Parsagi PL-L

Parsagi 72-inch Large Plant Stand with Grow Lights

MODEL: PL-L

Brand: Parsagi

INTRODUCTION

Thank you for choosing the Parsagi 72-inch Large Plant Stand with Grow Lights. This product is designed to provide a functional and aesthetically pleasing solution for displaying your plants while offering optimal lighting conditions for their growth. This manual contains important information regarding the assembly, operation, maintenance, and troubleshooting of your plant stand. Please read it thoroughly before assembly and retain it for future reference.

SAFETY INFORMATION

- Always assemble the unit on a soft, clean surface to prevent scratches.
- Ensure all screws and fasteners are securely tightened before placing plants or other items on the stand.
- Do not exceed the maximum weight capacity of 15 lbs per shelf.
- Keep electrical components (grow lights, power cords) away from water and moisture.
- Do not attempt to modify the electrical wiring or components of the grow lights.
- Place the plant stand on a level and stable surface to prevent tipping.
- Keep small parts and packaging materials away from children and pets.

PRODUCT OVERVIEW

The Parsagi Plant Stand (Model PL-L) is a 5-tier metal and wood structure designed for multiple plants. It includes integrated full-spectrum LED grow lights to support plant health and growth.

Key Features:

- **Full Spectrum LED Grow Lights:** Three integrated LED strips provide natural white light (RA97.8, 4333K) for

optimal plant photosynthesis and vivid display.

- **Adjustable Brightness & Timer:** Features 10 dimmable levels and 3 timer settings (3H, 9H, 12H) for flexible plant care.
- **Spacious 5-Tier Design:** Offers ample space for over 15 medium-sized pots, including a top hanging bar for trailing plants.
- **Durable Construction:** Made with thick steel tubing and baked-on finish for sturdiness and rust resistance. Each shelf supports up to 15 lbs.
- **Multi-functional:** Suitable for displaying plants, books, crafts, and decorative items in various indoor settings.

Setup and Assembly

Before beginning assembly, ensure all parts are present and undamaged. Refer to the included parts list and hardware pack. Assembly tools are provided.

Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a soft, clean surface to prevent scratches. Verify all numbered parts and hardware are accounted for against the packing list.
2. **Assemble Base Frame:** Begin by connecting the base metal frames using the provided screws and assembly tools. Ensure all connections are snug but do not overtighten initially.
3. **Attach Vertical Supports:** Secure the main vertical support beams to the assembled base. Pay attention to the orientation of the beams as some may have pre-drilled holes for shelves or grow lights.
4. **Install Shelves:** Attach the wooden shelves to the metal frame at their designated positions. The shelves are designed to fit specific sections of the frame. Secure each shelf with the appropriate screws.
5. **Install Top Hanging Bar:** Secure the top hanging bar between the upper vertical supports. This bar is designed for hanging plants.
6. **Mount Grow Lights:** Attach the three LED grow light strips to the underside of the designated shelves or top bar. Ensure they are securely fastened and the cables are routed neatly.
7. **Connect Power:** Connect the grow light power adapter to the LED strips and then to a standard electrical outlet.
8. **Final Tightening:** Once the entire structure is assembled, go back and gently tighten all screws to ensure stability. Do not overtighten to avoid stripping screws or damaging components.
9. **Adjust Feet:** The stand includes adjustable feet. Level the stand by rotating the feet until it sits firmly and without wobbling on your floor.

Operating Instructions for Grow Lights

The integrated LED grow lights are designed to provide optimal lighting for your plants. They feature adjustable brightness and a timer function.

Powering On/Off:

- Plug the power adapter into a wall outlet. The lights will typically turn on to their last setting or a default setting.
- Use the power button on the inline controller to turn the lights on or off manually.

Adjusting Brightness:

- The grow lights offer 10 dimmable brightness levels (from 10% to 100%).
- Press the brightness adjustment buttons (usually marked '+' and '-') on the controller to increase or decrease the light intensity.
- Adjust the brightness according to your plants' specific needs and the ambient light conditions of the room.

Setting the Timer:

- The timer function allows you to set the lights to automatically turn off after a specified duration. Available settings are 3 hours (3H), 9 hours (9H), and 12 hours (12H).
- Press the timer button on the controller to cycle through the available timer options. The indicator light will confirm the selected duration.
- Once a timer is set, the lights will operate for the chosen duration and then turn off. They will automatically turn on again at the same time the next day.
- **Important:** If the power is disconnected (unplugged or power outage), the timer setting will be reset. You will need to re-set the timer once power is restored.

Maintenance

- **Cleaning:** Wipe down the metal frame and wooden shelves with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish. Ensure grow lights are off and unplugged before cleaning.
- **Dusting:** Regularly dust the grow light strips to ensure maximum light output. Dust accumulation can reduce efficiency.
- **Check Connections:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain stability.
- **Water Spills:** Immediately wipe up any water spills on the shelves or frame to prevent water damage to the wood and rust on the metal.

Troubleshooting

Problem	Possible Cause	Solution
Grow lights do not turn on.	Power cord not plugged in. Power outlet is not active. Controller is off. Faulty connection.	Ensure the power adapter is securely plugged into a working outlet. Test the outlet with another device. Press the power button on the inline controller. Check all connections between the LED strips and the power adapter.
Timer function is not working correctly.	Power interruption. Incorrect timer setting.	The timer resets after power loss. Re-set the timer after any power disconnection. Ensure the desired timer duration (3H, 9H, or 12H) is selected on the controller.
Stand feels wobbly or unstable.	Loose screws. Uneven floor. Overloaded shelves.	Check and tighten all assembly screws. Adjust the leveling feet at the bottom of the stand. Ensure no shelf exceeds the 15 lbs weight capacity. Redistribute weight if necessary.

Specifications

- **Model:** PL-L
- **Brand:** Parsagi
- **Dimensions (L x W x H):** 39.4 x 9.4 x 71.98 inches
- **Material:** Metal, Wood
- **Color:** Black
- **Number of Tiers:** 5
- **Shelf Load Capacity:** Up to 15 lbs per shelf
- **Grow Lights:** 3 Full Spectrum LED Strips (8W each, 24W total)
- **Light Color Temperature:** 4333K Natural White
- **Color Rendering Index (CRI):** RA97.8
- **Brightness Levels:** 10 Dimmable levels (10% - 100%)
- **Timer Settings:** 3H, 9H, 12H
- **Special Features:** Adjustable leveling feet, top hanging bar

Warranty and Support

This product is covered by a manufacturer's warranty. For specific warranty details, please refer to the warranty card included in your packaging or contact Parsagi customer support directly. If you encounter any issues or have questions regarding your plant stand, please reach out to Parsagi customer service for assistance.
Contact Information: Please refer to the contact details provided with your purchase or visit the official Parsagi website for support.

Additional Information

No official product videos from the seller were available for embedding in this manual. For visual guides or further product information, please check the product listing page or the manufacturer's website.
