2. Assembling the Base Units

MAINTENANCE

1. Cleaning

Regularly wipe the desk surfaces with a soft, damp cloth. For spills, clean immediately with a mild soap solution and dry thoroughly. Avoid abrasive cleaners or harsh chemicals, as these can damage the laminated finish.

2. General Care

- Avoid placing hot items directly on the desktop; use coasters or protective pads.

- Do not drag heavy objects across the surface to prevent scratches.
- Periodically check and tighten all screws to maintain stability.
- Keep the desk away from direct sunlight and excessive moisture to prevent material degradation.

TROUBLESHOOTING

1. Desk Wobbles

If the desk feels unstable, ensure it is placed on a level surface. Check all assembly screws and tighten them if necessary. Uneven flooring can be compensated for by placing shims under the desk legs.

2. Drawers Stick or Don't Close Properly

Verify that the drawer slides are correctly installed and aligned. Ensure no objects are obstructing the drawer's path. If the issue persists, check if any screws on the slides or drawer boxes are loose.

3. Power Outlet Not Working

Ensure the desk's main power cord is securely plugged into a functional wall outlet. Check the on/off switch on the power strip to ensure it is in the "on" position. If the issue continues, try plugging another device into the wall outlet to confirm the outlet is working. If the power strip itself is faulty, contact customer support.
