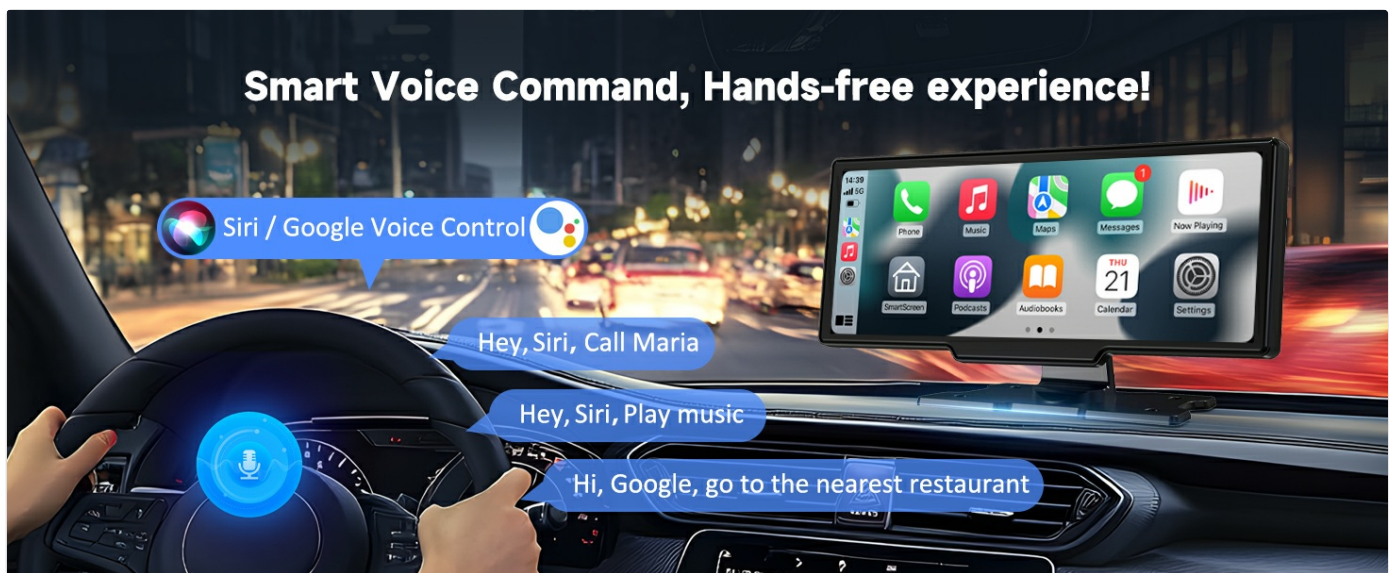

Image 3.3: Demonstrates GPS navigation apps and voice command functionality.

3.4 Mirror Link Functionality

The device supports screen mirroring from both Apple and Android devices, allowing you to display your phone's screen content directly on the Carplay screen.

3.4.1 Apple AirPlay Mirroring

1. On the display screen, tap the **Airplay** icon.
2. On your iPhone, open the Wi-Fi list and connect to the designated Wi-Fi network displayed on the Carplay screen.
3. On your iPhone, select **Screen Mirroring** and choose the Carplay device (e.g., "Smart Screen").
4. Connection successful. Your iPhone screen will now be mirrored.

Image 3.4: Instructions for setting up Apple AirPlay Mirroring.

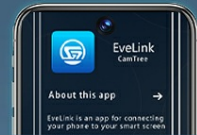

3.4.2 Wireless Android Screen Mirroring

1. On the display screen, select the **Super Link** icon.
2. Download and open the "Evelink" app on your Android phone.
3. Open the "Evelink" application and connect to the Wi-Fi network named "EVELINK-XXXXXX" (password: 12345678).
4. Connection successful. Your Android phone screen will now be mirrored.

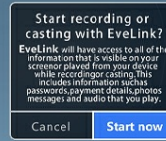

Wireless Android Screen Mirroring

1. Select 【super Link】

2. Download and then open "EveLink" app on phone

3. open the "EveLink" application connection Wi-Fi "EVELINK-XXXXXX" (pw:12345678)

4. Connection successful, the device automatically projects the screen

Image 3.5: Instructions for setting up Wireless Android Screen Mirroring.

