

PUR FM2500V

PUR Plus Faucet-Mount Water Filtration System FM2500V User Manual

INTRODUCTION

The PUR Plus Faucet-Mount Water Filtration System (Model FM2500V) is designed to provide filtered water directly from your faucet. This system utilizes advanced 3-in-1 filtration technology to reduce various chemical and physical substances, including lead, from your drinking water. It is certified by WQA and NSF for its filtration capabilities. The system features an easy, tool-free installation and an on/off lever for switching between filtered and unfiltered water. A built-in filter change light indicates when a replacement filter is needed.

Power.

Certified to reduce
10x more

chemical & physical substances
than Brita's® leading pitcher filter.*

Certified to filter **Lead**.

Reduces **Chlorine** for Great Taste.

Value.

Save Big

Put up to \$30 back in your wallet
every week when you switch from
bottled water to a **PUR system**.[†]

SETUP AND INSTALLATION

The PUR Plus Faucet-Mount Water Filtration System is designed for quick and easy installation without the need for tools. It is compatible with most standard faucets but is not intended for use with pull-out or handheld models.

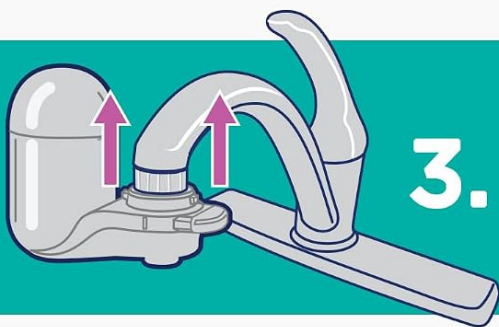

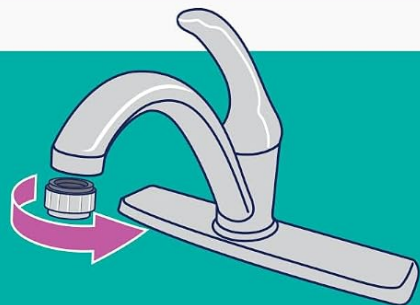

1. **Prepare your faucet:** Remove the existing aerator from your faucet. Ensure the faucet threads are clean and free from debris.
2. **Attach the adapter:** Select the appropriate adapter from the included set that fits your faucet. Screw the adapter onto the faucet threads until secure. Do not overtighten.
3. **Attach the filter system:** Align the PUR Plus Faucet-Mount Water Filtration System with the attached adapter. Push the system onto the adapter until it clicks securely into place.
4. **Flush the filter:** Before first use, turn on the cold water and run it through the filtered setting for approximately 5 minutes to flush the new filter.

3 STEP EASY INSTALLATION

1. Remove aerator

2. Attach adapter

3. Attach with 1 Click

OPERATING INSTRUCTIONS

The PUR Plus Faucet-Mount Water Filtration System is designed for simple operation.

- **Switching between filtered and unfiltered water:** The system is equipped with an on/off lever. To dispense filtered water, move the lever to the filtered position. To dispense unfiltered water for washing dishes or other tasks, move the lever to the unfiltered position.
- **Water flow:** Filtered water will typically flow at a slower rate than unfiltered water, which is normal due to the filtration process.
- **Temperature:** Always use cold water when dispensing filtered water to ensure optimal filter performance and longevity.

MAINTENANCE

Regular maintenance, primarily filter replacement, is crucial for ensuring the continued performance of your PUR Plus Faucet-Mount Water Filtration System.

- **Filter Lifespan:** Each PUR Plus filter lasts for approximately 3 months or filters up to 100 gallons of water, whichever comes first.
- **Filter Change Indicator:** The system includes a filter change light that provides visual cues for filter status:
 - **Green Light:** Filter is working correctly.
 - **Yellow/Orange Light:** It is time to change the filter soon.
 - **Red Light:** The filter has reached the end of its life and needs immediate replacement.
- **Replacing the Filter:**
 - a. Twist off the filter housing cover.
 - b. Remove the old filter cartridge.
 - c. Insert a new Genuine PUR Plus Faucet Mount Replacement Filter. Ensure it is seated correctly.
 - d. Replace the filter housing cover, twisting until secure.
 - e. Flush the new filter by running cold water through the filtered setting for 5 minutes.
- **Cleaning:** Periodically wipe down the exterior of the system with a damp cloth. Do not use abrasive cleaners.

NEVER MISS A FILTER CHANGE

TROUBLESHOOTING

If you encounter issues with your PUR Plus Faucet-Mount Water Filtration System, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Water leaking from the system.	Loose connection, missing/damaged washer, incorrect adapter.	Ensure the adapter is tightly screwed onto the faucet and the filter system is securely clicked onto the adapter. Check that all washers are properly seated. If leaking persists, try a different adapter or contact support.

Problem	Possible Cause	Solution
No filtered water or very slow flow.	Clogged filter, filter not seated correctly, low water pressure.	Check the filter change indicator; if it's red or yellow/orange, replace the filter. Ensure the filter cartridge is properly inserted. Verify household water pressure.
Filtered water tastes or smells unusual.	New filter not flushed, expired filter, filter damage.	Flush new filters for 5 minutes before first use. Replace the filter if it's old or the indicator light is red. Ensure only cold water is used for filtration.
Filter change light not working.	Battery issue (if applicable), system malfunction.	Some models have non-replaceable batteries for the indicator. If the light fails prematurely, contact customer support.

SPECIFICATIONS

- **Brand:** PUR
- **Model Number:** FM2500V
- **Product Dimensions:** 6.4"L x 2.8"W x 5.4"H
- **Material:** Plastic
- **Capacity:** 100 gallons per filter
- **Filter Life Cycle:** Up to 3 months
- **Installation Type:** Faucet Mount
- **Purification Method:** Ion Exchange
- **Special Feature:** Change Filter Indicator
- **Lower Temperature Range:** 34 °F (1 °C)
- **Upper Temperature Rating:** 100 °F (38 °C)
- **Supported Water TDS Level Maximum:** 500 PPM
- **Item Weight:** 1.2 pounds
- **GTIN/UPC:** 328785003093

WARRANTY AND SUPPORT

For warranty information, product support, or to purchase genuine replacement filters, please refer to the official PUR website or contact PUR customer service directly. Using non-genuine PUR filters may void your warranty and compromise filtration performance.
