Garvee 15JH

Garvee 6x8 FT Greenhouse Instruction Manual

Model: 15JH

Introduction

Thank you for choosing the Garvee 6x8 FT Greenhouse. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your greenhouse. Please read all instructions carefully before beginning assembly and retain this manual for future reference.
This greenhouse is designed to provide a protected environment for plants, featuring durable polycarbonate panels and an aluminum frame. It includes a roof vent for air circulation and a drainage system for water management.

Safety Information

- Always wear appropriate safety gear, including gloves and eye protection, during assembly.
- Ensure the installation area is level and clear of obstructions.
- Do not attempt assembly on windy or rainy days.
- It is recommended that two people assemble the greenhouse for safety and ease.
- Securely anchor the greenhouse to the ground to prevent damage from strong winds.
- Keep children and pets away from the assembly area.
- Do not climb on the greenhouse structure.

Setup and Assembly

The Garvee 6x8 FT Greenhouse is designed for straightforward assembly. Follow the detailed instructions provided in the included manual and consider watching the official assembly videos for visual guidance.

Preparation

- **Unpacking:** The greenhouse typically arrives in two labeled boxes (one for framing, one for panels). These may arrive at different times.
- **Part Sorting:** Before starting, sort all metal parts according to their labels (e.g., 10s, 20s).
- **Panel Film:** Remove the protective film from both sides of the polycarbonate panels as you install them. The white film side should face outwards.
- **Tools Required:** Hex screwdriver, star point screwdriver, flathead screwdriver or drill, rubber mallet/hammer, needle-nose pliers.

Site Selection

Install the greenhouse on flat, level ground. Recommended locations include beside fences, in courtyard corners, behind hedges, or next to garages. Avoid steep slopes or poorly drained areas. Use the provided ground spikes to fix the greenhouse securely.

Assembly Steps Overview

1. Assemble the base frame on your prepared level surface.
2. Construct the side walls, inserting the polycarbonate panels into the aluminum channels. Ensure panels fit perfectly before tightening.
3. Install the roof structure and panels. The PC panel snap-in locking design ensures a tight seal without the need for glue.
4. Attach the roof vent and door. The door features a two-way design for flexible access.
5. Secure the greenhouse using the reinforced ground nails and mid-post auxiliary supports.

Operating Your Greenhouse

Ventilation

The greenhouse features a roof vent and a sliding door for optimal air circulation. Adjust the roof vent to one of three levels (Min: 6.3", Max: 10") to control internal temperature and humidity. The lockable door provides secure access while allowing for partial opening for additional ventilation.

UV Protection

The polycarbonate panels are equipped with a UV coating on the surface. This coating protects your plants from harmful sun rays while allowing maximum beneficial sunlight exposure for healthy growth.

Water Management

A drainage system with a sink at the top is integrated to efficiently collect and drain rainwater. This feature can provide a sustainable water source for your plants and simplifies maintenance.

Image: Detail of the integrated gutter and funnel system.

Maintenance

- **Cleaning:** Regularly clean the polycarbonate panels with mild soap and water to maintain light transmission. Avoid abrasive cleaners or tools that could scratch the surface.

- **Frame Inspection:** Periodically check all bolts and connections to ensure they remain tight. Tighten any loose fasteners.
- **Drainage System:** Keep the gutters and funnels clear of debris to ensure efficient rainwater collection.
- **Winter Care:** The greenhouse is designed to support weight capacities up to 110 LBS/sq ft. However, in areas with heavy snowfall, it is advisable to regularly clear excessive snow accumulation from the roof to prevent structural stress.

Troubleshooting

Problem	Possible Cause	Solution
Difficulty inserting panels	Bent aluminum pieces or panel edges; structure not perfectly aligned.	Carefully straighten any bent aluminum pieces or panel edges using pliers or a flathead screwdriver. Ensure the frame is square and level before inserting panels.
Panels popping out (especially roof vent)	High winds when vent is open or door is closed; insufficient anchoring.	Ensure the greenhouse is securely anchored. Close vents and doors during high winds. Panels can typically be reinserted.
Sliding door does not slide smoothly	Debris in the track; misaligned door frame.	Clean the door track thoroughly. Check the door frame for proper alignment and adjust if necessary.
Water leakage at roof seams	Minor gaps between roof panels and gutters.	Apply a bead of silicone sealant along the seam where the gutters meet the roof panels to prevent water from running underneath.
Greenhouse not holding heat overnight	External temperature fluctuations; insufficient insulation.	While the greenhouse provides temperature stability, significant drops in external temperature may require additional internal heating or insulation for sensitive plants.

Specifications

Feature	Detail
Brand	Garvee
Model Number	15JH
Product Dimensions (L x W x H)	96"L x 72"W x 75.6"H (6x8 FT)
Item Weight	36.5 pounds
Frame Material	Aluminum
Cover Material	Polycarbonate (PC)
Color	Green
Indoor/Outdoor Usage	Outdoor
Weight Capacity (Roof)	Up to 110 LBS/sq ft
UPC	881206545881

Warranty and Support

Garvee is committed to providing comprehensive customer support. If you encounter any issues during assembly, operation, or require gardening insights, please contact our dedicated customer service team.

Return Policy: This product is eligible for returns within 30 days for a refund or replacement. Please refer to your purchase platform for specific return instructions.

For assistance, please visit the Garvee Store on Amazon or contact customer support through your order details.