3.5 Audio Output Options

The device offers four ways to output audio to your vehicle's sound system:

- **Built-in Speaker:** Audio plays directly from the device's internal speaker.
- **AUX Cable:** Connect the provided AUX cable from the device to your car's AUX input for direct audio transmission.
- **FM Transmission:** Transmit audio wirelessly to your car's FM radio by tuning both the device and your car radio to the same FM frequency.
- **Bluetooth 5.0 Stereo:** Connect your car's Bluetooth system to the device for high-quality wireless audio.

Image 3.6: Visual representation of the available audio output methods.

3.6 Dash Camera Functions

The integrated 4K front dash camera and 1080P rear backup camera provide comprehensive recording and parking assistance.

- **Dual-Screen Recording:** Both front and rear camera views can be recorded simultaneously, providing a complete record of your journeys.
- **178° Full-Viewing Angle:** The cameras offer a wide field of view to capture more of the road.
- **Safer Reversing and Parking:** The 1080P rear camera provides a clear view behind your vehicle with reversing reference lines for easier and safer parking maneuvers.

- **Loop Recording:** The device supports continuous loop recording, automatically overwriting the oldest footage when the memory card is full, ensuring you always have the latest recordings.

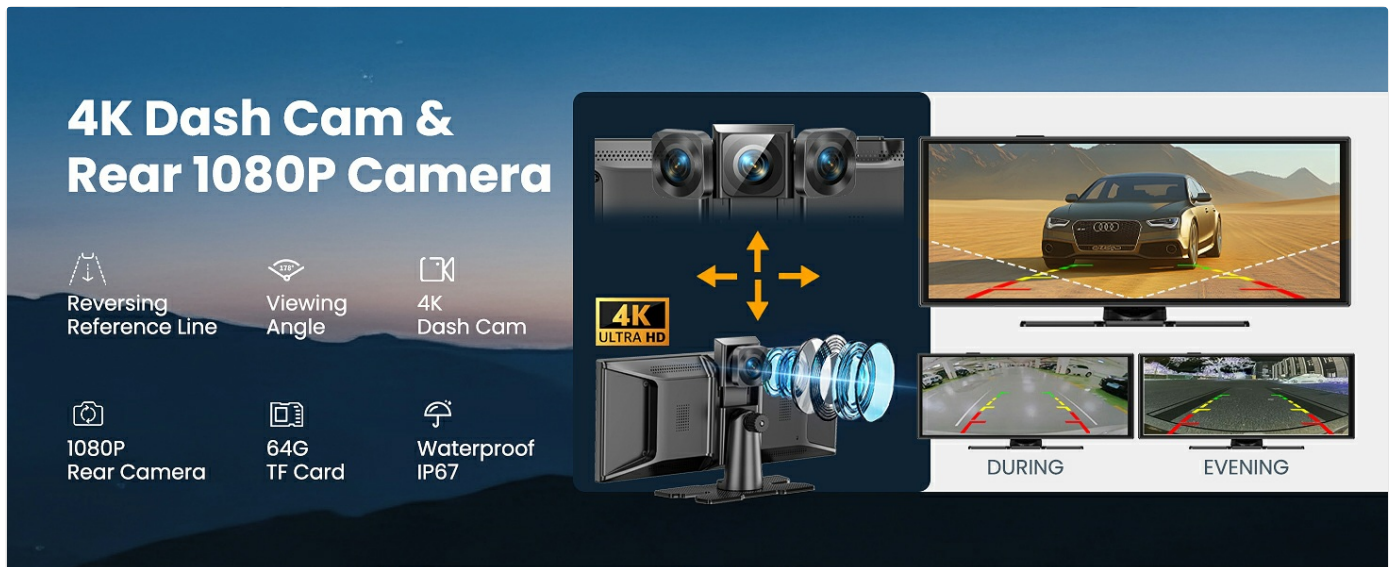

Image 3.7: Details on the front 4K and rear 1080P camera capabilities.

