Anti-Tipping Device Installation

After assembling the cabinet, securely attach the anti-tipping device to the wall using appropriate hardware for your wall type. This step is critical for safety, especially in households with children or pets.

3. OPERATING INSTRUCTIONS

Adjusting Shelves

The cabinet features three adjustable shelves with pre-drilled holes, allowing you to customize the shelf height to accommodate items of various sizes. To adjust, remove the shelf, reposition the shelf pins to the desired height, and then place the shelf back on the pins. For added stability, you can tighten screws to lock the shelves in place.

Door Alignment

If the cabinet doors are not perfectly aligned, micro-adjustments can be made using the hinges. Refer to the diagram below for specific screw adjustments:

- **Vertical Adjustment:** Loosen the mounting plate screws to move the door up or down.
- **Horizontal Adjustment:** Turn the hinge screw left or right for precise side-to-side alignment.
- **Depth Adjustment:** Loosen the indicated screws, adjust the doors in or out, then securely retighten them.

4. MAINTENANCE

Cleaning

The cabinet is crafted from MDF with a smooth, easy-to-clean surface. Simply wipe the cabinet with a dry, soft cloth to remove dust and light dirt. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.

General Care

- Periodically check all screws and connections to ensure they remain tight.
- Avoid placing excessively heavy items on shelves to prevent bowing or damage. The maximum weight capacity is 120 pounds for the entire unit.
- Keep the cabinet away from direct sunlight and excessive moisture to preserve its material integrity and finish.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your storage cabinet.

Common Issues and Solutions

Problem	Possible Cause	Solution
Cabinet feels unstable or wobbly.	Loose connections; uneven floor; anti-tipping device not installed.	Ensure all screws are tightened. Place shims under legs if floor is uneven. Install the anti-tipping device securely to a wall.
Doors do not close properly or are misaligned.	Hinges require adjustment.	Refer to the "Door Alignment" section (Section 3) for detailed adjustment instructions.
Unpleasant odor from the cabinet.	New product off-gassing.	Ventilate the room thoroughly. Wipe surfaces with a damp cloth and mild soap, then dry completely. The odor should dissipate over time.

If you encounter an issue not listed here, or if the suggested solutions do not resolve the problem, please contact JASIWAY customer support for assistance.
