2. Product Overview

The maleous MALEOUS 260 system includes two in-ear hearing aids and a portable charging case. Each hearing aid is designed for comfort and discreet wear.

Components:

- Two (2) In-Ear Hearing Aids
- One (1) Portable Charging Case
- Multiple Sizes of Earbud Tips (Gray and Beige)
- USB Charging Cable (not explicitly mentioned but implied for rechargeable devices)
- Cleaning Brush (not explicitly mentioned but implied for maintenance)

3. Key Features

- **Ultra-Comfortable & Discreet Fit:** Weighing only 2g, with an ergonomic in-ear design and soft, skin-friendly silicone earbud tips for all-day wear without pressure or irritation.
- **Effortless Operation:** Intuitive one-touch control for mode switching and volume adjustment.
- **Advanced Noise Reduction:** Equipped with an upgraded noise reduction chip and sound recognition technology to filter out background noise and enhance speech clarity.
- **Long Battery Life:** Up to 20-60 hours of continuous use on a single charge, with the portable charging case extending total battery life to 80 hours.
- **Fast Charging:** Fully charges in 1.5-2 hours.
- **Automatic Functions:** Supports automatic power-on and power-off when placed into or taken out of the charging case.

- **Multiple Sound Modes:** Includes Normal, Noise Reduction, and Restaurant modes to adapt to various environments.
- **Adjustable Volume:** 5 distinct volume levels for personalized listening.

4. Setup

4.1 Charging the Hearing Aids

1. Place the hearing aids into the charging case. Ensure they are correctly seated in their respective slots (L for left, R for right).
2. Connect the charging case to a power source using the provided USB cable.
3. The indicator lights on the charging case will show the charging status. A full charge typically takes 1.5 to 2 hours.
4. Once fully charged, the hearing aids can provide 20-60 hours of use, and the charging case can extend this to 80

hours total.

4.2 Fitting the Hearing Aids

1. Select the appropriate earbud tip size from the multi-size kit (three sizes each in gray and beige). Choose a tip that provides a snug, comfortable fit without causing pressure or discomfort.
2. Gently insert the hearing aid into your ear canal. The ergonomic design is intended to fit the natural curve of the ear.
3. Ensure the hearing aid is securely in place and feels comfortable. It should not feel loose or cause any foreign body sensation.

5. Operating Instructions

5.1 Power On/Off

- **Power On:** The hearing aids automatically power on when removed from the charging case.
- **Power Off:** The hearing aids automatically power off when placed back into the charging case.

5.2 Mode Selection

The device features intuitive one-touch operation to switch between 3 professional modes:

- **Normal Mode:** Standard amplification for everyday listening.
- **Noise Reduction Mode:** Filters out background noise for clearer speech in moderately noisy environments.
- **Restaurant Mode:** Optimized for challenging noisy environments like restaurants, focusing on speech frequencies.

Press the control button briefly to cycle through the available modes.

5.3 Volume Adjustment

The hearing aids offer 5 volume levels. To adjust the volume:

- Press and hold the control button to increase or decrease the volume. The device will cycle through the 5 levels.
- Release the button when the desired volume level is reached.

6. Maintenance

6.1 Cleaning the Hearing Aids

- Regularly clean your hearing aids to prevent wax buildup and ensure optimal sound quality.

- Use a soft, dry cloth or the provided cleaning brush to gently wipe the surface of the hearing aids.
- Carefully remove any earwax or debris from the earbud tips and sound outlet.
- Do not use water, solvents, or cleaning solutions directly on the hearing aids, as this can damage the electronic components.
- Replace earbud tips periodically or if they become damaged.

6.2 Storage

- When not in use, store the hearing aids in their charging case to protect them from dust, moisture, and physical damage.
- Store the charging case and hearing aids in a cool, dry place, away from direct sunlight and extreme temperatures.

7. Troubleshooting

If you experience issues with your maleous MALEOUS 260 hearing aids, refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
No sound or low volume	• Hearing aid is off or low battery. • Volume setting is too low. • Earbud tip or sound outlet is blocked by earwax.	• Ensure hearing aid is powered on and charged. • Increase the volume level. • Clean the earbud tip and sound outlet.
Buzzing or whistling (feedback)	• Improper fit in the ear. • Volume is too high. • Earwax buildup in ear canal.	• Re-insert the hearing aid for a snug fit, try a different earbud tip size. • Reduce the volume. • Consult a healthcare professional for earwax removal if necessary.
Sound is distorted or unclear	• Earbud tip or sound outlet is partially blocked. • Low battery. • Environmental noise interference.	• Clean the hearing aid thoroughly. • Recharge the hearing aid. • Switch to Noise Reduction or Restaurant mode.
Short battery life	• Hearing aids not fully charged. • Aging battery.	• Ensure proper charging for 1.5-2 hours. • Contact customer support if battery life significantly degrades over time.

8. Specifications