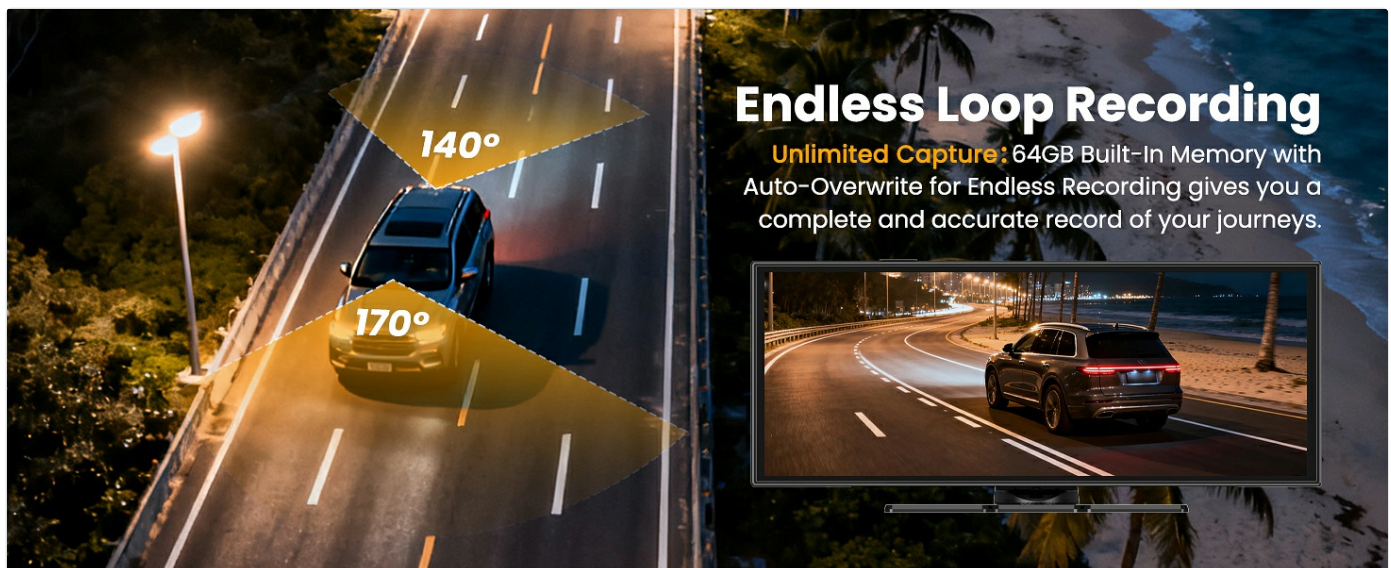

Image 3.8: Explanation of the endless loop recording function.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Kuayvan 10.26" Wireless Carplay Screen, follow these general maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the display screen. For stubborn smudges, lightly dampen the cloth with water or a screen-safe cleaner. Avoid abrasive materials or harsh chemicals.
- **Temperature:** Avoid exposing the device to extreme temperatures for extended periods.
- **Software Updates:** Periodically check for software updates to ensure optimal performance and access to new features. Refer to the manufacturer's website or contact support for update procedures.
- **Cable Management:** Regularly check all cables for wear and tear. Ensure they are securely connected and not interfering with vehicle operation.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your Kuayvan 10.26" Wireless Carplay Screen.

5.1 Intermittent Disconnection of Android Auto (Android 16)

If you experience frequent disconnections with Android Auto on an Android 16 device, follow these steps:

1. Scan the QR code in Image 5.1 or visit the provided link to download the necessary software [Download Software for Android 16 Fix](#).
2. Switch the smart screen to Evelink (Android mode).
3. Open the first downloaded mobile app and connect to the Smart Screen.
4. Wait for the app to prompt "Android 16 Auto Connect issue Fixed".
5. Switch back to Android Auto mode and connect to your Android device.
6. Confirm that Android Auto no longer disconnects.
7. Uninstall the downloaded software from your phone.

Image 5.1: Detailed steps and QR code for resolving Android 16 Auto connection issues.

5.2 SD Card Issues

If you encounter issues with the SD card, such as difficulty inserting/removing or formatting:

- Ensure the SD card is inserted correctly into the slot. Do not force it.
- If the card is not recognized, try removing and reinserting it.
- To format the SD card, navigate to the device's settings menu and look for a "Storage" or "Format SD Card" option. Follow the on-screen instructions. Formatting will erase all data on the card.
- If issues persist, try using a different compatible SD card.

5.3 General Connectivity Problems

If you experience problems with Bluetooth, Wi-Fi, or general connection stability:

- **Restart Devices:** Restart both the Carplay screen and your smartphone.
- **Forget Device:** On your smartphone, forget the Carplay device from your Bluetooth and Wi-Fi settings, then attempt to pair again.
- **Check for Interference:** Ensure there are no other devices causing wireless interference nearby.
- **Firmware Update:** Check if a firmware update is available for the Carplay screen, as updates often include connectivity improvements.
