Setup and Assembly

This Murphy bed is designed for hassle-free setup. It is recommended that two adults assemble this product. Ensure you have adequate space and all parts are present before beginning.

Required Tools (Not Included):

- Phillips Head Screwdriver
- Hammer
- Measuring Tape
- Stud Finder (for wall anchoring)
- Drill with appropriate drill bits

Parts List:

Refer to the included hardware package and assembly diagrams for a complete list of parts and fasteners. Verify all components are present and undamaged before proceeding.

Assembly Steps:

1. **Unpack and Identify:** Carefully unpack all components and lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided diagrams.
2. **Assemble Cabinet Frame:** Follow the step-by-step instructions in your separate assembly guide to construct the main cabinet frame and the integrated bookcase. Ensure all cam locks and screws are securely fastened.
3. **Attach Bed Mechanism:** Install the folding bed mechanism into the cabinet frame according to the instructions. Pay close attention to the orientation of the spring or piston system.
4. **Install Bed Frame:** Attach the bed frame to the folding mechanism. Ensure it moves smoothly and locks into place when both open and closed.
5. **Wall Anchoring:** This is a critical safety step. Locate wall studs using a stud finder. Securely anchor the top of the Murphy bed cabinet to at least two wall studs using the provided anti-tip hardware. *Do not skip this step.*
6. **Install Desk/Shelf Panel:** Attach the multi-functional panel that serves as a desk or additional shelf, ensuring it operates smoothly.
7. **Final Checks:** Double-check all connections and fasteners. Ensure the bed opens and closes without obstruction.

Operating Instructions

Opening the Bed:

1. **Clear Area:** Ensure the area in front of the Murphy bed is clear of any obstructions.
2. **Unlock (if applicable):** If your model has a locking mechanism, disengage it.
3. **Pull Down:** Grasp the handle firmly with both hands. Gently pull the bed frame downwards towards you. The spring or piston mechanism will assist in the lowering process.
4. **Extend Support Legs:** As the bed lowers, extend the support legs to their fully locked position on the floor. Ensure they are stable before releasing the bed.
5. **Position Mattress:** Place your mattress onto the bed frame.

Closing the Bed:

1. **Remove Mattress/Bedding:** Remove the mattress and any bedding from the bed frame.
2. **Retract Support Legs:** Fold or retract the support legs.
3. **Lift Bed Frame:** Grasp the handle with both hands and gently lift the bed frame upwards. The mechanism will assist in raising the bed back into the cabinet.
4. **Secure:** Push the bed frame fully into the cabinet until it is flush and securely latched (if applicable).

Using the Integrated Desk/Shelves:

The integrated panel functions as both a desk and a storage shelf. When the bed is closed, the panel can be lowered to create a desk surface or kept upright to serve as a shelf.

- **Desk Function:** To use as a desk, ensure the bed is fully closed. Gently lower the panel until it is horizontal and stable.
- **Shelf Function:** When the bed is closed, the panel can remain upright, providing additional shelving space.

- **Bookcase:** The side bookcase offers permanent open storage for books, decor, or other items.

- **Hardware Check:** Periodically inspect all screws, bolts, and connections. Re-tighten any loose hardware to ensure stability and safety.
- **Mechanism Lubrication:** If the folding mechanism becomes stiff or noisy, apply a small amount of silicone-based lubricant to moving parts. Do not use oil-based lubricants.
- **Wall Anchors:** Regularly check the wall anchors for security. Ensure the bed remains firmly attached to the wall.

Troubleshooting

Problem	Possible Cause	Solution
Bed is difficult to open or close.	Loose hardware; mechanism needs lubrication; obstruction.	Check and tighten all fasteners. Lubricate moving parts with silicone spray. Ensure no objects are blocking the bed's path.
Bed does not stay closed.	Latching mechanism not engaged; incorrect assembly of mechanism.	Ensure the bed is pushed fully into the cabinet until the latch engages. Review assembly steps for the bed mechanism.
Bed feels unstable when open.	Support legs not fully extended; loose wall anchors; uneven floor.	Ensure support legs are fully extended and locked. Check wall anchors for security. Place shims under legs if floor is uneven.
