6. Troubleshooting

If you encounter issues with your desk, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Desk is wobbly or unstable.	Loose fasteners; uneven floor.	Ensure all screws and bolts are fully tightened. Adjust leveling feet if present, or place shims under legs on uneven surfaces.
Charging station not working.	Not plugged in; power outage; faulty device cable.	Check if the charging station's power cord is securely plugged into a working wall outlet. Test with a different device cable.
LED lights not turning on or functioning incorrectly.	Loose connection; controller issue; power supply problem.	Verify all LED strip connections to the controller and power supply. Ensure the power supply is plugged in. Try replacing controller batteries if applicable. If LED light clips do not stick, use additional adhesive tape (not supplied).
Difficulty during assembly.	Misinterpretation of instructions; incorrect part orientation.	Review the step-by-step instructions carefully, paying close attention to diagrams and part numbers. If a step seems unclear, re-examine the previous steps to ensure correct orientation of parts.
